PARK'S FLORAL GUIDE

1903

PARK'S TUFTED PANSIES—PLANT OF PURE WHITE. [See Page 31.]

Price, 4 packets 10 cents, 1 packet 3 cents.

Mr. Park:—The Tufted Pansies are among the most lovable flowers in creation. Plants and flowers resemble the Pansy, but the flowers are not so large. The plants are much stockier and sturdier than those of the Pansy, stocking out into a mass of dark, rich green. The flowers are produced continuously, and are so sweet I never can pass them without a sniff.—Mrs. McIntyre, Cass Co., Ind.

Mr. Park:—It is with pleasure that I testify to the peculiar beauty of your Tufted Pansies. They are especially adapted to amateur cultivation, as they grow and bloom well in either garden or house.—Mrs. J. B. Jennings, Sevier Co., Utah.

HOW TO REMIT.—Sums of \$1.00 or more send by Money Order, Registered Letter, Draft or Express Order at my risk. Smaller sums in Postage Stamps. See that the remittance covers the cost of the seeds. Prices cannot be discounted.

✂ If you get extra copies of this Guide kindly hand to flower-loving friends.

GEO. W. PARK, Seedsman and Florist,
LAPARK, Lancaster Co.

A Few Introductory Words.

MY DEAR FLOWER-LOVING FRIENDS:--Away back in the '60's I began to cultivate flowers because of my love for them. At first my surplus seeds were given to friends, but later I began to moderately advertise them. My first advertisement was of a dozen lines in the *Rural American* (March issue, 1887), published by T. B. Miner, at Clinton, N. Y. In 1889 I issued my first Catalogue, and since then it has been regularly published, the edition and size enlarging frequently, until to-day 500,000 copies of 64 pages are needed to post my friends about my seeds.

During these years my buildings were enlarged and my facilities increased from time to time, but at last, finding my place out-grown, I purchased the beautiful property now occupied, and have fitted it up with new buildings, new appliances and new machinery, run by improved water power. The United States Government has established a new Post Office for me under the name of Lapark, and I am now prepared to serve my hundreds of thousands of patrons more promptly and satisfactorily than ever before.

The immense growth in my trade, in the face of great competition, has been a source of wonder to others, and many enquire how it was secured. I have no secrets, and I frankly state that my success has been due to my efforts to treat all fairly and honestly, to hustling enterprise, the use of modern, up-to-date methods and appliances, and by giving my friends the benefit of this economy by supplying the best seeds at about half the prices of reliable competitors.

My Friends, my Seed House is at your door. Simply write to me, giving a list of what you want and enclosing their value. I will attend to the rest. I guarantee the safe arrival of your letter, the safe arrival of the goods, the correction of errors, and entire satisfaction. I will also send you explicit directions about sowing and growing that will insure your success. I solicit and will appreciate your favors and those of your friends. May I not hear from you? Address

GEO. W. PARK, Lapark, Lancaster Co., Pa.

TRIAL SUBSCRIPTIONS and TRIAL SEEDS.

SPECIAL OFFER TILL AUGUST 1, 1903.

PARK'S FLORAL MAGAZINE for monthly floral advice, and Park's Choice Flower Seeds for beautiful flowers are not excelled in the world. I want everybody to know this by an acquaintance with both, and to this end make the following offer:

PARK'S FLORAL MAGAZINE one year on trial	10 cents.
25 cents' worth of seeds for trial, your selection, from this Guide,	15 "
Total for trial Magazine and trial Seeds,	25 "

The trial subscription and trial seeds must both be ordered together. If already a subscriber you can send the Magazine to a friend who will appreciate it. To get seeds on these terms a trial subscription must always accompany the order—that is, 25 cts. for both Magazine and seeds, must be remitted.

IT WILL PAY YOU TO GET UP A CLUB.

I would like to have a large club of trial subscriptions and orders from your vicinity, and therefore make you these offers:

For Five Trials, Magazine and Seeds, \$1.25, I will mail to you Park's Study of Chrysanthemums, a magnificent work of art painted by Paul de Longpre, and perfectly reproduced in colors by lithography. I will also include a fine collection of Choice Flower Seeds, ten packets, my selection.

For Ten Trials, Magazine and Seeds, \$2.50, I will mail to you Park's Study of Chrysanthemums, a packet of 25 Chrysanthemum seeds, value 25 cents, saved by Mrs. Shepherd, the California specialist, from her splendid collection; also the collection of Choice Flower Seeds, ten packets, my selection. If preferred I will allow you to select 25 cents' worth of seeds from this Guide instead of the Chrysanthemum seeds, but the collection of ten packets must be of my selection.

For Fifteen Trials, Magazine and Seeds, \$3.75, I will mail to you Park's Chrysanthemum Art Study, the collection of ten packets seeds, my selection, and also 75 cents' worth of choice seeds which you may select from this Guide.

For Twenty Trials, Magazine and Seeds, \$5.00, I will send Park's Study of Chrysanthemums, the collection of ten packets seeds, my selection, the packet of choice Chrysanthemum seeds, and \$1.00 worth of seeds, which you may select from this Guide. Or, if preferred, instead of the dollar's worth of seeds, I will mail to you a watch, desirable for the kitchen or bedroom, a good time piece.

If you wish to get up a large club for cash send for my liberal terms, with blank lists, sample copies, catalogues, booklets, etc., which will be sent you free on application. I hope my friends will go to work early, and secure subscriptions and orders before the people are supplied with periodicals and seeds. I feel certain of a permanent subscriber and patron when my Magazine and seeds are once introduced. Will you not, dear patron, secure for me a large club of subscriptions and orders in your vicinity this season? Kindly let me hear from you. Address

GEO. W. PARK, Lapark, Lancaster Co., Pa.

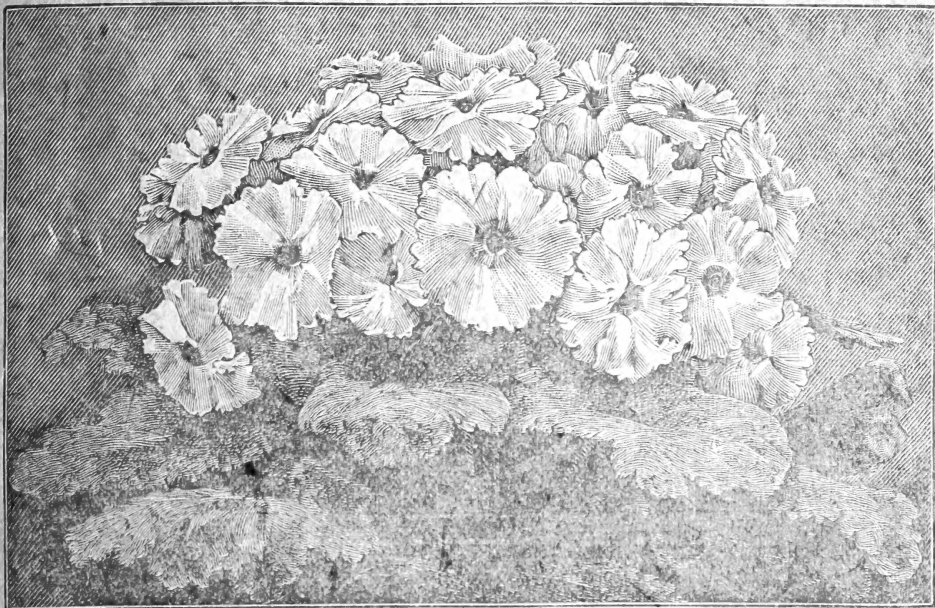

SPECIAL OFFER OF MAGAZINE AND SEEDS.

For \$1.00 I will send you Park's Floral Magazine monthly for five years, and you to select seeds from this Guide amounting to \$1.05. **For \$2.00** I will send you the Magazine for five years, and allow your selection of seeds from this Guide amounting to \$2.10, and will also mail to you Park's Chrysanthemum Art Study, and a packet of Mrs. Shepherd's Chrysanthemum seeds. Get your choice of seeds from this Guide, or send the Magazine as a present to some flower-loving friend.

Address **GEO. W. PARK, Lapark, Lancaster Co., Pa.**

Park's Globular Chinese Primrose. ³

Special Mixture, 4 packets 10 cents, 1 packet 3 cents.

PARK'S NEW GLOBULAR CHINESE PRIMROSE.

For a glorious windowful of blooming plants in winter Park's New Globular Fringed Chinese Primroses surpass all other flowers. They are not difficult to start from seeds, grow in sun or shade, begin to bloom in six or seven months from time of sowing, and continue in bloom all winter. The plants are robust, and have fine foliage. The flowers are large, exquisitely fringed, and borne in great clusters, as my artist has endeavored to show in the above fine wood engraving. They are sure to bloom in winter. They will not disappoint you. The colors are very bright and distinct, and my special mixture contains them all. This strain of Chinese Primroses is unequalled, and should be grown by all who wish the finest flowers, and most profuse-blooming plants.

Pink, White, Flesh-color, Blue, Crimson and Striped, each..... 5
All colors in special mixture, finest quality, 4 packets 10 cents, 1 packet..... 3

Park's Star Flower, A Grand Novelty.

4 packets 10 cents, 1 packet 3 cents.

As a stately and showy bedding plant nothing of late introduction surpasses Park's Star Flower. It was discovered in the wilds of the Argentine several years ago, and was only popularized last season when I advertised it and sold about 35,000 packets. The plant is a wonder, and makes a gorgeous bed throughout the season. Miss Bertie Posten, who earned a gold watch last year for growing the largest plant, writes,

Mr. Park:—I grew Park's Star Flower this year, and must say it was the grandest of all my flowers. Everybody saw and admired it, and asked where I got it. It grew 10 feet 6½ inches high, with leaves 3 ft. 4 in. long and 2 ft. 8 in. broad. It had 251 big flower trusses, which bore, during the season, 10,380 beautiful, creamy Star-flowers, showy, and deliciously scented. Miss Bertie Posten, Wythe Co., Va., Nov. 15, 1901.

I have hundreds of reports similar to Miss Posten's, the statements of which are verified by her affidavit in my possession. You will be pleased with it. Don't fail to include it in your order. Price, 4 packets 10 cents 1 pkt. 3 cents.

Mr. Park:—I have raised flowers for 60 years, but never saw anything to equal Park's Star Flower. The plants are tropical, with immense trusses of sweet-scented flowers all season.—Mrs. J. Lulick, Ionia Co., Mich., Nov. 15, 1901.

Park's Hardy Primrose.

Finest Mixture, all colors, 4 packets 10 cents, 1 packet 3 cents.

PLANT OF PARK'S HARDY PRIMROSE.

For a charming display of spring flowers get seeds of Park's Hardy Primrose and sow in a box in March, April, May or June. When well started set the plants where they are to bloom. They will soon become established, and will then take care of themselves, being perfectly hardy. The foliage is handsome, and the flowers showy, delicate in texture, rich and varied in colors, deliciously scented and produced in abundance.

White, Golden Yellow, Scarlet, Sulphur and Rose, each..... 5
 Splendid mixture, all colors, 4 packets 10 cents, 1 packet..... 3

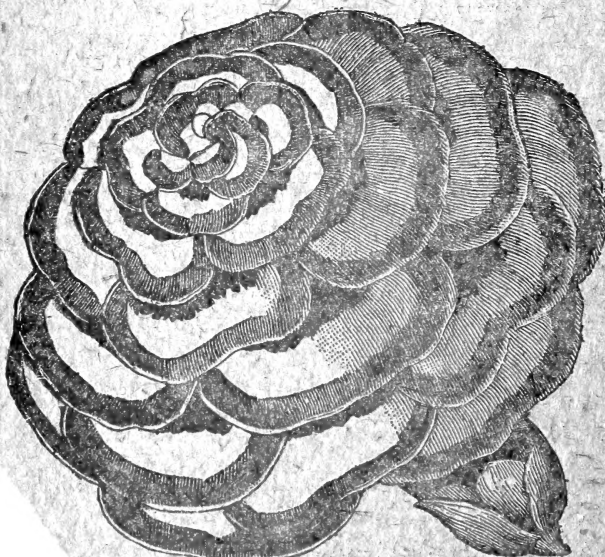

This splendid Primrose is represented in the above fine wood engraving, which was prepared expressly to give my patrons an idea of a plant in bloom. Everybody who has a garden should have this grand perennial.

Park's Everblooming Garden Pinks.

Mixed, 4 packets 10 cts., 1 packet 3 cts.

You all know the old-fashioned, clove-scented, hardy Garden Pinks which were so popular in earlier years. They are still beautiful and highly prized, but the Garden Pinks I here offer are far superior in size, doubleness and variety of colors, and equally as rich in fragrance, while they have the added merit of everblooming. Plants are easily started from seeds, are hardy, begin to bloom in early summer, and keep in bloom throughout the season. The flowers are exquisitely marked, come in double, semi-double and single form, and show many colors. Price, mixed, 4 packets 10 cents, 1 packet 3 cents.

Mr. Park:—Who does not love the old-fashioned May Pink, like our mothers used to have? In the spring of 1900 I bought a packet of seeds of Park's Everblooming Garden Pinks, and although the season was so unfavorable

eight plants, which bloomed last spring, and were all different, four double and four single. The flower just as fragrant as Carnations. Mr. Park's are an improvement on the old varieties, as they continue all the summer, and one of mine bloomed in November. I do not think I ever derived so much pleasure from a small outlay of money, and the pleasure was shared by many of my friends. As these are perennial to gladden us year after year.—Mrs. L. L. Williams, Gates Co., N. C., Dec. 2, 1901.

PARK'S CHOICE Machine-Packed Flower Seeds.

ALWAYS FIRST QUALITY.

New Crop Offering for 1903. Warranted.

Fern-tree Acacia.

Price, 4 packets 10 cts., 1 packet 3 cts.

Acacia lophantha is one of the most beautiful foliage plants known. The elegant, fern-like leaves are freely produced the first season, the plant growing rapidly, and soon making an admirable display either as a pot or bedding plant. Grows from three to five feet high the first season, and blooms when older. It delights all who see it. Price, 4 packets 10 cents, 1 packet 3 cents.

Mr. Park:—We never enjoyed a plant more than we did your Acacia lophantha. We let it grow straight, as we wanted a large tree, tied it to a long rod. It sent out branches from every leaf, without nipping, and every branch sent out side branches. It was a perfectly shaped tree, between six and seven feet high, covered with downy, yellow balls the second winter.—Mrs. Blanc, Mass.

Ageratum in Variety.

Splendid mixture, 4 pkts. 10 cents, 1 pkt. 3 cents.

For a showy bed of white and blue flowers the Ageratum is unsurpassed. The flowers are in large clusters, and produced freely the entire summer. They like a sunny place. A. Mexicanum grows 18 in. high, and is fine for the background or center, while the Dwarf varieties may be grouped around. Desirable in winter, in pots. Easily grown. Set ten inches apart.

Mexicanum, blue.....	3	Imperial Dwarf, blue.....	3
Albiflorum, white.....	3	Dwarf White.....	3
Luteum, yellow.....	3	Swanley Blue, azure.....	3
Perfection Dwarf, large deep blue.....	3	Little Dorrit.....	3
Lasseauxii, pink.....	3	Conspicuum.....	3
Princess Pauline, new, blue with white center, very pretty.....	5		

Special mixture of all the above, 4 pkts. 10 cents, 1 pkt. 3 cents.

Mr. Park:—I raised your Dwarf Ageratum last summer. It was lovely—a perfect wall of delicate blue, which is so scarce among flowers, and which is so necessary in making up bouquets.—Augusta Oldfield, McPherson Co., Kas.

Alyssum.

4 pkts 10 cts., 1 pkt 3 cts.

Early and free-blooming annuals, with sweet-scented white flowers in showy clusters; bloom continuously when freely cut, showy for edgings and useful for bouquets.

Common Sweet, per oz. 2¢ cents.....	3
Little Gem, very dwarf, fine edging.....	3
White Carpet, trailing, very floriferous.....	3
The varieties mixed, 4 pkts 10 cents, 1 pkt 3 cents.	

Mr. Park:—Dwarf Sweet Alyssum is the most perfect edging plant I ever used. There is nothing to be compared with it.—Julia H. Howe, Plymouth Co., Mass.

<i>Abronia umbellata</i> , a succulent, sun-loving, Verbena-like plant; hush before sowing.....	3
<i>Adonis</i> , annual; plants grow a foot high; finely cut foliage and shining red flowers, mixed.....	3
<i>Ethionema grandiflora</i> , a handsome perennial, flowers rose, in long spikes.....	3
<i>Agrostemma coeli rosa</i> , 1 foot high; flowers rose and white, mixed.....	3
<i>Anemone coronaria</i> , showy flowers of various colors, mixed.....	3

Alonsoa.

Mixed, 4 pkts. 10 cts., 1 pkt. 3 cents.

Graceful and beautiful plants covered with showy bloom for months. Half-hardy annuals. Excellent for pots or for garden borders. Of easy culture. One foot high.

Mutisi, pink with crimson center.....	5
Warszewiczii compacta, fine bright scarlet flowers.....	6
Linifolia gracilis, very graceful; flowers scarlet, in great abundance; fine for pots or borders; See Engraving.....	6
All sorts mixed, 4 packets 10 cents, 1 packet 3 cents.	

<i>Anagallis</i> , very pretty, free-blooming half hardy annuals. Like a dry, sunny place. Blue, crimson, scarlet, separate or mixed.....	1
<i>Anchusa</i> , perennials with rich blue flowers, mixed.....	1
<i>Archiea coronata</i> , new; showy golden yellow with brown spots.....	1
<i>Artemisia annua</i> , grows 3 ft. high, with 1 like, fragrant foliage; known as Sweet Pe.....	1
<i>Asperula azurea setosa</i> , 9 in. high, 1 ing, with pretty blue flowers in cluster.....	1

New Antirrhinum---Snapdragon.

Special mixture of all varieties, 4 packets 10 cents, 1 packet 3 cents.

Antirrhinum majus, better known as Snapdragon, has been wonderfully improved within the past few years, and is now one of our most showy and satisfactory garden flowers. The plants bloom freely and continuously the first season, and if not allowed to exhaust themselves seeding will endure the winter and bloom well the second year. The flowers are fragrant, borne on large spikes, and are rich in color, and many spotted and variegated as finely as a Calceolaria. A few spikes in a vase are admirable. Fine for either beds or pots. My seeds are the product of the best European growers, and my special mixture is unsurpassed.

Special mixture, 4 pkts. 10 cents, 1 pkt. 3 cents.

ANTIRRHINUM--SNAPDRAGON.

Mr. Park:—Your Giant Fragrant Snapdragons are the finest Snapdragons I ever had. My plants bloomed well in summer, and removed to the window, they were lovely the next spring.—Ida Gray—Osborne Co., Kas.

Mr. Park:—I am very partial to your Giant Snapdragons. I start the seeds early, and they bloom beautiful all summer. If lifted in the fall they will bloom in the window during winter.—M. E. Callahan, Warren Co., Ia.

Mr. Park:—From seeds obtained from you 2 years ago I had a most beautiful bed of Snapdragons. I had seven varieties of blossoms, and they bloomed until frost came. The bushes spread over considerable space with their many spikes of lovely bloom.—Mrs. James G. Birchfield, Washtenaw Co., Mich.

Amaranthus.

Special mixture, 4 pkts. 10 cts., 1 pkt. 3 cts.

Showy plants both in foliage and flowers. Easily grown from seeds. Are brightest in a poor soil and sunny situation.

Quadricolor, new; foliage green, crimson and yellow in beautiful contrast. See engraving. 4 packets 10 cents, 1 packet..... 3

Tricolor splendens, Joseph's Coat improved 3

Salicifolius, fountain plant..... 3

Melancholeus rubra, red foliage..... 3

Caudatus, Love lies bleeding..... 3

Cruentus, Prince's Feather..... 3

Bicolor ruber, bright carmine scarlet..... 3

Amabilis tricolor, very showy..... 3

All sorts, special mixture, 4 pkts. 10 cts., 1 pkt. 3 cts.

Mr. Park:—I have sown your seed for six years and have always found them, and all plants and bulbs you sent me, exactly what they were represented to be.—E. A. Vandevanter, Chase Co., Kas.

Mr. Park:—I have bought all my flower seeds from you for five years. I find them the very best ever used. They are always fresh, and never fail.—Mrs. M. Guest, Jefferson Co., Kas.

Mr. Park:—I have had such splendid success with your Amaranthus that I can recommend them to all flower growers.—Louise J. Myers, McLean Co., Ill.

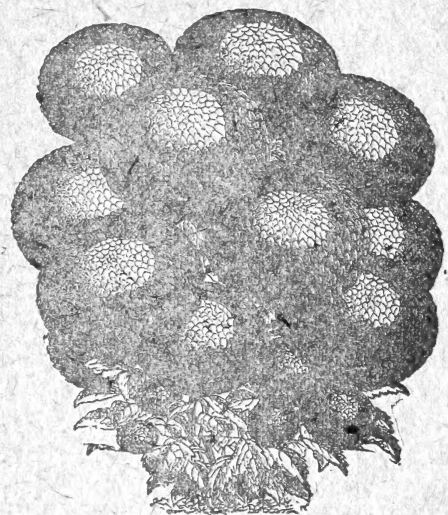

AMARANTHUS QUADRICOLOR.

Splendid Double Asters.

Complete mixture of all varieties and colors, 4 pkts 10 cts., 1 pkt 3 cts.

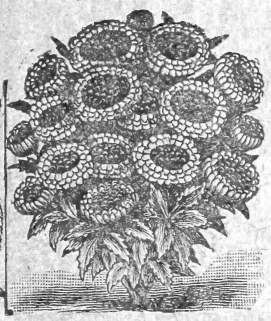

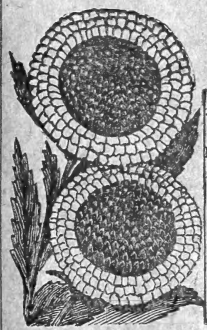

DWARF CHRYSANTHEMUM ASTER.

COCARDEAU OR CROWN ASTER.

The Splendid Double Asters I offer are among the most beautiful flowers grown from seeds. They are of easy culture, and charming for either beds or pots. They grow in any deep, rich soil, in a sunny exposure, and bloom gorgeously in autumn. A black beetle sometimes eats the flowers, but is easily overcome by sprinkling the plants with water in which is stirred Paris green, a half tea-spoonful to a gallon of water. The seeds I offer are of the highest quality, and can always be depended upon for a grand display of double blooms, while my special mixture contains all the colors in careful proportion. They cannot be surpassed.

New Marvel Aster.

Price, 4 pkts 10 cts., 1 pkt 3 cts.

A globe-flowered Aster two feet high, bearing large, very showy flowers, white with a blood-red center. The odd contrast in colors always attracts attention and admiration. See engraving.

Ostrich-feather Aster.

Mixed, 4 pkts 10 cents, 1 pkt 3 cents.

Two feet high; flower large, long-petaled, irregular, not unlike Japanese Chrysanthemum. A showy, handsome sort, much admired.

White, white tinted rose, light yellow, rose, mauve, crimson, white tinted blue, azure, dark violet, light blue and white, each..... 5
All colors, splendid mixture, 4 pkts 10 cts., 1 pkt 3

Mr. Park:—Last spring I purchased quite a variety of flower seeds of you, and as they were inexpensive I was surprised at the beauty of my flower bed. I was especially delighted with the Feather Asters. They were beautiful.—Mrs. S. A. Slipper, Clinton Co., Ind.

Grasshoff's Perfection Aster.

Special mixture, all colors, 4 pkts 10 cts., 1 pkt 3 cts.

This is the finest incurved Aster in cultivation. Plants grow two feet high, and bear from 20 to 30 huge, globular flowers, very symmetrical and beautiful. One of the best. See engraving.

White, crimson, scarlet, rose, azure, deep blue, violet, rose and white, scarlet and white, blue and white, purple-violet, white and carmine, etc., separate, each..... 5
All the colors mixed, 4 pkts 10 cents, 1 pkt..... 3

Cocardeau or Crown Aster.

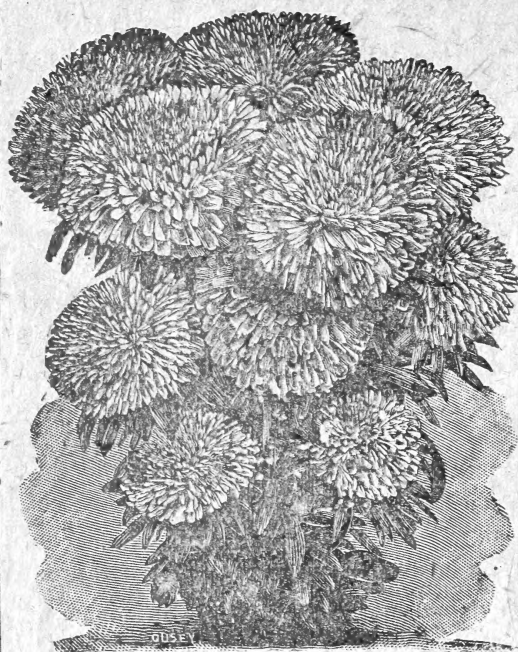

Special mixture, 4 pkts 10 cts., 1 pkt 3 cts.

Plants 1½ feet high, bearing flat petaled double flowers three inches across, and of all colors with a white center, as shown in the above engraving.

Rose, carmine, crimson, red, blue and violet, separate, each.....
The same in special mixture, 4 pkts 10 cts.

Park's Silver Cloud Aster.

4 packets 10 cents, 1 packet 3 cents.

PARK'S SILVER CLOUD ASTER.

Victoria Aster.

Special Mixture, 4 pkts. 10 cents, 1 pkt. 3 cents.

This is one of the finest varieties. Plants 18 inches high, well branched, erect, and bearing splendid double flowers, well recurved petals, and in all the rich colors, many exquisitely tinted. Make superb pot-plants for exhibition.

White, light yellow, carmine, light Blue, indigo blue, reddish lilac, rose, rose tipped, bright red, crimson, white and blue, brown violet, Peach, &c. h 5
All colors mixed, 4 pkts. 10 cts., 1 pkt. 3

Queen of the Earlies.

Special mixture, 4 pkts. 10 cents, 1 pkt. 3 cents.

The earliest Aster. Flowers very double, of many colors. Fine for beds or pots.

White, rose, crimson, light blue, dark blue, each per 1/4 oz. 50 cents, per packet..... 3
All colors mixed, 4 pkts. 10 cts., 1 pkt. 3

Mr. Park:—We grew your Queen of the Earlies Aster in bed, also some in pots. They were beautiful double flowers, each plant hanging full of bloom. The seeds were all good. We had many colors, and they made a fine display.—Mrs. W. A. Benton, Lawrence Co., Ind.

Park's Yellow Quilled Aster.

4 packets 10 cents, 1 packet 3 cents,

This is an admirable variety, growing two feet high, branching, and bearing large, double quilled flowers of a fine lemon yellow. It is the best yellow Aster to date.

Mr. Park:—Have any of your patrons ever raised Yellow Asters? The writer grew some last summer, and they were grand—almost as deep in color as the Golden Glow.—Mrs. B. F. Snyder, Marshall Co., Ind.

New Jewel Aster.

Special mixture, 4 pkts 10 cts., 1 pkt 3 cts.

A fine variety, two feet high. Flowers short-petaled, large, full-double, as round ball, and freely produced.

apple-blossom, deep rose, scarlet, scarlet white, crimson, azure, blue and violet, each 5
special mixture, 4 pkts 10 cts., 1 pkt. 3

This superb New Aster grows a foot high, and is a mass of large, double, snow-white flowers, as shown in the engraving. It is beautiful in pots, showy in a bed, and charming in bouquets or vases. I can also supply this fine Aster in colors, as follows:

Rose, light blue, brown red, peach bloom, white passing to rose, white passing into lilac, apple blossom, violet red, each, per packet..... 5
All colors, special mixture, 4 pkts 10 cts., 1 pkt 3

Mr. Park:—I got a packet of your Silver Cloud Aster seed last summer. They were really very fine, and admired very much by everyone. I cut hundreds of blooms. They blossomed a long time.—Mrs. Jno. Lamont, Hampshire Co., Mass.

Park's Scarlet Triumph Aster.

4 packets 10 cents, 1 packet 3 cents.

An exceedingly attractive Aster, about 10 inches high, each plant bearing 30 to 40 handsome flowers about three inches in diameter, rich, deep scarlet, incurved petals, and of faultless form. Other varieties are:

White, purple, violet carmine and variegated, each 5
The same in fine mixture, 4 pkts 10 cents, 1 pkt 3

Mr. Park:—My Triumph Asters from your seeds, sown April 1st, made the finest showing by August 20th I ever saw. The flowers were of the deepest, richest scarlet color, and continued in full bloom until killed by frost.—Mrs. A. B. Woodsey, Caldwell Co., Mo.

Dwarf Chrysanthemum Aster.

Special mixture, 4 pkts 10 cents, 1 pkt 3 cents.

One of the best Asters for bedding purposes and for pots. Plants grow a foot high, are stiff, erect, branch well and are very free-blooming. The flowers are flat petaled large, and of many colors. Late blooming. See engraving on preceding page.

White, 1/4 oz. 75 cts.; pkt. 5 Rose, 1/4 oz. 75 cts.; pkt. 5
Crimson, 1/4 oz. 75 cts.; pkt. 5 Scarlet, 1/4 oz. 75 cts.; pkt. 5
Light blue, 1/4 oz. 75 cts.; p. 5 Dark blue, 1/4 oz. 75 cts.; p. 5

Superb Double Balsams.

9

Tall and Dwarf, all colors, special mixture, 4 pkts 10 cts., 1 pkt 3 cts.

The Double Balsams are beautiful, easily grown flowers, blooming in the garden abundantly all summer. The tall kinds grow three feet high, and the dwarfs a foot. They make fine hedges in the garden, and are lovely as pot plants. A little pruning is often beneficial. My Balsam seeds are the best obtainable.

Park's Prize Camellia-flowered Balsams.

All colors in special mixture, 4 pkts: 10 cents, 1 pkt. 3 cents.

This race of Balsams is unsurpassed. Plants grow from two to three feet high, branch, and become wreaths of rich, waxy bloom. The flowers are of huge size, double to the center, and are of all shades from white to dark crimson, while many are beautifully spotted and variegated. If you wish to grow but one variety this is the one to get. The flowers are exquisite when arranged in a dish. I can supply the following colors:

Pure white.....	5	Lilac.....	5
Pure scarlet....	5	Violet.....	5
Crimson.....	5	Rose spotted....	5
Light yellow..	5	Scarlet spotted	5
White reflect-	5	Lilac spotted	5
ing rose.....	5	White reflect-	5
Salmon rose... 5		ing lilac... 5	

PARK'S PRIZE CAMELLIA-FLOWERED BALSAM.

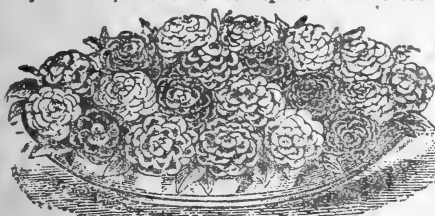

Mr. Park:—We were delighted with your lovely Camellia-flowered Balsams. They were just as pretty as Tea Roses, and made lovely plate bouquets. Their colors and shadings were most beautiful, and they were so large and dainty.—Mrs. James G. Birchfield, Washtenaw Co., Mich.

Mr. Park:—To be sure of flowers get Park's Prize Camellia-flowered Balsams. Almost every seed grows, and such beautiful flowers, double as a Rose. They come in many colors, some spotted, others striped, and others in tints from the purest white to the richest red and purple. I had two pure white ones last summer, yet the colors were not alike. They like rich soil, but do well anywhere.—Mrs. Carl Kruse, Plymouth Co., Iowa.

Mr. Park:—Your Prize Camellia-flowered Balsams were fine—so double, like little Roses. I had a great variety of colors, also shaded and spotted.—H. A. Rosenkrans, Whiteside Co., Ill.

OTHER VARIETIES.

Double Dwarf Balsams , effective little plants.	
Twelve varieties of plain and six of spotted, each	5
Dwarfs in special mixture, 4 pkts. 10 cents, 1 packet	3
Double Rose-flowered , 12 colors, separate, each	5
The varieties mixed, 4 packets 10 cents, 1 packet....	3
Double Spotted Balsam , 12 colors, separate....	5
The sorts mixed, 4 packets 10 cents, 1 packet.....	3
Victoria , satiny white, dotted scarlet.....	5
Carnation striped , mixed, 4 pkts 10 cents, 1 pkt	3
Blood Red , very double.....	5
Solferino , white, spotted and striped.....	5
Balsams , all sorts, mixed, 4 packets 10 cts., 1 packet	3

DISH OF BALSAM FLOWERS.

Bellis-Giant Double Daisy.

Finest mixed, 4 packets 10 cents, 1 packet 3 cents.

Double Daisies are lovely edging plants, easily grown from seeds, and blooming freely the first season, if started early. The plants are hardy, and continue for several years, blooming early in spring, and almost continually through the season. Fine also in pots, and bloom well in a cool room in winter. I offer seeds only of the finest large-flowered double sorts.

Giant White, very large, double flowers, pure white in great profusion.....	5	Giant Rose, shades of red varying to carmine, very free.....	5
Finest mixed, 4 packets 10 cents, 1 packet 3 cents.			

Mr. Park:—I think every seed of the packet of Double Daisy from you came up, and the plants were soon just loaded with buds and blossoms, very double, in shades of pink and pure white.—Mrs. G. Cobleigh, Middlesex Co., Mass.

Bartonia aurea , 2 feet high, with showy yellow flowers.....	5
Borecole , ornamental cabbage, fine for an outdoor winter bed.....	5

Bidens atrosanguinea , the "Black Dahlia", showy dark crimson bloom.....	5
Brachycome , Swan River Daisy, pretty flowers of various colors, mixed.....	3

New Floriferous Calliopsis.

Complete special mixture, 4 packets 10 cents, 1 packet 3 cents.

NEW FLORIFEROUS CALLIOPSIS.

Mr. Park:—Your new compact Calliopsis, gold and brown is just fine. This is a favorite of mine, and always reminds me of a butterfly's wing.—H. M. Jenko, Wayne Co., Mich.

Mr. Park:—I have got a your Calliopsis from seeds. It is one of the most graceful and beautiful of seed plants. It is easily grown and should have a place in every garden. I would advise everyone to try it.—Mrs. H. Van Gorden, Hamilton Co., O.

Large-flowered Calendula.

Mixed 4 pkts. 10 cts., 1 pkt. 3 cts.

Calendula, sometimes known as Pot Marigold, is a beautiful hardy annual, blooming freely throughout the season, and rivaling the Chrysanthemum in autumn, often showing its golden flowers above the early snows of winter. The plants make a showy border in beds, always cheerful, always admired.

Primrose Yellow..... 5 | Yellow striped gold..... 5
Golden Yellow..... 5 | Sulphur and Yellow..... 5
Special mixture, all the large-flowered sorts, 4 pkts
10 cents, 1 packet..... 3

LARGE-FLOWERED CALENDULA

Cacalia, Flora's Paint Brush; hardy annual; plants a foot high; flowers yellow and scarlet, brush-like, on long, slender stems, mixed..... 3
Calandrinia, succulent plants with showy white, rose and carmine, cup-like flowers; mixed..... 3
Calceolaria pinnata, a pretty annual with yellow flowers..... 3
Callirhoe, trailing Hol yhook, large, showy flowers; trailing hardy plants; mixed colors..... 3
Campanula, annual, Venus Looking Glass, pretty summer flowers for beds; bloom early and freely; six inches high; white, blue, violet, mixed..... 3
Cannabis gigantea, the giant Hemp; grows eight feet high; Ornamental foliage plant; seeds good for Canary birds..... 3
Carduus Marianus, a thistle-like plant of easy culture; pretty; variegated foliage..... 3
Carthamus tinctorius, the garden Saffron; five feet high with showy yellow flowers..... 3

Centaureidum Drummondii, an annual a foot high, with yellow Aster-like flowers..... 3
Cerinth, honey plants; annuals with yellow and white flowers; mixed..... 3
Clarkia, showy, easily-grown annuals of many colors, and double and single. Special mixture, 4 packets 10 cents, 1 packet..... 3
Cleome speciosa, purple, spiker-like, showy flowers at tips of branches 3 feet high..... 3
Collinsia, half-hardy annuals a foot high, flowers in profusion, white, lilac and purple. C. verna, sown in autumn is beautiful; mixed colors..... 5
Colletia, a handsome annual, scarlet flowers..... 5
Commelina coelestis, blue and white flowers, pretty but fragile, mixed..... 3
Cosmidium Burrigeum, a composite plant with showy yellow flowers..... 3
Crepis, rather showy, a very easily grown annual; yellow, white and pink, mixed..... 3

Candytuft in Variety.

Special mixture, 4 pkts. 10 cts., 1 pkt. 3 cts.

Old, popular and beautiful hardy annuals. The plants grow a foot high, and bear great tufts of showy bloom. A member of the Cress family. Sow where the plants are to bloom, very early in the spring, and thin till six or eight inches apart. The white Candytuft Amara makes a gorgeous display when seeds are sown in the fall. The flowers of all the varieties are exceedingly attractive in a bed, and fine for cutting.

New Giant, Hyacinth-flowered, immense spikes, large flowers, very showy, white; see engraving; 4 packets 10 cents, 1 packet..... 3

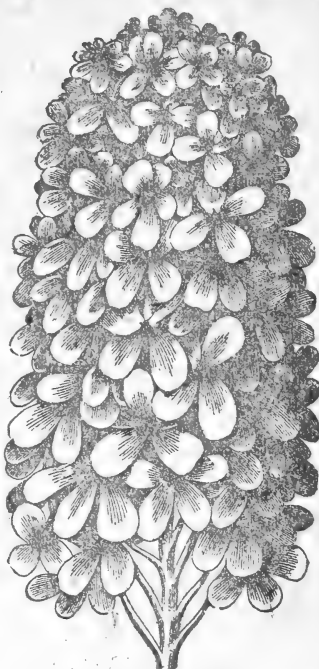

Special mixture of all sorts, oz. 10 cents; 4 pkts 10 cts., 1 pkt..... 3

Mr. Park:—Your seeds of the new Giant Candytuft grew well, and the flowers were much larger than any I ever raised before. What I liked best in them, they were continuously in bloom.—Mrs. A. D. Kint, Franklin Co., Kas.

Mr. Park:—The Giant Rocket Candytuft seed that I got of you this year I put in the ground the first of May, and before I hardly knew it I had a bed of the most beautiful white flowers I ever saw.—Mrs. Oscar W. Hall, Branch Co., Mich.

Mr. Park:—I have had great success with your seeds. I never saw such grand spikes of Candytuft as I had. I think every seed grew and every plant blossomed.—R. W. Burten, Cowley Co., Kas.

Mr. Park:—Every person who raises flowers should try one packet of your Hyacinth-flowered Candytuft. The seeds start readily, and the plants are strong and quick in growth. The plants are snow-white and beautiful. The plants in masses or in borders are very showy.—Mrs. Ed. Fought, Neosho Co., Kas.

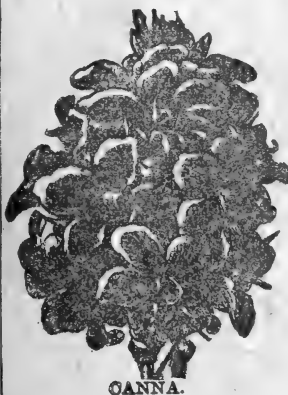

GIANT CANDYTUFT.

New Gladiolus-flowered Cannas.

Finest mixture, 4 packets 10 cents, 1 packet 3 cents.

These new Cannas are rather dwarf, elegant, showy foliage plants, and above the foliage are borne huge trusses of large, snowy, Gladiolus-like flowers of many colors, as shown on the page of this GUIDE. They are gorgeous in beds, and useful for large pots. Seedlings bloom well the first season, started early, and the roots may be wintered in a dry room or cellar and used for bedding from year to year. My seeds are direct from the originator of these grand Cannas, and cannot be surpassed. Special Mixture, 4 pkts. 10 cts., 1 pkt. 3 cts.

Mr. Park:—Last February I got a packet of your Gladiolus-flowered Canna seeds. About the 20th I filed the seeds, soaked them 24 hours, then planted in roads earth. In less than a week I had twelve nice plants. They grew fast like field corn in June. About the middle of March I put them in condensed milk cans, and kept them there until the middle of May, then bedded them, out. They blossomed before the old tubers did, and some of them were the finest I ever saw. Everyone who came here would say, "Oh, where did you get those beautiful Cannas?"—Mrs. Ellen Harris, Ingham Co., Mich.

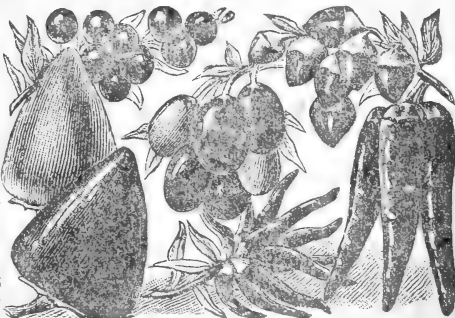

CANNA.

Capsicum---Peppers.

Complete mixture, 4 pkts. 10c., 1 pkt. 3c.

The Fancy Peppers are very ornamental either as house or garden plants. They are easily grown, and the fruits are so abundantly produced, and so bright and attractive that they are always admired. Some are long, some round, some nosed, and some twisted and wrinkled, as shown in the illustration, while they vary in color from white through the shades of red and yellow and black.

Little Gem.....	5	Prince of Wales.....	5
Tom Thumb.....	5	Cardinal.....	5

Cherry Red.....	5	Cherry Red.....	5

CAPSICUM—FANCY PEPPER.

Chili Red, Elephant's Trunk, Golden Dawn, Kaleidoscope, Large Bell, Long Red, Long Yellow, Monstrous Red, Monstrous Yellow, Procopis Giant, Red Cluster, Red Spanish, Ren Squash, Ruby King, Scarlet Maddaloni, Yellow Nocera, Yellow Squash, Bull-nose. Separate colors, each per packet..... 5

All sorts, special mixture, 4 packet 10 cents, 1 packet..... 3

Mr. Park:—Those who wish something out of the ordinary should send for several packages of your mixed seeds of Peppers as I did. I raised about fifty plants, and a large bed of them in the flower-garden, and they were a perfect kaleidoscope of colors, the yellow ones slowly turning crimson, the shiny black turning to orange, and the glossy red ones in size from a pea to the large bullnose, and useful for pepper-sauce and cooking. They were interesting and beautiful.—Mrs. J. Jasper, Napa Co., Cal.

Carnations--Hybrid Early-flowering.

Special mixture, 4 packets 10 cents, 1 packet 3 cents.

MALMALSON CARNATION.

The New Hybrid Carnations bear large double flowers, are of many rich colors, and are delightfully fragrant. Seedlings bud in from four to six months after sowing, and bloom until after frosts. If potted early, so that the plants get well started, they will bloom well in winter. I offer only seeds of first quality, and my mixtures are not surpassed.

Malmalson, the new giant-flowered variety. The plants are robust, and the large flowers are full-double, as shown in the engraving, of many exquisite colors and tints, and deliciously scented. Splendid mixture, 4 packets 10 cents, 1 packet 3 cents.

Gullaud, a superb variety of rapid growth; flowering early from seeds; my seeds are excellent, and will produce 80 per cent. of fine double flowers, many of them shades of yellow, mixed

Comtesse de Paris, yellow, very early, mostly true from seeds

Chabaud, begins blooming in seven months from seed, flowers large, almost perfect in form, fragrant and very double, mid

French Dwarf White, new, fine

Earliest French Giant, immense double flowers, early blooming; a new and superb sort

Snowflake, a lovely pure white variety, fine for the cemetery or for garden beds

Yellow Ground, beautiful varieties

French Cyclops, a hybrid between *Dianthus Heddewigi* and *D. caryophyllis*, fragrant, showy

Margaret, the earliest of the Hybrids; plants begin to bloom in four months from seeds, and bear splendid double fragrant flowers of many rich colors. I offer only the improved, compact strain, and my seeds are of the finest quality. Mixed, 4 packets 10 cents, 1 packet..... 3

New Hybrid Carnations, all varieties, mixed, 4 packets 10 cents, 1 packet..... 3

Mr. Park:-I must say a few words in praise of raising Carnations from seeds. I planted a packet of your seeds last March in the house, set some in the garden in May, and the rest I potted. Those I set in the garden were in bloom the last of August. The ones I potted are in bloom now in the house. I had some very handsome varieties. A white one was extra large, pure white and fragrant.—Mrs. F. C. Farington, Essex Co., Mass.

Mr. Park:-Carnations are my special favorites. The plants are easily raised from seeds. I never had so much pleasure with any plants as with several Carnations of different colors I raised from seeds. The flowers were lovely, and so delicately scented.—Mrs. G. W. C., Jefferson Co., Kas.

Mr. Park:-My Carnations from your seeds began to bloom in September, and were lovely. I had five different colors.—Mrs. G. Cobleigh, Middlesex Co., Mass.

Celosias in Variety.

Special mixture, comb and tasseled, 4 pkts 10 cts., 1 pkt 3c.

The Celosias are beautiful, easily grown, half-hardy annuals. They begin to bloom when small, and continue to make a fine display till the frost of autumn. Fine for beds or pots.

New Giant Dwarf Corcombs.—These are the finest varieties of *Celosia cristata*. They grow a foot high, and produce enormous combs of many rich colors. A bed of them makes a fine show on the lawn, and the plants are also fine in pots. They are showy exhibition plants. My seeds are only from selected combs, and are unsurpassed.

Blood Red..... 5 | **Orange**..... 5 | **Rose**..... 5

Crimson..... 5 | **Purple**..... 5 | **Sulphur**..... 5

Empress, bright crimson, dark foliage, a very fine sort..... 5

Variegated, taller than the above..... 5

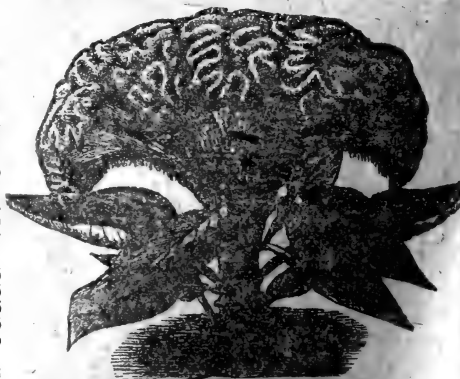

Japonica, scarlet, two feet high..... 5

Coxcombs in special mixture, containing seeds of all the above, 4 packets 10 cents, 1 packet..... 3

Plume-flowered Celosias.—These are varieties of *C. pyramidalis*. They grow two feet high, and bear large, feathery, pyramidal plumes. Crimson, scarlet, yellow and violet, each, per packet, 5 cents. Special mixture of these colors, 4 packets 10 cents, 1 packet 3 cents.

Celosias in fine mixture, embracing all the Coxcomb and Plume-flowered sorts, 4 pkts. 10 cts., 1 pkt. 8 cts.

Mr. Park:-From seeds of Giant Dwarf Coxcomb bought of you in '88, I had an 8-foot circular bed, which for show was hard to beat. The combs, some of which were 14 inches broad, were of such a dazzling velvety crimson, and so perfect as to be the wonder and admiration of all visitors.—E. B. Shusser, St. Joseph Co., Ind.

COXCOMB-FLOWERED CELOSIA.

Cosmos, Early-flowering.

Finest Special Mixture, 4 packets 10 cents, 1 packet 3 cents.

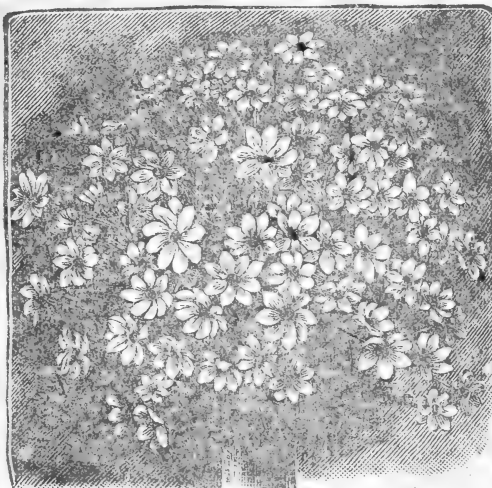

Fine, half-hardy annuals, bearing showy, daisy-like flowers of various colors on long stems. The early-flowering kinds I offer are more dwarf than the older sorts, but are not always true from seeds. They are very floriferous and attractive, and make a showy and beautiful mass of bloom in autumn. Sow where the plants are to stand when the apple is in blossom. Plants should stand a foot apart.

Rose, White, Dark Red, Dawn, each per pkt..... 5
Yellow, a species of Bidens..... 5
Mammoth, tall, fine..... 5
Finest mixture, 4 packets 10 cents, 1 packet..... 3

Mr. Park:—To out-wit Jack Frost I sowed your Early-flowering Cosmos last May, transplanting to the perennial garden, and pinching out the tops after well started to make them bushy. They thrived, and all fall I enjoyed the airy blooms. Several plants bore pink and crimson flowers, but I prefer the white blooms. I shall try more next season.—Sevillan T. Hinrichsen, Morgan Co., Ill.

Mr. Park:—Among the seeds received from you last spring was a packet of your Early-flowering Cosmos. The plants grew finely and bloomed well, showing delicate colors of pink, yellow and pure white. The foliage was beautiful, being fine-cut and dark green. My neighbors thought the plants lovely, and were anxious to know their name, as they were new to them.—Mrs. A. A. Aikin, Middlesex Co., Mass.

Mr. Park:—I planted a packet of your Early-flowered Cosmos last spring as an experiment, as I had formerly only grown the late variety. I think every seed germinated. The plants commenced blooming in April when only six inches high, and continued growing and blooming until we moved in July.—Mrs. Marshall, Fresno Co., Cal.

COSMOS, EARLY FLOWERING.

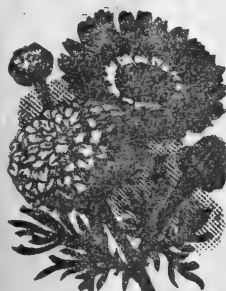

and were anxious to know their name, as they were new to them.—Mrs. A. A. Aikin, Middlesex Co., Mass.

Chrysanthemum—Annuals.

Special mixture, 4 packets 10 cents, 1 packet 3 cents.

The Annual Chrysanthemums make thrifty, bushy plants that are covered with bright, showy single and double flowers from early in the season until after severe frosts. The plants are fine for beds in the garden or for pot plants. They grow about two feet high, and should stand eight or ten inches apart. Started from seeds in summer they make fine winter-blooming plants.

CLINTONIA PULCHELLA.

Double and Single Dahlias.

Complete Special Mixture, 4 packets 10 cents, 1 packet 3 cents.

GROUP OF DOUBLE DAHLIAS.

Complete mixture, embracing the above choice double and single sorts, 4 packets 10 cents, 1 packet 3 cents.

Mr. Park:—I bought of you last spring a paper of Single Dahlia seeds, from which I raised 15 vigorous plants, which were greatly admired by all who saw them. Every plant bore different colored flowers, which in beauty and delicacy of tint were hard to surpass. One plant bore two kinds of flowers—some solid and others variegated. From these plants I have about 100 tubers for planting next spring. No one who never tried it has any idea of the ease with which Dahlias can be raised from seeds.—John T. Irion, M. D., Editor Paris Post Intelligencer, Paris, Tenn., Nov. 18, 1901.

Mr. Park:—I sowed seeds of your Double and Single Dahlias in a window box last February, and raised twelve sturdy plants. Oh, what a grand variety I had! Nearly all were double. Some bore four different colors, and one plant showed flowers of six different colors. I am much pleased with your seeds.—Mrs. George Sitterle, Wayne Co., N. Y., Nov. 12, 1901.

Mr. Park:—I have grown your choice Dahlias for a number of years, and think them the most beautiful of all flowers.—D. L. Essex Co., Mass.

Mr. Park:—I sowed a package of seeds of your Single and Double Dahlias, and all came up. I had sixty-five fine plants, and such a variety of colors and markings I never saw before. I was not a lover of Dahlias, but now I think there is nothing like them. Plants started April 15th bloomed July 1st.—Mrs. Wells, Steele Co., Minn.

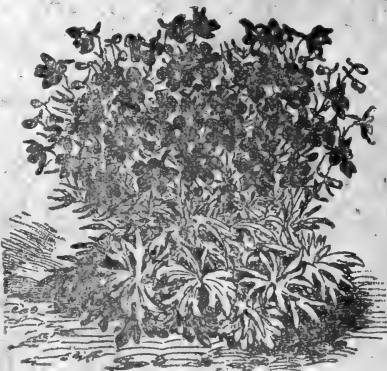

Mr. Park:—I sent to you last spring for seeds of Single and Double Dahlias, and I certainly had a beautiful variety. I cheerfully recommend your Dahlia seeds.—J. W. Meng, La Fayette Co., Mo., Nov. 18, 1901.

Delphinium—Larkspur.

Complete Mixture, 4 packets 10 cents, 1 packet 3 cents.

The annual kinds of Delphinium, known as Larkspur, embrace some of our finest garden flowers. They are mostly double, free-blooming, borne in spikes, and of all shades from white to crimson, and through the shades of blue. Sow the seeds where the plants are to bloom, either in fall or early spring, and thin out as the plants grow.

Giant Dwarf Rocket or Hyacinth-flowered, double, mixed.....	3
Tall Rocket, double, mixed colors, and pure white, each.....	3

EARLY-FLOWERING DELPHINIUM.

Early-flowering Delphiniums.—These are hardy perennials, but bloom quite early the first season from seeds, and will bloom for several seasons. The flowers are mostly white and fine shades of blue. They are fine for cutting. The plants are dwarf and bloom freely all season. Finest mix'd, 4 pkts 10c., 1 pkt 3

Mr. Park:—Delphiniums are with us nearly all the year round. They grow two feet high, and all summer are covered with their odd-shaped bloom in shades of white, pink and blue.—Mrs. F. Smith, Tomp. Co., Tex.

Datura Wrighti , very large, trumpet-like,

NEVER DISAPPOINTED.—Dear Mr. Park:—I have been buying seeds and bulbs of you for years, and find them always satisfactory. Your Asters are grand; your Double Petunias large and full, and very beautiful. And so I might speak of all you have sent me. I am never disappointed.—Mrs. L. Graser, San Francisco, Cal., Nov. 19, 1901.

Dianthus Chinensis.

Complete Mixture, Single and Double, all colors, 4 pkts. 10c, 1 pkt. 3c.

Dianthus Chinensis embraces the beautiful Chinese, Japanese and Imperial Pinks, all of which bloom well the first season, endure the winter, and make a fine display the second season. The plants are easily grown from seeds, and make a showy bed, set eight inches apart. Fine for cutting. The white varieties are often used for cemetery planting. The flowers of the Japanese sorts, known as *D. Heddewigi*, both plain and fringed, are larger and brighter than those of the older kinds, but all are showy and very beautiful.

Heddewigi, dwarf, double, in finest mixture, 4 packets 10 cents, 1 packet..... 3

STRIPED PINKS.

Japanese Dianthus. They are very fine, and if they had the fragrance they would be equal to the finest Carnations. Such constant bloomers, with all shades of color, they afford great returns in the way of pleasure to the grower, and I advise all to try them.—R. E. Bryant, Montgomery Co., Ind.

Mr. Park:—Everyone I think likes Pinks, but not everyone knows how superior your choicest varieties of Dianthus are to the old fashioned sorts. Some of them are so large and double as to rival Carnations in beauty. All they lack is the perfume.—Mrs. Cora Hewitt, Clinton Co., Mich.

Mr. Park:—I guess every seed of your Dianthus came up, for I had more plants than I wanted, and gave to my neighbors. And such flowers, both double and single, the most beautiful I ever saw. They were the admiration of all passers-by.—Maggie Sheeley, Franklin Co., Kas.

Mr. Park:—Among the flower seeds I received from you last spring was a packet of Double Japan Pinks. They were simply grand when in bloom, so beautiful in variety of colors.—Miss W. H. W., Ham Co., Ind.

DIADEM PINE.

Diadem Pinks, splendid hybrids of *D. Heddewigi*. Immense double flowers, richly colored and marked, as shown in engraving. One of our finest Pinks. New white, light ground with fine markings..... 5

Red, Rose and white with dark velvet crimson markings, including new white, very beautiful, 4 packets 10 cents, 1 packet..... 3

Mixed, New Dwarf Diadem Pink..... 6

Striped Pinks.—I offer a fine selection of Striped Pinks, shown in the little engraving. These are variously colored and variously striped, and all large, double-flowered, blooming the first season. They are splendid Pinks. Mixed, 4 packets 10 cents, 1 packet..... 3

All of the above Pinks, single and double, in complete special mixture, 4 packets 10 cts., 1 pkt. 3

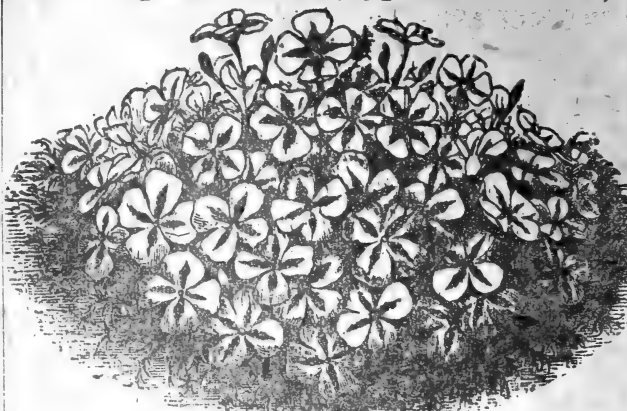

Mr. Park:—From the packet of your seeds of Japan Pinks planted in the spring of '99, I saved several good plants, which bloomed in the fall. They began blooming early in the spring, and continued all summer, and oh, such blossoms—large, from three to four inches across, delicate cream, pink, rose and mottled. They were indeed a joy and a beauty until cold weather came. I gathered hundreds of blossoms from the bed. Mrs. B. S.

Black Hawk Co., Iowa.

Mr. Park:—All lovers of flowers should try your

"Double and Single Eschscholtzias.

Special mixture, 4 packets 10 cents, 1 packet 3 cents.

ESCHSCHOLTZIA, MALTA CROSS.

Mandarin, deep orange..... 5
Golden West, large, yellow, new..... 5
Rose Queen, fine rose..... 5

Malta Cross, see engraving..... 5
All sorts, double and single, mixed, 4 packets, 10 cents, 1 packet..... 3

Mr. Park:—I sow your Eschscholtzias in the fall. In the spring the plants appear, and the bed is a great sheet of yellow, ranging from cream to deep orange, which, with the silvery, fine-cut foliage makes a grand display.—E. B. Shuner, St. Joe Co., Ind.

Annual Euphorbias.

Special mixture, 4 packets 10 cents, 1 packet 3 cents.

The Euphorbias I offer are very handsome foliage plants. They grow two feet high, and the flowers are small, but are surrounded by bracts or leaves that are richly colored and very showy. They are of easy culture, and very attractive in autumn.

Variegata, beautiful green and white variegation; makes a fine bed or group... 5
Heterophylla, rich scarlet bracts or leaves in the autumn; very fine..... 5
Aureo-variegata, a variety of Heterophylla with elegant golden foliage; not always true..... 5
The above sorts in special mixture, 4 packets 10 cents, 1 packet..... 3

Mr. Park:—Euphorbia marginata (or variegata) is an annual that comes from seeds. It is lovely in growth, and the leaves are distinctly bordered with pure white. Each branch terminates in a cluster of white flowers, but these are insignificant, and it is the white-margined foliage which makes the plant attractive. It sometimes attains a height of five feet, but further north rarely grows over three feet high. It is of a succulent nature, and endures heat admirably.—Mrs. G. T. Drennan, Orleans Co., La.

Mr. Park:—Euphorbia heterophylla, though plain in early summer, becomes one of the gayest and showiest of our autumn plants. When the little flowers appear the whorls of floral leaves which surround them become rich in the most vivid colors, reminding one of a spray of autumn leaves. They like a warm, sunny place, and will bear any amount of drought.—Lora S. La Mance, McDonald Co., Mo.

EUPHORBIA HETEROPHYLLA

Erodium Gratum, a plant of the Geranium family, with hygrometrical seeds..... 5
Erysimum, New Compact, a fine dwarf plant bearing yellow, Wallflower-like blooms..... 5

Gerardia hybrida, a Pentstemon-like perennial, blooming the first year..... 5
Godefia, very pretty, showy annuals of easy culture; flowers cup-shaped, of all shades from white to crimson, many spotted; a favorite in England. Fine mixed, 4 pkts 10 cts., 1 pkt..... 3

You Never Err in Buying Park's Seeds.

They always grow, always bloom, always please.
None higher in quality, none lower in price.

They are put up by steam-power packing machines, marvels of ingenuity. The seeds are put in a hopper, and the empty envelopes in a long trough, then the power is applied, and the machine does the rest. The hopper can be refilled and the trough replenished while the machine is in motion, so that no time is lost, and the amount of work done is wonderful. Park's machines, operated by a skilful boy, turn out 60,000 packets a day during the busy season, measuring, filling, sealing and counting, and doing the work perfectly. Such labor-saving devices enable Park to sell the best seeds at the lowest prices, and Park runs all risks and guarantees satisfaction. Reader, you never err in buying Park's seeds. Better send your orders where the prices are right, and where you have assurance of first-class seeds and satisfactory treatment.

GEO. W. PARK, Seedsman & Florist, La Park, Lancaster Co., Pa.

Everblooming Gaillardias.

Complete Mixture, Single and Double, 4 pkts. 10 cents, 1 pkt. 3 cts.

Gaillardias are splendid everblooming plants growing two feet or more in height. The flowers are mostly red or yellow, or a combination of those colors. Started early the plants begin blooming in summer, and continue to bloom freely until frost. The perennial sorts are the most free-blooming and desirable for bedding, and are generally preferred to the annual varieties. They are hardy, and among the most desirable of our showy garden flowers.

Grandiflora, new, large flowered perennials, but blooming well the first season; 3 feet high. Golden yellow and yellow and red in superb mixture, 4 packets 10 cents, 1 pkt 3

Grandiflora, New Compact, see engraving. This variety is of dwarf growth, compact and free-blooming. An excellent permanent bedding plant. Mixed, 4 packets 10 cents, 1 packet..... 3

Picta, Single, white, white-margined, rose and white, yellow, yellow-banded, salmon, and quilled, each..... 5

The same mixed, 4 packets 10 cts., 1 pkt. 3

Lorenziana, double, yellow, sulphur, red and yellow, each..... 5

The Double sorts mixed, 4 packets 10 cents, 1 packet..... 3

Gaillardias in complete special mixture, 4 packets 10 cents, 1 packet..... 3

Mr. Park:—I began to cut my perennial Gaillardias on Memorial day, and they bloomed right along all summer and fall till the middle of November.—Julia H. Howe, Plymouth Co., Mass.

Mr. Park:—Your Perennial Gaillardias are the flowers for our northern gardens. When once growing you have a continual bed of gold year after year. Calliopsis will also do the same.—Laura A. Randall, Ing. Co., Mich.

Mr. Park:—I raised some Gaillardias from seeds last summer. They were beauties, and admired by all who saw them, as they were something new in this part of the country.—Angusta Oldfield, McPherson Co., Kas.

NEW COMPACT GAILLARDIA.

Beautiful Gilias.

Complete mixture, 4 pkts. 10 cts., 1 pkt. 3 cts

The Gilias are hardy annuals of great beauty, and so easily grown that they should be in every garden. The plants grow a foot high, bearing graceful foliage and charming little flowers in profusion, in colors white, rose, lavender, yellow, dark blue, etc. There are some dwarf varieties that grow only six inches high, and are fine for edgings. Sow the seeds either in fall or spring, where the plants are to bloom.

Dichotoma, new; a very free-blooming sort, with lovely white flowers; see engraving; 4 packets 10 cents, 1 packet..... 3

Achilleaefolia, blue, white and rose, mixed..... 5

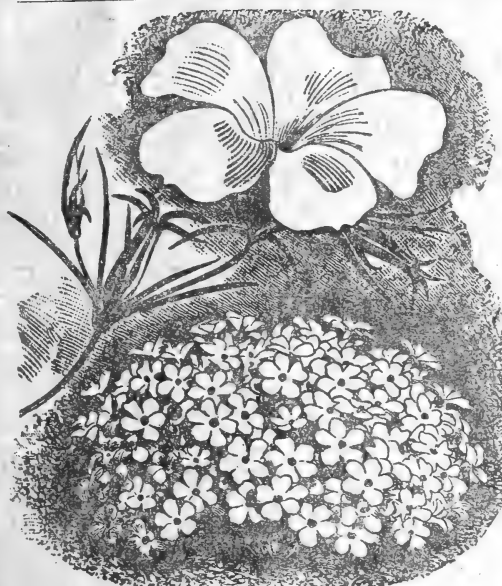

Capitata, blue and white, mixed..... 5

Lacinata, *Limiflora*, *Minima* and *Nivalis*, separate or mixed..... 5

Tricolor, white, violet and rose, separate or mixed..... 5

Tricolor nana compacta, dwarf..... 5

Complete mixture of the above sorts, 4 packets 10 cents, 1 packet..... 3

GILIA DICHOTOMA.

Helianthus--Sunflowers.

Well-known, showy, easily grown, hardy annuals, bearing double and single yellow flowers. Fine for large beds or hedges.

Bismarckianus, single..... 5

Californicus, single..... 5

Cucumerifolius Orion..... 5

Stella and Diadem, each 5

Globofus, double..... 5

Sunflowers in complete mixture, 4 pkts 10 cents, 1 pkt. 3

H. globofus in a group, bordered with dwarf *Nanus*, appears well. *H. Bismarckianus*, 10-feet high, surrounded by *H. primrose-colored*, and the group bordered with *H. Nanus fol. variegatus* is very attractive. Try a bed.

HELIANTHUS GLOBOSUS, DOUBLE.

Runnemannia fumarifolia, two feet high, with bright yellow, Poppy-like flowers, 4 pkts 10 cts., 1 pkt 3c.

New Giant Primrose Hibiscus.

4 packets 10 cents, 1 packet 3 cents.

NEW GIANT PRIMROSE HIBISCUS.

most peculiar I ever saw, and were very pretty.—Mrs. Opha Baxter, Kalamazoo Co., Mich.
 Mr. Park:—Your Primrose Hibiscus are fine. The blossoms are as large as saucers. The plants grow 4 or 5 feet high, and bloom a long time.—Mrs. Ed. Fought, Neosho Co. Kan.

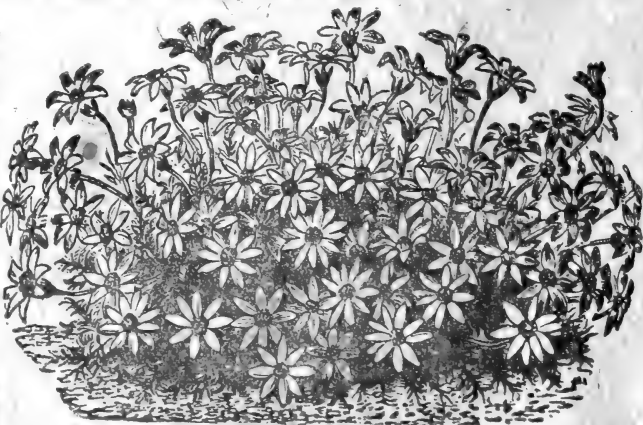

The New Giant Primrose Hibiscus is one of the most beautiful and attractive seedling flowers. The plants grow four feet high, are bushy, and appear as a dense pyramid of elegant lobed leaves, not unlike a Ricinus. Above the foliage are the great Primrose-yellow flowers, four inches across, each flower showing a distinct crimson-maroon eye, as shown in the engraving. Started early the plants bloom throughout the summer and autumn, and are wonderfully attractive, eliciting the admiration and praise of all who see it. Easily grown from seeds. Likes a rich, moist, sunny place. Desirable for pots as well as for the garden. May be kept over winter in the cellar, and will bloom well the second season.—A hardy plant in the south. 4 packets 10 cents, 1 packet 3 cents.

Mr. Park:—My Hibiscus from your seeds grew $4\frac{1}{2}$ feet tall, with leaves from 12 to 14 inches across, of skeleton-like shape, and produced blossoms six inches and some seven inches across, of a light yellow with dark brown center. They were the admiration of all who saw them. The flowers opened daily at 3 o'clock, and the plants bloomed till frost. They were the

Heterospermum Xanthii.

4 pkts. 10 cents, 1 pkt. 3 cents.

This is a new annual suitable for a border or edging; grows eight inches high, spreading, and producing an abundance of chrome-yellow flowers, shading to canary at tip of petals. The plants begin blooming four weeks after they appear, and are in flower continuously until after the frosts of autumn. The plants are desirable for a bed, and appear well grown in masses, as also in rows or borders. It was introduced by an Italian florist in 1893, and is yet quite rare. It is highly recommended by its introducer, and should be given a trial.

HETEROSPERMUM XANTHII.

Impatiens glandulifera, annual, growing six feet high, crowned with clusters of showy red and white flowers; mixed, 4 pkts 10 cts., 1 pkt 3
Jenopsidium acule, charming miniature for a carpet about pot-plants, or for edging; known as Diamond Flower; 4 pkts. 10 cts., 1 pkt..... 6
Kaulfussia amelloides, a pretty annual 6 inches high; Daisy-like; many sorts mixed... 6
Leptosyne Stillmanii, new compact; pretty yellow bloom; very early flowering..... 3

Leptostaphon, very free-flowering, beautiful dwarf annuals; many varieties, mixed..... 3
Linaria, fine plants for beds and pots; many sorts mixed..... 3
Lupinus, showy plants of easy culture; often 3 feet high; many sorts mixed..... 3
Lychnis, scarlet, white and rose flowers in profusion; fine mixed, all sorts; 4 pkts 10 cts., 1 pkt 3
Linum grandiflorum, scarlet flowers, a fine annual, a foot high..... 3

Beautiful Annual Lobellias.

Complete mixture of all varieties and colors, 4 pkts 10 cts., 1 pkt 3 cts.

The annual Lobellias are very graceful and beautiful flowering plants for outdoor edgings and for in-door pots and baskets. Seedling plants begin to bloom in a few weeks after they are started, and bloom freely and continuously for several months, until exhausted. The flowers are of various shades of white, red and blue, often with a conspicuous eye, as shown in the engraving, and always bright, delicate and attractive. Started in mid-summer the plants are handsome for pots or baskets in winter, and in the sunny window of a cool room will bloom until spring.

Barnard's Perpetual, a very fine variety, compact in habit, and blooms throughout the season; flowers dark blue with a distinct white edge. Fine for baskets, pots or borders. See engraving, 4 packets 10 cents, 1 packet 3

White Lady, new, large flowered white; very fine..... 6

Pumila alba, dwarf, compact, white..... 6

Pumila splendens, dark blue, with white eye, compact..... 6

Emperor William, light blue, compact..... 6

Royal purple, very fine, blue, white eye..... 3

Crystal Palace, blue, for edging..... 6

Kermesina, crimson-flowered..... 6

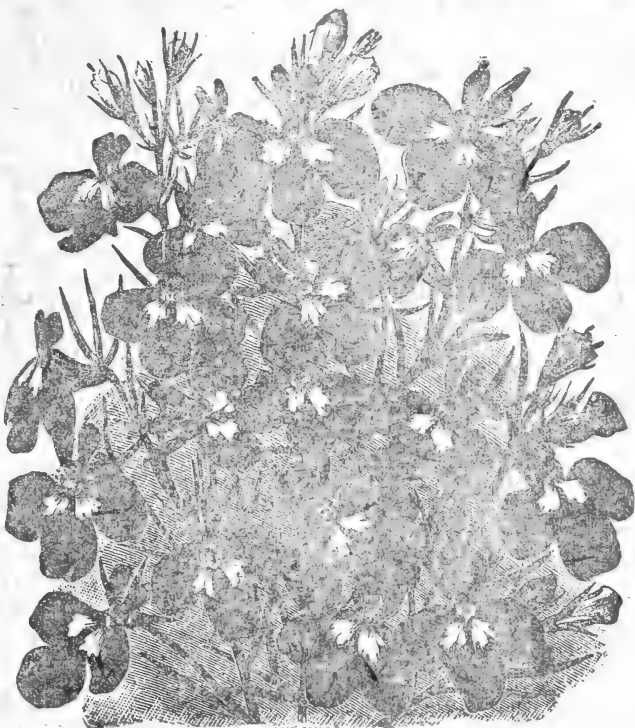

Prima Donna, velvet maroon..... 6

All varieties in splendid mixture, 4 packets 10 cents, 1 packet 3 cents

Mr. Park:—I had good success with your Lobelia seeds. I think every one of the little seeds came up. I gave half away, and had a lovely mass of flowers in my garden.—C. M. Joslin, Montcalm Co., Mich.

Mr. Park:—I edged one of my flower beds with Lobelia. The flowers are blue and the foliage is so fine and pretty. It was in bloom all summer until late in the fall.—Mrs. Ellen L. Potter, Pulaski Co., Ind.

Mr. Park:—Started in July Lobellias bloom in autumn, and in pots, vases or baskets make a fine display the whole winter. I pulverize the soil, sift it, then sow. In a few days the pot is covered with tiny plants. I always get my seeds from Mr. Park, and they are of the growing kind.—Mrs. E. E. Fressler, Effingham Co., Ind.

BARNARD'S PERPETUAL LOBELIA.

Pearl, white, with blue margin..... 3 Golden Queen, yellow band..... 2

Duplex, double, mostly true..... 6 Ramosa, red, white and blue, mixed 3

Lavatera.

Special Mixture, 4 packets 10 cents, 1 packet 3 cents.

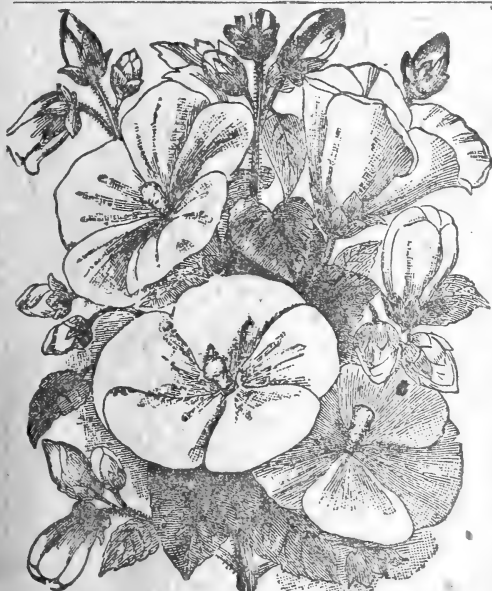

Lavatera trimestris is a splendid malvaceous annual, two feet high, bearing showy flowers not unlike a Single Hollyhock. Easily raised from seeds, and blooms all season. Makes a fine hedge or low screen. Although of the simplest culture, this splendid annual is rarely met with. It deserves a place in every garden of flowers.

Colors red and white, separate, each..... 5 Both colors in special mixture, 4 pkts. 10 cts., 1 pkt. 3

Mr. Park:—For two years I have tried to get Lavatera trimestris to grow, but failed. Last spring, however, I bought a package of seeds from you, and succeeded in raising some fine flowers.—J. G. Noyes, Suffolk Co., Ill.

Lavatera Trimestris.—The most useful of Lavateras is L. trimestris, a beautiful South European Annual, 2 to 3 feet high, and bearing in summer a profusion of large, pale rose or white blossoms. It thrives in ordinary soil, preferring one that is rich and light. It may be sown in autumn or early spring in the open border.—English Flower Garden.

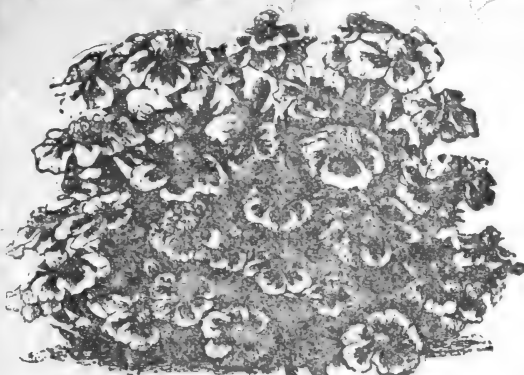

Lavatera trimestris.—Few annuals are gayer than this. The type is rose, and the variety, alba, is white. A group of this in some rough spot in the garden, or in the border, is delightful. The plant is free in growth and bloom. Both grow to a height of three feet. The flowers are precious for cutting, and those of this mallow remain in beauty from July to September.—Century Book of Gardening.

LAVATERA TRIMESTRIS.

Marigolds in Grand Variety.

Complete mixture, all sorts, 4 packets 10 cents, 1 packet 3 cents.

SINGLE DWARF FRENCH MARIGOLD.

African kinds in the center, the tall French kinds next, and bordering with the French dwarf kinds, or with *Tagetes signata* pumila, the dwarf American Marigold.

- African Marigold**, Double, (see engraving), orange, sulphur, quilled yellow (Eldorado), and quilled sulphur; each..... 5
 Tall African mixed, 4 packets 10 cents, 1 packet..... 3
 Dwarf African mixed, 4 packets 10 cents, 1 packet..... 3
French Marigold, orange, gold-margined, dark brown, striped, sulphur, grandiflora tall or dwarf Tall French mixed, 4 packets 10 cents, 1 packet..... 5
 Dwarf French mixed, 4 packets 10 cents, 1 packet..... 3
French Lilliput Marigold, small flowered, brown, gold and sulphur, separate or mixed..... 5
French Dwarf Single, (see engraving), Legion of Honor, gold-margined, yellow, sulphur and striped, each per packet..... 6
 French Dwarf Single mixed, 4 pkts. 10 cents, 1 pkt... 5

Tagetes *signata* pumila, beautiful edging, 1 inches high, dense, leafy, and another set with golden flowers, 4 pkts. 10 cts., 1 pkt. 3
 Mr. Park's Marigold, Legion of Honor, is a flower of some size.—R. S. Bryant, Montgomery Co., Ind.

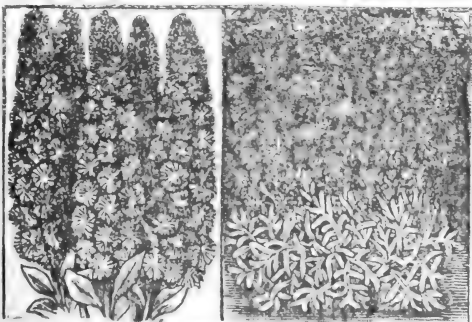

The Marigolds (*Tagetes*) are old-fashioned flowers, but are not to be despised. There are few flowers brighter or more attractive. Even a child can start the plants, and they quickly come into bloom, and are a show of brown or golden flowers throughout the entire season, until after severe frosts. Every garden should contain a bed of these flowers. The Double African kinds are as showy as Dahlias, and more free-blooming. The French Marigolds are not so large, but are more delicate, and quite as attractive. The single bicolored dwarf varieties are now fashionable, and are fine for edging and borders. A very showy and satisfactory bed can be made of Marigolds alone, planting the tall

DOUBLE AFRICAN MARIGOLD.

Complete mixture, French, African, Single and *Signata*, carefully proportioned, containing seeds of all the sorts, 4 packets 10 cents, 1 pkt. 3

of great beauty. Your friends should know how hand-

SWEET MIGNONETTE.

- Ruby midget, coppery-scarlet..... 5
 Pumila erecta, best for pots..... 3
 Miles Spiral, excellent..... 3

Mr. Park's—One whole bed was devoted to your mixture of Mignonette last summer and its fragrance filled the air for quite a distance around. It well paid one for rising early. Although its odor was wafted about by the winds in daytime, yet its sweetness was most delightful in the early morning.—Mrs. L. Maccomb Co., Mich.

- Malope grandiflora**, hardy annuals, 1 foot high, showy, cupped flowers, white, purple and rose... 3
Matra crispata, 6 feet tall, crisp leaves; showy 3
 Mauritiana, rose, veined..... 3
 Minata, scarlet, very pretty..... 3
 Moschata, perennial, rose and white, mixed..... 3

Nanus roseum, a new, superb dwarf sort.....	5
Complete mixture, containing sort of all the above varieties, 4 pkts. 10 cents, 1 pkt.....	3

Mr. Park:—A friend of mine had a bed of your Mimulus flowers last summer, and if anything could be prettier I don't know what it could be. They were purple and white mixed, and yellow and red mixed and spotted, and different shades of all colors, spotted and striped. Some of the flowers were as large as a starlet's ear, with throats like a Snapdragon.—Mrs. Willis Morrison, Los Angeles Co., Cal.

GLOXINIA-LIKE MIMULUS.

as large as a starlet's ear, with throats like a Snapdragon.—Mrs. Willis Morrison, Los Angeles Co., Cal.

MARIBILIS—FOUR-O-CLOCK.

Dwarf white, yellow and red, white and red, yellow	5
Dwarf varieties mixed, 4 packets 10 cents, 1 packet	3

Mr. Park:—Last year I grew a plant of your Mirabilis in the house, because I love the delicious scent of the flowers. When it died down in the fall I set the pot away, and the next spring it came up and grew, to my astonishment. This summer I had a large lot of the plants, and they were lovely. The roots are like Dahlia roots, and I shall keep them in the cellar, and set them out next spring.—Mrs. M. M. Burnham. Charlevoix Co., Mich., Nov. 7, 1901.

Mirabilis—Four-O-Clock.

Special mixture, 4 pkts. 10 cts., 1 pkt. 3 cts.

Old-fashioned herbaceous perennials, blooming the first season from seeds. Each plant becomes a bush three feet high and three feet across, covered during every evening in summer with the large, bright, showy flowers of many colors. Grouped together the plants make a fine bed. The dwarf sorts are fine for the border. They grow less than a foot high, have striped foliage, and as fine flowers as the tall varieties. See engraving.

Tall white, white and yellow, white and red, yellow, rose, red and yellow, crimson, violet, lilac, lilac and white, and tricolor, each.....	5
Tall varieties mixed, 4 packets 10 cents, 1 packet.....	3
Complete mixture, tall and dwarf, in all colors, 4 packets 10 cents, 1 packet.....	3

Myosotis—Forget-me-nots.

Special mixture, 4 packets 10 cents, 1 packet 3 cents.

Everybody loves the delicate little clusters of Forget-me-not, and when the plants are so easily grown they should be in every garden. Started early the plants will bloom in autumn; started in August they will bloom in the spring. They like shade.

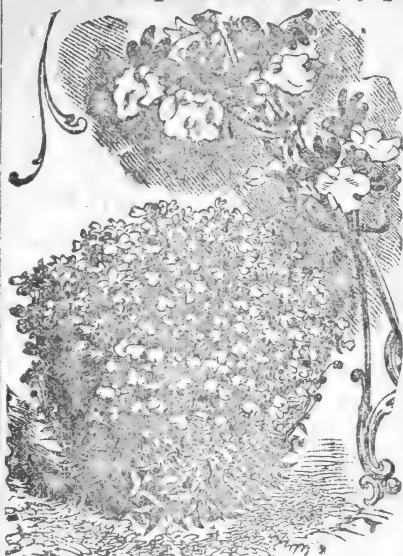

Azorica, annual, blue and white, each.....	5
The colors mixed, 4 pkts. 10 cts., 1 pkt.	3

Robusta grandiflora, many colors.....	5

MYOSOTIS.

Nemesias--New and Old.

Complete Mixture, 4 packets 10 cents, 1 packet 3 cents.

NEMESIA FLORIBUNDA COMPACTA.

The Nemesias are very pretty, free-blooming annuals, and are of easy culture. The plants grow a foot high, are compact, and keep in bloom for several weeks. The older Nemesias are varieties of *N. floribunda*, found on the Cape of Good Hope. *N. strumosa* is from South Africa, and *N. strumosa compacta* is a hybrid, and has the hardy character of *N. floribunda*, with the large, showy flowers of *N. strumosa*. I offer a fine mixture of all these fine Nemesias, 4 packets 10 cents, 1 packet 3 cents.

Floribunda compacta alba.....	5
Compacta bicolor, blue and white.....	5
Compacta cœrulea, blue.....	5
Strumosa Suttoni, new, large-flowered, mixed.....	5
Strumosa nana compacta, new hybrids, varieties mixed; 4 packets 10 cents, 1 packet.....	3
All varieties mixed, 4 packets 10 cents, 1 packet.....	3

NEMESIA STRUMOSA COMPACTA.

Messrs. Sutton and Sons, who originated the New Hybrid varieties received the following letter from one of their patrons, who grew a bed of the New Nemesias: "I planted a round bed 14 feet in diameter, with the four colors of Nemesis, and it has been splendid. Everyone who saw it asked what it was. Of all the annuals I have grown, this tops the lot.—E. Tunbridge."

Nicotiana.

Complete mixture, 4 packets 10 cents, 1 packet 3 cts.

The Nicotianas are valuable for both foliage and bloom, and are of the easiest culture. *N. affinis* grows three feet high, and has deliciously scented flowers which open in the evening. It should be in every garden. *N. colossea* has immense leaves, and appears well as an isolated specimen. All are readily started from seeds.

Acuminata, white, fragrant, pretty.....	3
Atropurpurea grandiflora.....	3
Colossea, large-leaved.....	5
Affinis, white, fragrant, very free-blooming, see engraving.....	3
Macrophylla gigantea, giant-leaved.....	5
Suaveolens, white, fragrant.....	5
Sylvestris, drooping white flowers, tall, makes a fine bed.....	5
Tobaccum, fol. var., the variegated-leaved Tobacco.....	5

Mr. Park:—*Nicotiana affinis* is a favorite of mine. I had about a dozen large plants last summer. The flowers are large, star-shaped, open about four o'clock in the afternoon, and remain open till nine o'clock the next day. They are very fragrant, and make a beautiful appearance at night. I have had a great many people visit my gardens in the evening to see the flowers, and everybody was more than pleased with them.—Mrs. F. C. Farrington, Essex Co., Mass.

NICOTIANA AFFINIS.

<i>Nemophila</i> , hardy annuals a foot high; flowers white, red and blue, often spotted; sow in spring or fall; mixed, 4 packets 10 cents, 1 packet.....	3
<i>Nigella damascena</i> , growing a foot high, bearing double white and blue flowers; known as Love in a Mist; mixed, 4 pkts. 10 cts., 1 pkt. 3	3
<i>Nivenbergia gracilis</i> , a profuse-blooming plant, blooming in winter in pots when sown early in spring; lilac.....	3

<i>Nolana</i> , a little trailing plant with blue and white flowers; fine for pots or baskets; mixed colors.....	3
<i>Nycterinia capensis</i> , white, very fragrant.....	5
<i>Selaginoides</i> , lilac, graceful.....	3
<i>Oxalis</i> , valuable plants for pots and baskets, and useful in bedding. Floribunda, mixed; Rosea, mixed; Sensitiva, white-leaved; Tropaeoloides, brown foliage, yellow bloom, for beds; each.....	5
All kinds mixed, 4 packets 10 cents, 1 packet.....	3

You Never Regret Buying Park's Seeds.

Price and Quality are always right.

Mr. Park:—I regret I did not have your Catalogue earlier, for I sent off a large order before, paying from ten to twenty cents per packet for seeds that you offer for three cents. However, I find in your list some I want, and enclose my order for them.—Mrs. Lillie Meas, Wash. Co., Pa., Mar. 5, 1901.

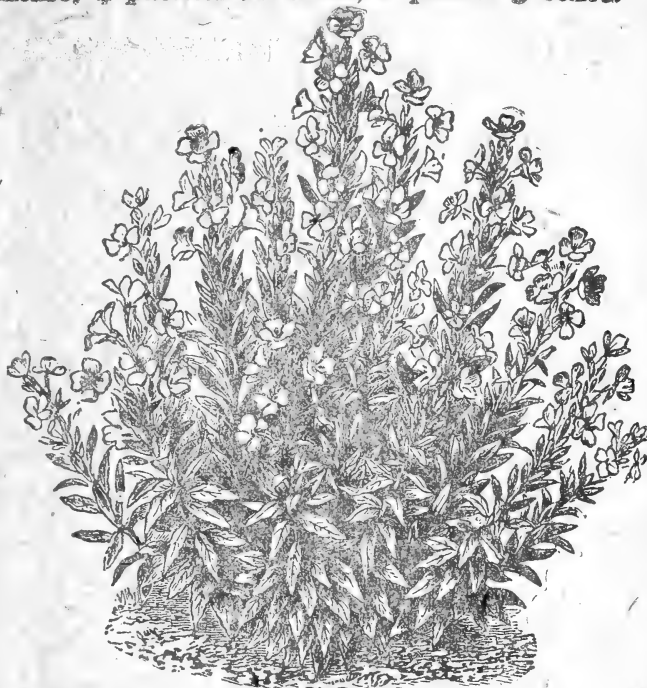

Oenothera---Evening Primrose.

Complete Special mixture, 4 packets 10 cents, 1 packet 3 cents.

Primrose Yellow is a lovely color, and in the flowers of this genus we can observe the color in its purity. The flowers are cup-shaped, freely produced, fragrant, and always admired. The plants come readily from seeds, and grow well in any sunny place.

Johnsonii, an annual of vigorous growth, four feet high, blooming freely within a few weeks after sowing; flowers half an inch in diameter, and clear yellow. (See engraving) 4 pkts 10c, 1 pkt 3c
Macrantha, large, golden yellow flowers..... 3
Lamarckiana, tall, fine..... 3
Fraseri, large yellow flowers..... 3
Missouriensis, dwarf 4 pkts 10c, 1 pkt 3c
Taraxacifolia, yellow and white mixed..... 3
 Complete mixture, all sorts, 4 packets 10 cents, 1 packet..... 3

Oenothera Missouriensis.—This has rich golden yellow flowers from four to five inches in diameter, and so freely produced that the plant may be said to cover the ground with tufts of gold. There is no more valuable border flower, and well-placed on rock-work it is a handsome plant, especially when the luxuriant shoots are allowed to hang down.—English Flower Garden.

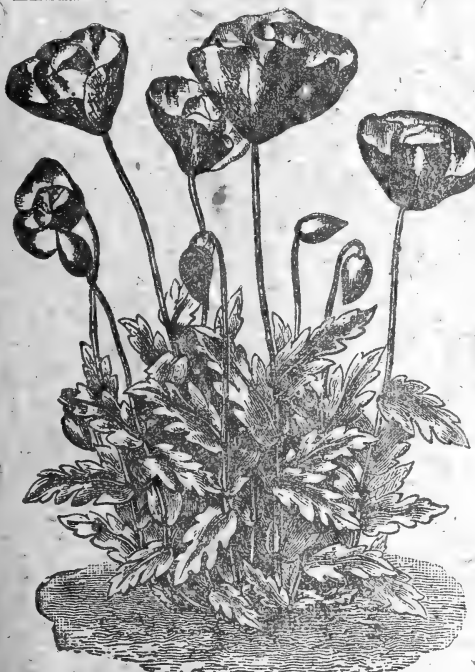

OENOTHERA—EVENING PRIMROSE—JOHNSONII.

Papaver---Annual Poppies.

Complete mixture, 4 pkts. 10c., 1 pkt. 3c.

Nothing is more showy than a mass of the big, silky flowers of the Poppy, and no annual is more easy of culture. Sown in the bed either in fall or spring the plants will soon reveal themselves in colors, and elicit the admiration of all who see them. If cut freely the bloom will be continuous for weeks. The newer varieties are among the most satisfactory of our garden flowers. Don't fail to have a big bed of Poppies the coming season.

PAPAVER GLAUCUM.

Mr. Park:—The past summer my neighbor, Mrs. C. E. Cook, raised from your seeds the largest and brightest bed of Shirley Poppies ever seen in this section. The dainty single blooms of satiny sheen were quilled and fluted, with edges of contrasting color, often mottled and pencilled petals in all the colors of the rainbow, and the most exquisite shades and wonderful diversified markings. Two long beds a foot broad were the wonder and admiration of every passer-by.—Jennie M. Mason, Hancock Co., Me., Nov., 24, 1901.

Arenarium, large scarlet flowers; fine cu. foliage..... 3
Lævigatum, scarlet with black spots..... 3
Glaucum, the Tulip Poppy; dazzling scarlet flowers, not unlike a Tulip in form. (See eng.) 4 pkts 10c, 1 p 3c
Shirley Poppy, single flowers of various colors and variegations; light-colored stamens; one of the finest; 4 packets 10 cents, 1 packet..... 3
Umbrosum, glowing vermillion, very showy..... 3
Murselli fl. pl., various colors in splendid mixture, 4 packets 10 cents, 1 packet..... 3
Carnation-flowered, double, 16 varieties, separate or mixed, 4 packets 10 cents, 1 packet..... 3
Pæony-flowered, double, 18 varieties, separate or mixed, 4 packets 10 cents, 1 packet..... 3
Dwarf Carnation-flowered, mixed..... 3
Dwarf Pæony-flowered, mixed..... 3
Dwarf Ranunculus-flowered, mixed..... 3
 Complete special mixture of all sorts and colors, 4 packets 10 cents, 1 packet..... 3

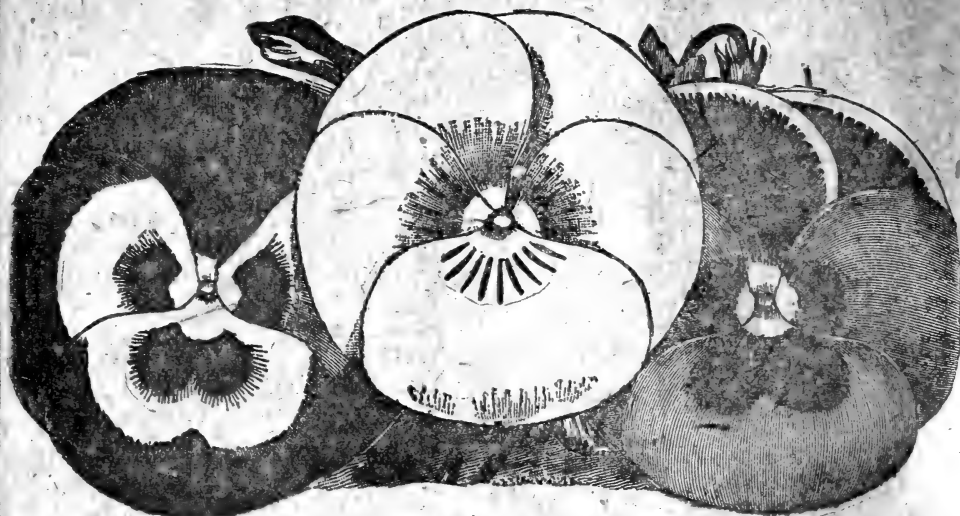

Mr. Park:—Your Shirley Poppies sown either in late fall or as early as April, in this State, in a rich, moist clay soil, in open sun, gives us flowers wondrous in size and superb in coloring. Nothing beneath this sun returns so much beauty for the care given them.—Pauline D. Cook, Worcester Co., Mass., Nov. 7, 1901.

Perilla, annual foliage plants, a foot high, red, fluted and fringed foliage; mixed..... 3

Phacelia, handsome blue-flowered annuals; 1 ft.; showy, of easy culture; good for beds; oz. 10 cts. 3

Roemer's Giant Prize Pansies.

Complete mixture, 4 packets 10 cents, 1 packet 3 cents.

ROEMER'S GIANT PRIZE PANSIES.

The Pansy is probably the most popular flower in cultivation. Everybody admires the flowers, and everybody who has a little space for flowers wants some plants. They grow in any moist, shady soil, and the bright-colored, delicate-textured flowers are borne from early in spring till the snows of winter come, and they may often be dug out fresh and beautiful from beneath their covering of snow in February. I have tried the seeds of many Pansy specialists, as I wish to serve my patrons with the best to be obtained, and I find there are none better than Roemer's Giant Prize Pansies. The plants of this strain are strong and sturdy, have robust foliage, are very free-blooming, and if not allowed to form seeds will bloom continuously. The flowers are of enormous size, plain or ruffled, graceful in form, rich in colors and variegations, mostly fragrant, and exceedingly attractive in every way. They are truly perfection. If you want prize-winning Pansies, get Roemer's Giant Prize. They will not disappoint you.

Only 25 cents for 12 packets of Roemer's Giant Prize Pansies—one packet of each of the following:

- White in variety**, embracing pure white, white with eye, white slightly shaded and tinted, white with spots, etc., 4 pkts. 10 cents, 1 pkt. 3
- Red in variety**, embracing bright red, rosy red, rich scarlet, and red with tints and shadings, etc., 4 packets 10 cents, 1 packet. 3
- Blue in variety**, embracing dark blue, dark violet, rich purple, and blue margined and shaded and blotched, 4 packets 10 cents, 1 packet. 3
- Black in variety**, embracing coal black, black blue, dark violet blue, jet black, purplish black, 4 packets 10 cents, 1 packet. 3
- Yellow in variety**, embracing rich pure yellow, golden yellow, yellow with eye, yellow with spots, yellow shaded, 4 pkts. 10 cts., 1 pkt. 3
- Striped and Flaked**, embracing a great variety of colors, all distinctly striped, flaked and splashed, 4 packets 10 cents, 1 packet. 3

- Blotched and Spotted**, embracing pure ground colors, with blotches and spots showing in peculiar and striking contrast; marvelous in size, form and odd markings; 4 pkts. 10 cts., 1 pkt. 3
- Shaded and Margined**, embracing all of the leading colors margined and shaded and rayed in superb and charming contrast; many light and beautiful tints as well as deeper and richer shades; 4 packets 10 cents, 1 packet. 3
- Azure in variety**, embracing lovely new shades of light blue, azure, ultramarine, and lavender blue, some strikingly marked and tinted; 4 packets 10 cents, 1 packet. 3
- Mixed Colors**, embracing a variety of superb shades and markings not included in above offerings, as plain and fancy faces of orange, bronze, peacock, lilac, violet, etc., many rare varieties mixed; 4 packets 10 cents, 1 packet. 3

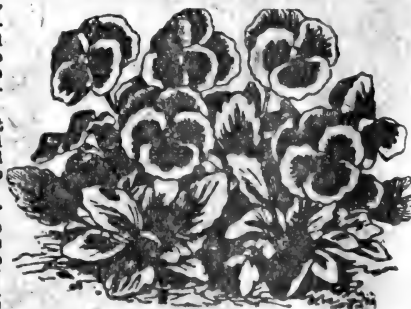

Complete mixture of all shades, colors and markings, carefully prepared, 4 packets 10 cents, 1 packet 3 cents.

Mr. Park:—From one package of Roemer's Giant Pansy seed, I had the largest and showiest bed of Pansies in our neighborhood. I planted in boxes in the house, early in April and transplanted to the garden later. The blossoms were very large and showy, embracing so many different shades and colors. We picked quantities every morning, sharing with our less fortunate neighbors.—Mrs. J. F. Brooks, Kent Co., Mich., Dec. 11.

Mr. Park:—It is said Pansies do not thrive in the South, but my plants from your seeds sown in the spring, did well, planted on the east side of the house. They were beautiful, a joy all summer, and still in bloom. I advise my Southern sisters to grow your Pansies.—Mrs. J. S. Conrad, Marshall Co., Tenn.

Dear Mr. Park:—In August, 1899, I bought of you ten packets of Roemer's Giant Prize Pansy seeds, and in November, the same year, had Pansies in bloom. Later I covered the plants with evergreen boughs, and at Christmas picked a dozen fine blooms. In March I removed the covering, and found lots of buds and blooms, and by April 1st the bed was a mass of flowers. Everybody who saw them wanted to buy some plants, and I sold about \$5.00 worth at 25 cents per dozen, and had three dozens left for myself. Everybody admired and praised my bed of Pansies. Now, Mr. Park, I enclose 25 cents for 25 packets more of Roemer's Pansies.—W. D. Smith, Union Co., Ind., Nov. 10, 1901.

Dear Mr. Park:—I have tried a good many different kinds of Pansies, but for sturdy growth, continuous bloom, lovely flowers and fine markings, Roemer's surpass any other in our locality.—Mrs. Hetrick, Bed. Co., Pa.

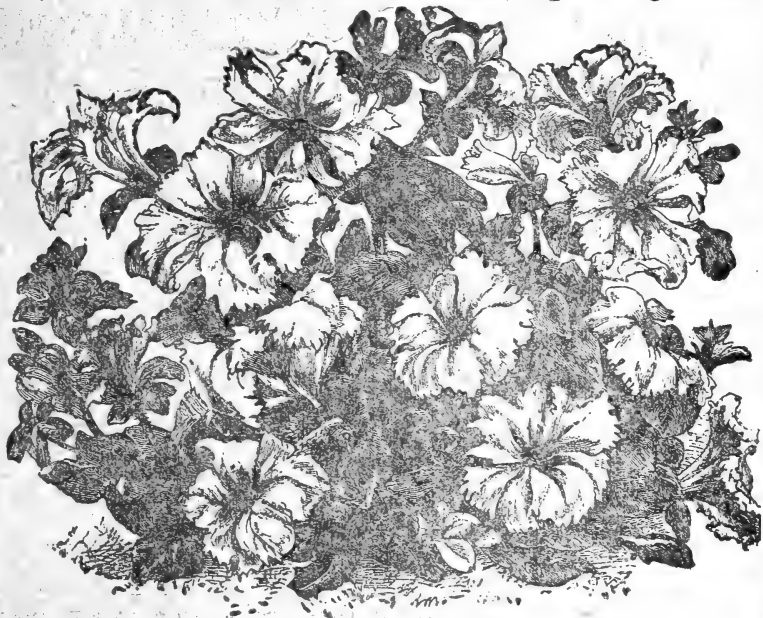

PANSY PLANT.

Single and Double Petunias.

Special mixture, all varieties, 4 packets 10 cents, 1 packet 3 cents.

The Petunia is the flower for the people. The plants are easily started from seeds, and once started will take care of themselves, blooming freely and continuously throughout the season. The flowers are large and showy, of many colors and variegations, graceful in form and delightfully fragrant. Set a foot apart a bed of the plants is glorious, and defies storm and drought, ever bright and attractive. If

LARGE-FLOWERED SINGLE FRINGED PETUNIA.

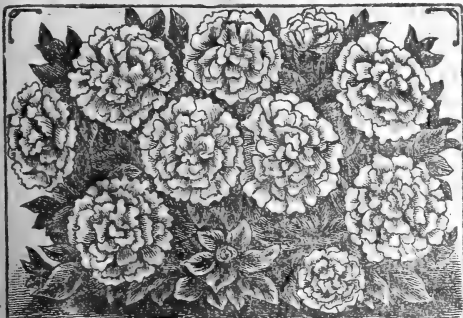

Grown in pots they are fine window plants for winter-blooming. They like a south window.

Large-flowered Single Petunias.—These are of enormous size, with frilled and fluted, and some with fringed margin, solid colors, veined and variegated, tined and blotched; handsome.

NOTE.—All of my seeds of Single and Double Large-flowered Petunias were saved only from selected pot plants, and from flowers artificially fecundated. They are truly "ruffled giants," and their glowing colors and odd markings are wonderful. They are very superior and very fine.

Choice Hybrid Bedding Petunias.—These are exceedingly free-blooming. The plants branch, and soon cover the bed with rich, fragrant flowers, continuing so throughout the season, if not exhausted seeding. The flowers are not large, but show great diversity in colors, and elegant contrast in variegation. They are among the most useful and beautiful of our bedding annuals.

DWARF EDGING DOUBLE PETUNIA.

South side of the house, and oh! such beauties! K. D. Harnel, Richland Co., Illinois.

Mr. Park.—I think every seed of the packet of Petunias came up, and I had three double, one single fringed, with yellow throat, and a large purple one, also a large white one. I think the purple the largest Petunia I ever raised from seeds. They were in bloom constantly throughout the summer, and some which were left out as late as Nov. 1. I have six lovely ones for my window.—Mrs. Geo. W. Colman, Essex Co., Mass.

Mr. Park.—I wish all flower-lovers could see the beautiful Double Fringed Petunia blooming in my window. You said "not all plants will produce double blossoms," but a good proportion of them did. They made a grand show through the summer, and when cold weather came I could not resist taking up one of the handsomest ones and bringing it into the house, although my space for plants is quite limited.—Mrs. F. E. Mann, Rice Co., Kas.

Mr. Park.—Of your Fringed Petunias nearly every seed came up. I transplanted in May to a bed on the Equal to Orchids, and continued blooming till frost.—Mrs.

Phlox Drummondii.

Complete Special mixture, 4 packets 10 cents, 1 packet 3 cents.

NEW HORTENSIAEFLOXA PHLOX.

Chamois rose.....	5	Rose, carmine eye.....	5	Triumph.....	5

Cuspidate and Fringed varieties in special mixture, 4 packets 10 cents, 1 packet.....	3				

NOTE.—The New Dwarf Phloxes are charming for pots or window boxes, the little branching plants appearing as balls of rich color. All of my seeds of Phlox are of finest quality, and the mixture excellent.

Mr. Park:—Your Phlox Drummondii well repays for the little care necessary to bestow upon it. The wide range of shades and variegations of coloring makes it a very desirable flower.—Mrs. B. F. Snyder, Logan Co., O.

Mr. Park:—The first flower seeds I ever purchased were from you when I was a young girl. Among them was Phlox Drummondii, and they were just the sweetest flowers I ever saw. There were all colors of them. Everyone who saw them admired them. I find all your seeds to be good, fresh, and true to name.—Mrs. Sallie F. Bowman, Madison Co., Tenn., Nov. 22, 1901.

Mr. Park:—I had, this summer, from your seeds, one of the most beautiful beds of Phlox Drummondii I ever saw anywhere. The bright shades of color were wonderful! I counted over thirty different varieties. Many persons stopped to admire them. I picked many bouquets and kept them in the house. All summer they have been a perfect delight to me.—A. J. Cook, Kent Co., R. 1., Nov. 25, 1901.

Gloxinia-flowered Pentstemons.

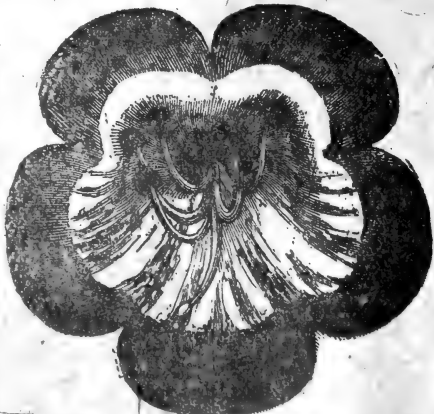

Complete mixture, all colors and shades, 4 pkts 10c, 1 pkt 3.

The new large-flowered hybrid Pentstemons are fine garden flowers. They grow two feet high, branch, and make showy, handsome plants, which bloom throughout the autumn. The flowers are not unlike Gloxinias in form, and show many shades and markings. They are of easy culture, and generally admired. Set eight or ten inches apart in a sunny bed, they make a fine display. Useful also for a low hedge or screen.

Dark Red and Scarlet shades, mixed.....	5
White and light shades, mixed.....	5
Blue and Violet shades, mixed.....	5

Complete mixture, all colors and shades, 4 pkts 10c, 1 pkt 3

Mr. Park:—Last spring I got a packet of your Gloxinia-flowered Pentstemons. I had never seen the flower before. The seeds came up nicely, and by the last of August I had one of the plants in bloom. As they are perennials I did not expect them to bloom this year. The flowers are very pretty.—Mrs. J. C. Budwig, Wayne Co., Mich.

GLOXINIA-FLOWERED PENTSTEMON.

<i>Palafoxia</i> Hookeriana, annual; rose bloom.....	3	<i>Podolepis</i> , pretty composite annual, a foot high, with white, rose and yellow flowers.....	3
<i>Physalis</i> Francheti, a handsome herbaceous perennial bearing wreathes of edible fruit with vermillion balloon-like covering, 4 pkts 10c, 1 pkt.....	3	<i>Pyrethrum</i> , Golden Feather, golden foliage.....	3
Aikekengi, smaller than the above.....	5	Selaginoides, yellow, serrated foliage.....	3
Both varieties in mixture, 4 pkts 10c, 1 pkt.....	3	Golden Gem, double white flowers.....	3
		All varieties mixed, 4 packets 10c, 1 packet.....	3

Polygonum Orientale.

Complete mixture, tall and dwarf, 4 pkts. 10 cents. 1 pkt. 3 cents.

If you want a graceful and showy autumn bed sow seeds of *Polygonum* either in the fall or early spring. Use the old-fashioned tall varieties for the center, and the new Multiflowered sorts for the margin. The plants are of the easiest culture, and a group of them in full bloom will surprise you with its showy display. Fine mixture.

New Dwarf Multiflowered, 3 ft. high; carmine flower's	3	Oriente, old-fashioned red, 8 feet high; sow early	3
New Dwarf Multiflowered, white, very floriferous	3	New Variegated-leaved, green and white, red bloom	3
3 feet high.....	3	All varieties mixed, 4 packets 10 cents, 1 packet.....	3

Portulaca, Single and Double.

Complete mixture, all colors, 4 packets 10 cents, 1 packet 3 cents.

There are few brighter or prettier flowers than those of *Portulaca*, either single or double. The flowers are cup-shaped, large and showy, of all colors from white to deep crimson, also shades of yellow, and some striped and blotched. The plants are succulent, low and spreading, like a funny, sandy bed, and are continuously in bud and bloom. I offer seeds of the large-flowered single and double varieties, all of the finest quality, and my mixtures are specially prepared. They are very showy.

LARGE-FLOWERED SINGLE AND DOUBLE PORTULACA

White, striped.....	3	Golden Yellow.....	3	White.....	3
Bronze.....	3	Rose, striped red	3	Straw color.....	3
Crimson.....	3	Scarlet.....	3	Clear rose.....	3

Large-flowered Single *Portulaca*, all colors in splendid mixture, 4 packets 10 cents, 1 packet..... 3

Large-flowered Double *Portulaca*, all colors in splendid mixture, 4 packets 10 cents, 1 packet..... 3

Large-flowered *Portulaca*, single and double all in splendid mixture, 4 packets 10 cents, 1 packet..... 3

When ordering colors state whether you wish single or double.

LARGE-FLOWERED PORTULACA.

Rudbeckia Bicolor Superba.

4 packets 10 cents, 1 packet 3 cents.

A beautiful composite a foot high, bearing golden yellow flowers with showy dark center. Grows quickly, and blooms early and abundantly. 4 packets 10 cents, 1 packet 3 cents.

Ricinus.

Special mixture, 4 packets 10 cents, 1 packet 3 cents.

Showy foliage plants, known as Castor Bean. As easily grown as Corn. Very showy in a group, the taller in the center, and the dwarf sorts around. Fine for a screen.

Borboniensis, 15 feet high.....	3	Sanguineus, red, 8 feet high.....	3
Gibsoni mirabilis, red, dwarf, compact, fine border, 3 feet high.....	3	Zanzibariensis, separate or mix., each	3
One pkt. of each variety (4 pkts.).....	10	Special mixture of Ricinus, 4 packets 10 cents, 1 packet.....	3

Mr. Park:—One of the *Ricinus* plants from your mixed packet of seeds grew several feet high, and was a fine garden specimen. Another was a dwarf, so I potted it and it is now a pretty plant in my window, just beginning to put forth its odd blossoms.—Mrs. S. Rok, Sullivan Co., Pa.

RICINUS.

Sanvitalia procumbens fl. pl. compacta, a fine dwarf, yellow-flowered edging; 4 pkts. 10 cts., 1 pkt. 3

Saponaria Ocymoides Splendens.

Price, 4 packets 10 cents, 1 packet 3 cents.

Here is one of the most beautiful of hardy perennials, though but little known by the masses of people. Unless started very early the plants will not bloom the first season, but when once established they will never fail to delight you about May 30th with the most gorgeous display of delicate little flowers imaginable. It trails, and bears its lovely pink bloom in such profusion that it appears as a bright carpet, entirely hiding the foliage. Fine for a garden bed or for the cemetery. I offer only the improved variety. You will never regret spending a few cents for seeds of this superb flower.

Saponaria Multiflora—I can also supply seeds of this fine dwarf annual, red, white and scarlet, separate or mixed: 4 packets 10 cents, 1 packet 3 cents. All of these Saponarias do well sown in early autumn, as well as in spring.

Mr. Park:—From the packet of your Saponaria ocymoides splendens received several years ago I raised two plants, each of which now covers a half yard of ground, and every spring is a mass of the daintiest pink blooms, while the foliage is thrifty till frost comes. It is perfectly hardy, and I know of nothing nicer for the cemetery.—K. E. Harvey, Mifflin Co., Pa., Nov. 30, 1901.

Mr. Park:—My Saponaria ocymoides splendens which I raised from the seeds you sent me covers the ground in early spring with a carpet of pink. I consider it a valuable addition to my perennials.—Lucy T. Hinds, Kennebec Co., Me., Nov. 22, 1901.

SAPONARIA OCYMOIDES SPLENDENS.

Large-flowered Salpiglossis.

Complete Special Mixture, 4 packets 10 cents, 1 packet 3 cents.

Only those who have seen the flowers of the large-flowered varieties of Salpiglossis have any conception of their beauty. They are not unlike a large Bedding Petunia in form, but with a soft, rich, velvety texture mostly penciled and marked in the most striking and beautiful manner. The plants are of easy culture, bloom early and continuously, and are showy in a group. If better known this splendid annual would be very popular. Try it.

White with yellow.....	5	Crimson, rich.....	5	Black, very dark.....	6
Scarlet, very bright.....	5	Royal, purple.....	5	Black, veined gold.....	5
Purple with carmine.....	5	Rose, fine shade.....	5	Violet, yellow veined.....	5
Sulphur, lovely.....	5	Violet, fine.....	5	Rose, gold-veined.....	5

All the above in splendid mixture, colors carefully proportioned, 4 pkts 10c, 1 pkt 3
 New Superbissima or Emperor Salpiglossis, very large flowers, 4 pkts 10c, 1 pkt 3
 Dwarf Salpiglossis, mixed colors, 4 packets 10 cents, 1 packet 3

Mr. Park:—I had fine flowers of many colors from a packet of new Giant Salpiglossis. The veined and velvety colors ranged from white to almost black.—Mrs. Harris, Ingham Co., Mich.

SALPIGLOSSIS.

Salvias in Variety.

Complete Special mixture, all sorts, 4 packets 10 cents, 1 pkt. 3 cents.

Salvias are beautiful plants of the Mint family, blooming freely during summer and autumn. The prevailing shades are blue and scarlet. Fine for beds and borders, and some do well as pot plants. Easily grown from seeds.

Carduacea, blue, vermil. anthers	3	Horminum (Olary), mixed colors	3
Coccinea splendens, scarlet, fine	3	Patens, blue flowers; tuberous...	5
Roemeriana, scarlet, pretty.....	5	Farinacea, bright blue.....	3
Large Scarlet, fine for beds.....	3	Giant Scarlet, very large flowers	5
Early Scarlet, large-flowered....	5	Silver Spot, spotted foliage.....	5

Complete special mixture, 4 packets 10 cents, 1 packet 3

Mr. Park:—My sister got a package of your Salvia, and had a big bed of plants which was lovely.—Mrs. Bourne, Franklin Co., Mass.

Mr. Park:—I grew a Salvia splendens from your seeds last year. It produced full spikes of scarlet flowers.—Mrs. W. Barnes, Doug. Co., Kas.

SALVIA SPLENDENS.

Silene, Compact Varieties.

Splendid Mixture, 4 packets 10 cents, 1 packet 3 cents.

The compact varieties of Silene are charming hardy annuals for beds and edgings. Seeds may be sown either in fall or spring. The flowers are mostly pink and white, and produced so abundantly as to hide the foliage.

Rose Queen, fine rose-colored flowers	3	Snow King, lovely flowers, white	3
Bonnetti, double, purple, fine.....	3	Compact sorts mixed, 4 pkts 10c, 1 pkt 3	

Scabiosa, New Large-flowering.

Finest Mixture, all colors, 4 packets 10 cents, 1 packet 3 cents.

There are few flower cultivators who do not know and love the old-fashioned Scabiosa or Mourning Bride. The New Mammoth, double-flowered varieties I offer, however, are far superior, the flowers being nine inches in circumference, double, ball-like in form, and showing a great variety of rich colors. The plants come readily from seeds, and once grown they will reproduce themselves from self-sown seeds. They are showy in the garden, and the long-stemmed flowers are charming for bouquets. This new race of flowers should be in every garden. By all means add it to your seed list. You will never regret it.

White and Lilac	5	White	5
Dark Purple	5	Flesh	5

 Dwarf Double, compact sorts, a foot high, bearing large, double flowers of many colors, 4 pkts. 10 cents, 1 packet 3 cts.

Mr. Park:—If your patrons will try a package of your Large-flowered Double Scabiosa they will be more than pleased. I had a bed this summer, and they were beautiful—white, pink and two shades of red, large blossoms until heavy frosts came.—Mrs. Eliza Titus, Monroe Co., Mich.

SCABIOSA—NEW LARGE-FLOWERING.

SENECIO ELEGANS.

Senecio—New Pompon.

Special Mixture, 4 pkts. 10c., 1 pkt. 3c.

I offer new varieties of Senecio elegans, with elegant pompon flowers. Grow a foot high, branch freely, and produce masses of lovely double flowers of many fine colors. They are splendid for beds, and the flowers are useful for bouquets. My seeds of these are of the finest quality, and plants raised from them will yield the best double flowers. They will certainly please those who try them.

Cream	5	Purple	5
Flesh	5	Red	5

All colors in special mixture, 4 pkts. 10c., 1 pkt. 3c.

Senecio Elegans.—This beautiful hardy annual from the Cape of Good Hope has for generations been a favorite garden plant. The double-flowered varieties are the showiest and most desirable. The plants grow best in a rich, sandy loam, and bloom from July to October, according to time of sowing. They look best in good-sized masses.—The English Flower Garden.

Schizopetalum Walkeri, white, fragrant, pretty	5
Sedum ceruleum, blue Stone Crop; dwarf, free-blooming plants for rockeries or stony beds.	5
Shortia Californica, 1/2 ft., Daisy-like yellow bloom	5

Solanum, plants with ornamental foliage and showy fruit; special mixture, 4 pkts. 10c., 1 pkt. 3c.	3
Sphenogyne speciosa, a foot high; flowers daisy-like, yellow with brown	5

Schizanthus--Butterfly Flower.

Complete Mixture, 4 packets 10 cents, 1 packet 3 cents.

PARK'S SCHIZANTHUS RETUSUS.

Mr. Park:—Your Schizanthus or Butterfly Flower is a beautiful plant for the window garden. Both foliage and flowers are delicate and beautiful. The plants bloom continuously all winter in-doors, and planted out will bloom all summer, resisting drouth. The flowers are lovely for cut flowers, last long, and are so delicate. They can not help but please everyone. There are many colors. I have several colors in one pot, and when in bloom look as though there were many colored blooms on one plant. Seeds are very cheap and all lovers of delicate and beautiful flowers should try them.—Mrs. Jennie Dewese, Morgan Co., Ill., Nov. 16, 1901.

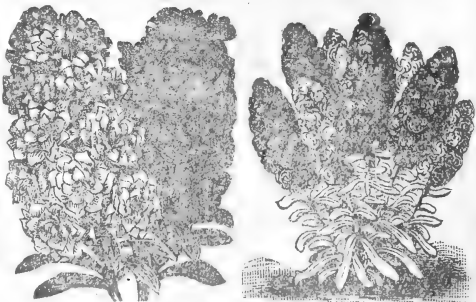

Very beautiful, everblooming half-hardy annuals, alike valuable for beds in the garden or pots in the house. The plants are easily started, begin to bloom early, produce their flowers in wonderful profusion, and are showy for a long time. The flowers are rich and graceful, borne upon slender stems, and at a distance appear as if floating in the air, hence are often called Butterfly Flowers. *S. retusus*, shown in the engraving, has larger flowers than the others, and is fine for the window as well as the garden. Started in mid-summer the plants bloom well in a sunny room in winter.

Stock--Ten Weeks.

Complete Mixture, 4 packets 10 cents, 1 packet 3 cents.

The Ten Weeks Stock possesses all the elements of a perfect flowering annual. The plants are easily grown, will thrive in any good garden bed, begin blooming early, and continue to make a fine display throughout the season. The flowers are large and showy, double, borne in spikes, are of all shades from white to rich crimson, also shades of purple, brown, and ash, and all deliciously scented. The plants bloom well in pots, as well as in garden beds, and are fine for the window. My seeds are from selected pot plants. There are none better.

TEN WEEKS STOCK

Dwarf German, a handsome variety, compact, and bearing flowers of many rich colors, 4 pkts. 10 cts., 1 pkt. 3	
Dwarf Large-flowered, very superior sort; flowers double, early and free-blooming; 4 packets 10 cents, 1 pkt. 3	
Giant Perfection, grows 2½ feet high, bearing large spikes of splendid flowers; good for beds, mixed colors... 5	
Victoria Bouquet, a favorite variety; very fine double flowers in large spikes; mixed colors..... 5	
Wallflower-leaved, large double flowers of many colors; mixed..... 5	
Globe Pyramidal, very fine variety of pyramidal growth; large and handsome flowers; mixed colors..... 5	
Excelsior Perpetual, one of the finest, beginning to bloom very early, and keeping in bloom perpetually for many weeks; white, rose, crimson, violet, yellow, pink, flesh, blue and brown, separate, each, per packet 5	
Special mixture of all colors, 4 packets 10 cents, 1 packet..... 3	
Princess Alice, bears splendid large spikes of white flowers; a beautiful Stock..... 5	
Giant Perpetual White, grows 2½ feet high, bearing one enormous spike of large, double, pure white flowers 5	
Dwarf Queen, grows a foot high, producing spikes of intense blood-red, double flowers; fine for pots..... 5	
Sky Blue, a fine blue variety of pyramidal growth, and Snowflake, a dwarf white Stock, for pots, each..... 5	
Ten Weeks Stock, all varieties, shades and colors, in splendid mixture, 4 packets 10 cents, 1 packet..... 3	

Mr. Park:—I had a plant of Ten Weeks Stock in the house last winter; in the spring bedded it out. It bloomed all summer, and was a mass of flowers in autumn. I potted it, and it is now doing finely.—Mrs. M. N. Bernham, Charlevoix Co., Mich., Nov. 7, 1901.

Mr. Park:—The seeds of everblooming Ten Weeks Stock I received from you last spring grew nicely, and I had such lovely flowers. They lasted all summer, until hard frosts.—Mrs. S. E. Robo, Fresno Co., Cal., Nov. 14,

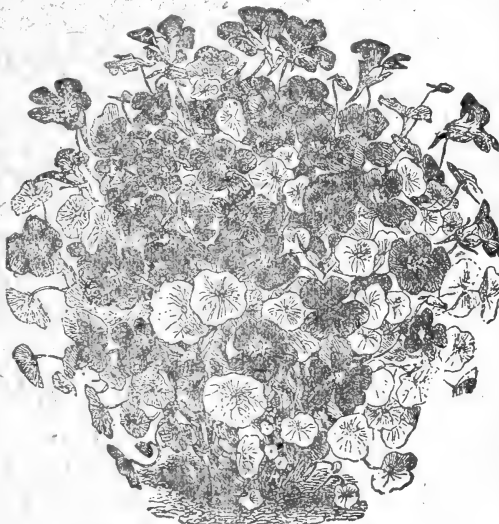

Tropæolum---Tom Thumb.

Dwarf Nasturtium, special mixture, 4 pkts. 10 cents, 1 pkt. 3 cents.

There are few brighter or more satisfactory annuals for beds or pots than the Dwarf Nasturtiums. Anyone can grow the plants from seeds, and they thrive in any soil or situation. They grow a foot high, and are a mass of splendid flowers throughout the summer and autumn, especially when kept from seeding. White, scarlet, crimson, yellow and spotted, are the best for bedding, and I can supply these separately for that purpose at 15 cents per ounce. My special mixture contains all the colors, carefully proportioned, and the plants from it make a fine bed.

Special mixture, oz. 15 cents, 4 pkts. 10c., 1 pkt. 3			

Mr. Park:—For a variety of bright colors nothing can exceed your Nasturtiums. My plants from the seeds bought of you blossomed till frost, and were very showy and beautiful.—Mrs. Ruth A. Day, Jefferson Co., Ala., Nov. 29, 1901.

TROPÆOLUM—DWARF NASTURTIUM.

Valerian---Fragrant.

Special mixture, 4 pkts. 10 cents, 1 pkt. 3 cents.

Valerian is a lovely perennial that blooms the first season. The plants grow a foot high, and bear small, pretty flowers in large clusters, as shown in the illustration. They are showy in the garden and fine for bouquets, being delicate, graceful and sweet scented. Known as Garden Heliotrope. They are very fine.

White.....	5	Scarlet.....	5	Red.....	5	Rose.....	5
Special mixture, all sorts, 4 packets 10 cents, 1 packet..... 3							

Valerian.—This is a handsome hardy border plant from the Mediterranean. It produces stout, erect stems, rather woody at the base, terminated in bold clusters of numerous small flowers. It begins to bloom in June and continues throughout the summer. It requires only ordinary garden soil, and occasional lifting and cutting in. It grows well on the crumbling walls of an old ruin, and is useful for planting on dry rockwork.—English Flower Garden.

FRAGRANT VALERIAN.

Violas---Tufted Pansies.

Special Mixture, 4 packets 10 Cents, 1 packet 3 cents.

The so-called Tufted Pansies are hybrids and varieties of *Viola cornuta*. The plants are as hardy and as easily grown as Pansies, and the flowers are freely and continuously produced throughout the season. They thrive in a moist, and cool, partially shaded place. I have a splendid collection, all with large, showy, fragrant flowers, and fine for bedding. The seeds I offer are of the best quality and very fine.

Dark Blue.....	5	Pure White.....	5
White and blue.....	5	Blue with white.....	5
Light Blue.....	5	Yellow.....	5
Mauve.....	5	Rich Purple.....	5
Special mixture of all the varieties, 4 packets 10 cents, 1 packet..... 3			

Mr. Park:—Your Violas are "Sweeter than all the Roses," and so easy of culture! Just imagine a potful of the plants, covered with 50 large, rich-colored blossoms, and you have some idea of their beauty. They are so fragrant that the entire house is perfumed by them.—Mrs. C. M. Thompson, Osage Co., Kan.

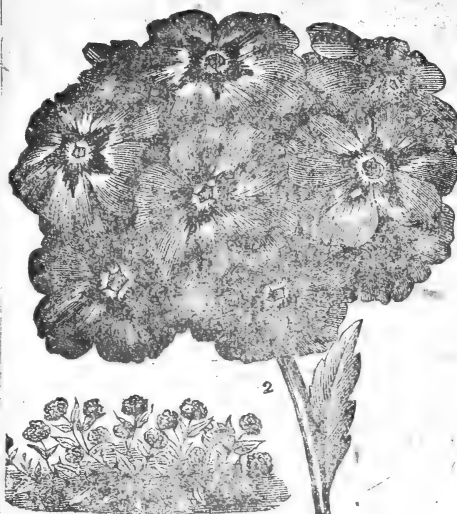

BEDDING VIOLA—TUFTED PANSY.

<i>Ventidium fugas</i> , a neat, free-blooming, trailing plant; flowers yellow, covering the plant.....	5
<i>Veronica</i> , edging plants with spikes of blue and white flowers; mixed.....	5
<i>Viscaria</i> , fine annual for masses; flowers cup-like, bright, showy and beautiful, mixed.....	5

<i>Vinca rosea</i> , lovely pot and bedding plant; Phlox-like flowers; white, rose and eyed; each 5c. m'x'd.....	3
<i>Virginia Stock</i> , pretty, free-blooming annuals; white, crimson and yellow, each 5 cts.; mixed.....	3
<i>Whitlavia</i> gloxinoides, annual, 1 ft.; lovely blue and white bell-flowers; mixed.....	3

Fragrant Verbenas in Variety.

Complete Mixture, 4 packets 10 cents, 1 packet 3 cents.

VERBENA PLANT AND CLUSTER.

Mr. Park:—I sowed a paper of mixed Verbena seeds purchased of you last spring, and used the plants for edgings to my Geranium beds. It is astonishing how they grew, and how soon they began to bloom, and with what persistence they kept it up. I potted a number of them for early spring planting, but those left in the beds are still blooming, and we have had several hard frosts.—John T. Irion, M. D., Henry Co. Tenn., Nov. 18.

New Parisian Wallflower.

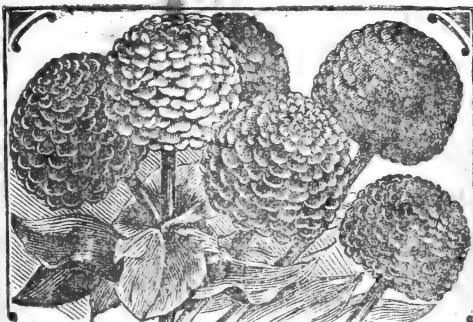

Price, 4 packets 10 cents, 1 packet 3 cents.

The Wallflower is very popular in England, and would be a favorite in America, if the plants would endure our northern winters. The New Early Parisian Wallflower, however, overcomes the barrier by flowering freely the first season from early-sown seeds. Simply start the plants in a window box early in spring, and transplant to a cool, moist garden bed. You will be greeted throughout the autumn with masses of the rich, fragrant clusters. Plants grown in pots will do well in a cool room, blooming freely during the winter. 4 packets 10 cents, 1 packet 3 cents.

Mr. Park:—I have several plants of your Early Parisian Wallflower now in bloom. The old kinds do not bloom till the second year, but these plants are in bloom seven months after sowing. They make a lovely house plant, being very fragrant, and lasting a long time in bloom. The color is a beautiful shade of yellow and dark red.—Mrs. O. A. Graham, Sedgwick Co., Kans., Nov. 25, 1901.

NEW EARLY PARISIAN WALLFLOWER.

NEW DWARF BEDDING ZINNIAS.

New Semi-dwarf Zinnias, white, scarlet, golden yellow, crimson, striped, violet, purple, salmon, each 6
The colors in splendid mixture, 4 pkts. 10c, 1 pkt. 3
New Mammoth Zinnias, separate colors 5
Special mixture, 4 packets 10 cents, 1 packet 3

Mr. Park:—Last year I raised your Zinnias, and was pleased with them. The flowers were the largest I ever saw, and bloomed till killed by a heavy frost. Everybody admired them.—Mrs. G. B. Marcus, Marion Co., O.

The Hybrid Verbenas are among the most beautiful and desirable of flowers. The plants start readily from seeds, come into bloom quickly, and produce their charming, fragrant clusters of bright flowers in abundance all summer, and until after severe frosts. They are gorgeous as bedding and vase plants out-doors, and when grown in pots and placed in a sunny window will bloom satisfactorily in the window during winter. The seeds I offer are very superior, and my mixtures will yield a wonderful variety of colors.

Auriculæiflora, splendid colors with large, showy eyes	5
Coccinea, brilliant scarlet	5
Coerulea, fine blue	5
Defiance, glowing dark scarlet	5
Straita, splendid striped colors	5
Pink, very fine rosy shades	5
Coccinea oculata, scarlet, with eye	5
Black blue, white eye	5
All varieties in splendid mixture, 4 pkts. 10 cts., 1 pkt.	3
Compacta erecta, new dwarf, compact, free-blooming	5
Verbenas, excellent for beds and pots; white, scarlet, eyed, blue, etc., each	5
The colors mixed, 4 packets 10 cents, 1 packet	3

Mammoth-flowered.—Varieties with very large, showy flowers in huge clusters. The plants do not bloom as freely as the other kinds, but the big clusters of bloom are always much admired. White, Scarlet, Purple, Rose and Carmine shades, each 5
All shades in fine mixture, 4 pkts. 10 cts., 1 pkt. 3

Zinnias, Choice Double.

Complete mixture, 4 packets 10 cents, 1 packet 3 cents.

No annual is of easier culture than the Zinnia, and few are more satisfactory than the new double-flowered kinds. The seeds start in three or four days, and the plants show buds when but a few inches high. Throughout the season they grow, bud and bloom, showing rich green foliage and beautiful flowers. For a group the Mammoth Zinnias are fine; for a showy bed the Semi-dwarf varieties are splendid; and for window boxes, or for bouquet flowers, the Lilliput sorts are admirable. My seeds were saved only from selected plants, and can be relied upon to produce the finest and richest flowers.

New Fringed, white-flowered Zinnia, double	5
New Crispa, with wavy petals	5
New Lilliput, scarlet, gold, blue and white, each	5
Mixed colors, 4 packets 10 cents, 1 packet	3
Zinnia, all varieties mixed, 4 packets 10 cts., 1 pkt.	3

Everlastings and Grasses.

Large packet, complete mixture, 10 cents, 3 packets 25 cents.

The Everlastings and Grasses are ornamental in garden beds, and if cut and hung up in a shady place during summer will retain their form and color, and are admirable for winter bouquets. They are all easily started from seeds.

<i>Acerolinum</i> roseum, fl. pl., rose.....	5
Album fl. pl., white.....	5
Both varieties mixed, 4 packets 10 cents, 1 packet 3	3
Pretty, slender plants a foot high, bearing flowers an inch in diameter. Fine for bouquets.	
<i>Anemobium</i> alatum grandiflorum, two feet high, bearing numerous small white flowers. One of our best everlastings.....	3
<i>Gomphrena</i> globosa, crimson.....	5
White, Flesh, Striped and Rose, each.....	5
Tall varieties mixed.....	3
Dwarf varieties, separate or mixed.....	3
Very showy in the garden, and fine for bedding, the dwarf sorts used as edgings. A beautiful everlasting retains its form and color perfectly.	
<i>Helipterum</i> Sanfordii, 1 foot high, with large clusters of golden bloom.....	3
<i>Helichrysum</i> Monstrosum, white, purple, rose, salmon, crimson, each.....	5
All colors mixed, 4 packets 10 cents, 1 packet.....	3
Grows 18 inches high, flowers large, double, rich-colored and showy. A fine everlasting, as well as a good garden flower	
<i>Rhodanthus</i> , a lovely everlasting, either in the garden, or for winter bouquets; flowers white, rose, crimson, etc., mixed.....	5

<i>Gypsophila</i> , neat annual, excellent for bouquets either green or dry; colors rose and white, m'd	3
<i>Xeranthemum</i> , Double, purple, white and rose, separate, each.....	5
Pompon-flowered, purple, white and rose, each.....	5
All varieties in splendid mixture, 4 packets 10 cents, 1 packet.....	3
Very handsome, easily grown annuals, with showy flowers on long stems. Cut when fully developed. One of the best.	
Everlastings in complete mixture, large packets, 10 cents each, 3 packets.....	25

ORNAMENTAL GRASSES.

<i>Agrostis</i> nebulosa.....	3
<i>Avena</i> sterilis (Oats).....	3
<i>Briza</i> maxima.....	3
<i>Coix</i> Lachryma.....	3
<i>Erianthus</i> Ravenna.....	3
<i>Gynierium</i> Argenteum.....	3
<i>Melica</i> ciliata.....	3
<i>Zea Japonica</i> gigantea, the Giant variegata Maize, Ornamental Grasses in complete mixture, 3 packets 25 cents, 1 packet.....	10
Everlastings and Grasses in complete mixture, 3 packets 25 cents, 1 packet.....	10

ORNAMENTAL CLIMBERS.

Complete mixture of all varieties, large packet, 10 cts., 3 pkts. 25 cts.

Ornamental Climbers are useful for covering pillars, trellises and summer-houses with foliage and bloom. Furnish support as soon as the plants show a disposition to climb. Every flower-lover should grow them.

Cardiospermum in Variety.

Special Mixture, 4 packets 10 cents, 1 packet 3 cents.

CARDIOSPERMUM HIRSUM.

Very graceful, rapid-growing vines with clusters of small white flowers, succeeded by inflated balloon-like capsules, from which the name of Balloon Vine is derived. Very fine trellis plants. Grow six feet high. All flower-lovers should give them a trial.

<i>Hirsutum</i> a rare and lovely variety; see engraving.....	5
<i>Halicacabum</i> , the well known sort.....	5
Special mixture, 4 packets 10 cents, 1 packet.....	3

Mr. Park:—Why is so little said about *Cardiospermum* or Balloon Vine? It is a curious, half-hardy, annual climbing plant, and will, with a little attention, cover a considerable space.—C. E. Parnell, Queens Co., N. Y.

Cardiospermum hirsutum is a very beautiful climbing plant. Seeds started in the house and transplanted in May to the open air, will begin to bear elegant clusters of white flowers when a few inches high, and bloom incessantly. Later the whole plant is adorned with charming balloon-like seed-pods.—Italian Florist.

<i>Abobra</i> viridiflora, a neat little perennial plant of the Gourd family.....	3
<i>Centrosema</i> grandiflora, a pretty leguminous vine, 3 feet high; flowers pea-like; very pretty.....	3
<i>Clitorea</i> ternata, a vine growing five feet high, with clusters of bean-like flowers.....	3
<i>Calampelis</i> scabra, a lovely perennial vine; both foliage and flower clusters very handsome.....	8
<i>Coccinea</i> Indica, a rapid-growing vine with bright scarlet fruits.....	3
<i>Cypress</i> Vine, 8 ft. high, pretty foliage; bright star-like flowers. White, rose and scarlet, each.....	5
All colors mixed, 4 packets 10 cents, 1 packet.....	3

<i>Cobaea</i> scandens, grows 30 ft., bearing handsome foliage and large, purple, bell-shaped flowers throughout the season. 4 pkts 10c, 1 pkt 3	
<i>Cobaea</i> , white and <i>Macrostemma</i> each, per packet.....	10
Mr. Park:— <i>Cobaea</i> is my favorite vine. It grows quickly from seeds; is never troubled with insects. Foliage and flower are lovely, fresh till frost.—Mrs. T. Ervine, Calaveras Co., Cal., Dec. 1, 1901.	

COBEEA.

Dolichos---Hyacinth Bean.

Complete Special mixture, 4 packets 10 cents, 1 packet 3 cents.

This is a desirable vine, not only for its numerous clusters of white and purple bloom, but for the showy, Hyacinth-colored bean-pods which succeed the flowers. The plants are as easily grown from seeds as Scarlet Runner, and with the showy flowers and shining purple "beans" are objects of attraction and admiration. They are excellent vines for covering summer-houses, fences or old trees. Easily transplanted. Both seeds and pods are edible.

White..... 5 | Purple..... 5 | Princess Helene..... 5 | Mixed 4 pkts 10c, pkt 3

Mr. Park:—Last March I planted three seeds of Dolichos. The plants proved to be hardy, handsome vines, of rapid, dense growth. They very quickly reached a height of ten or more feet, and covered a space equally wide. Although an annual, on account of rapid growth the plants are useful for covering fences and unsightly places.—Mrs. J. A. R., Santa Clara Co., Cal.

Mr. Park:—Last spring I received a packet of Dolichos. I planted them early in April, near an old fence that I wished to cover up. Now they are still covered with their large sprays of lovely flowers, three or four colors, and bunches of beans in different stages of development. These are the most attractive things in the garden.—L. C. F., Son. Co., Cal., Nov. 30.

Mr. Park:—Last spring I dropped some seeds of Dolichos or Hyacinth bean in a rich bed under my Snowball tree, and the trees are again covered with bloom, but of a different form and color. The glossy purple bean pods, as well as the flowers are showy and handsome.—M. M. Tate,

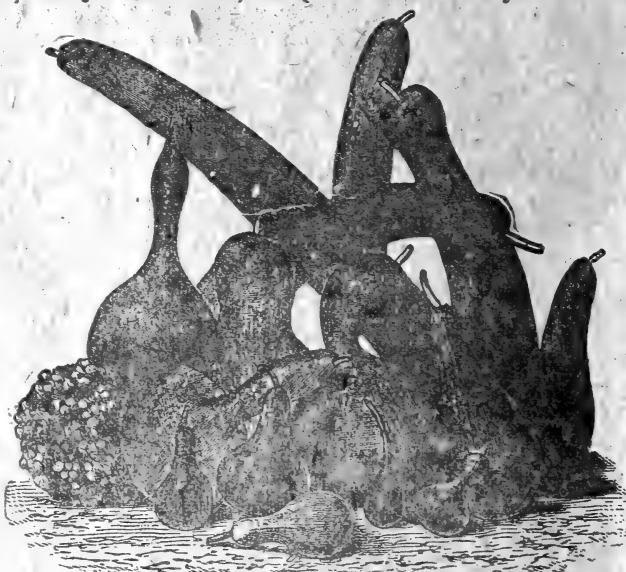

DOLICHOS—HYACINTH BEAN. McDowell Co., N. C., Sept. 22, 1901.

Gourds and Cucumbers in Variety.

Complete special mixture, 4 packets 10 cents, 1 packet 3 cents.

Members of the Gourd family are numerous, and nearly all are interesting in both flowers and fruit. Some are delicate and graceful vines, with neat foliage and pretty little Gourds of various colors, showy on the vine, and prized as winter toys for chil-

dren. Some bear large leaves, golden flowers, and immense Gourds, weighing upwards of 200 pounds, the vines useful to hide unsightly fences or buildings; and the fruit for pies. *Luffa acutangula* is a splendid vine with large, silky golden flowers and long fruits, the network of which is used in scouring or washing. The *Lagenarias* are shaped as dippers, bottles, clubs, etc. The Nest Egg Gourd is pretty as a vine, and the fruits are useful as nest eggs. *Cucumis flexuosus* is the Snake Cucumber, with serpent-like fruits several feet long. *Cyclanthera explodens* and *Bryonopsis laciniosa* are charming vines, rapid in growth, delicate in foliage, and bearing curious and pretty little fruits. All are easily grown from seeds. Do not overlook the Gourds when you make up your order.

ORNAMENTAL GOURDS.

<i>Lagenaria vulgaris</i> , mixed.....	5	<i>Cucumis flex.</i> , snake cucumber....	5	<i>Bryonopsis laciniosa</i>	5
Dipper Gourd.....	5	Hundred weight Gourds, yellow,	5	<i>Cyclanthera explodens</i>	5
Hercules Club.....	5	orange, green, striped, mixed	5	<i>Luffa acutangula</i> , Dish Cloth.....	5
Bottle Gourd.....	5	<i>Tricosanthes</i> , Snake Gourds.....	5	<i>Cucurbita ovifera</i> , Egg Gourd.....	5
Corsica or Dish.....	5	<i>Momordica</i> , mixed.....	5	Angora Gourd.....	5
Sugar Trough.....	5	Turk's Turban, mixed.....	5	Mixed, 4 packets 10 cents, 1 packet 3	

Mr. Park:—For covering unsightly buildings, fences or old stumps nothing can equal Gourds. The most ornamental way to grow them is to purchase a mixed package of the seeds and grow all kinds together. Then when the vines are covered with fruit they form a curious and pleasing contrast. Gourds are useful also, as well as ornamental. The Nest-egg Gourd is useful, especially in winter, as a nest egg, for hens' eggs will freeze, and china eggs often get broken. Again, there is the Dipper Gourd that is useful in numerous ways, and the Sugar Trough Gourd, which holds from three to ten gallons. It makes fine nest boxes, salt receptacles, buckets, etc. In fact, there are no ornamental plants more useful than Gourds.—L. Slotter, Washington Co., O.

Three Fine Vines.—I offer *Luffa*, *Bryonopsis* and *Cyclanthera* in special mixture. They are beautiful, vigorous vines, always admired. The *Luffa* has large black seeds, *Cyclanthera* flat, winged ones. Separate before sowing. This mixture will please every lover of pretty vines. 4 packets 10 cents, 1 packet..... 3

Dear Mr. Park:—Last spring I planted a packet of your *Luffa* seeds in the house in March, and every seed grew. I set the plants by an Apple tree, and they completely covered it. The blossoms were beautiful and fragrant. It was new to everyone, and admired by all.—Mrs. M. S. Newton, Goodhue Co., Minn., Nov. 19, 1901.

Humulus--Variegated Hop.

Price, 4 packets 10 cents, 1 packet 3 cents.

This is an annual from Japan, very rapid in growth, and bearing dense foliage bordered with white. It is one of the most showy of variegated-leaved climbers, and is as easily grown from seeds as a Morning Glory. The seeds can be sown early, where the plants are to stand.

Mr. Park:—I think the Variegated Hop a grand vine. I planted seeds five years ago and have had volunteer plants along my garden palings ever since. I put Asters along the fence, so that makes the leaves appear more white. I have no trouble keeping them where they belong.—Mrs. N. V. Meadows, Butler Co., Iowa, Dec. 14, 1901.

Mr. Park:—The Japanese Hop Vines did especially well for me last year. I had never seen any of the Vines before, and they were new to me. They were beautiful.—Mrs. A. T. Smith, War. Co., N. Y., Nov. 17, 1901.

Humulus Japonicus, or Japanese Hop, is a vigorous climber twelve feet high, and bearing yellowish flowers in July. It is very suitable for covering trellises, or for hiding unsightly objects, especially the variegated form with cream, silver, and green foliage.—Book of Gardening.

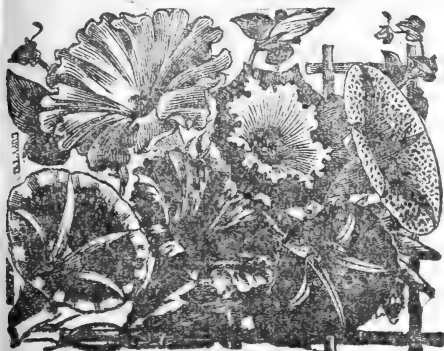

VARIEGATED JAPANESE HOP.

Morning Glories.

Complete mixture, 4 packets 10 cents, 1 packet 3 cents.

The old-fashioned Morning Glory will always retain a prominent place at the country and village homes. It is linked in memory with some of the sweetest of life's associations, and the love we bear toward it will ever be cherished. The new, improved varieties, however, give us larger flowers and a greater range of colors than we knew in bygone years. They are highly recommended.

White.....	3	White striped rose.....	3
White striped violet.....	3	Rose.....	3
Tricolor.....	3	Carmine.....	3
Dark Red.....	3	Scarlet.....	3
Lilac.....	3	Dark Blue.....	3
Light Blue.....	3	Royal Purple.....	3
All varieties, special mixture, 4 pkts. 10 cts., 1 pkt. 3 cts.			
Morning Glory, double, in fine mixture, per packet.....			
5			

JAPANESE MORNING GLORIES.

Mr. Park:—You ought to have seen my city friends admiring my beautiful Morning Glories. They would stand and look at them, then say, "What large leaves! so full of bloom! and what lovely shades!" They would fine.—Mrs. H. W. Megrail, Jefferson Co., Ohio, Nov. 15, 1901.

Dear Mr. Park:—I received a packet of Morning Glory seeds from you last spring, and planted them around a dead tree. They grew, and were, oh, so beautiful, covering the entire tree. Everyone admired them. I would advise everyone to get their Morning Glory seeds from you.—Mrs. J. S. Conrad, Marshall Co., Tenn.

New Imperial Japan Morning Glories.—These are varieties of the large-flowered *Ipomoea* lim-bata. The plants are more delicate than the common Morning Glory and not so free-blooming, but show a wonderful variety of shades, many odd, some strikingly variegated. My seeds of these are very choice, from Japan, and the flowers will reveal the finest shades and variegations. 4 packets 10 cents, 1 packet 3 cents.

Mr. Park:—I think the Japanese Morning Glory one of the easiest grown and pretty of the garden flowers in cultivation. I received a packet of the seeds from you two years ago, and both seasons they have grown and bloomed profusely, and are still a mass of bloom, all colors, and double and single.—Mrs. L. C. French, Sonoma Co., Cal., Nov. 30, 1901.

Ipomoeas.—These are much like Morning Glories in foliage, flower and habit. They are all of rapid growth, and fine for trellises, walls or screens. All are easily grown.

Coccinea, scarlet.....	3	Learl, blue, fine.....	5
Lutea, yellow.....	3	Limbata elegantissima	3
Hederacea, the Ivy-leaved Morn'g Glo-ry; mixed colors.....	3	Nil grandiflora.....	5
Splendid mixture, all sorts, 4 pkts. 10 cents, 1 pkt.....	3	Violaacea vera, blue.....	5
Loasa lateritia, a showy annual vine; orange flowers; foliage covered with stinging hairs.....	5	Alba, white.....	5
Lophospermum scandens, a handsome vine, the root of which may be wintered in the cellar. Velvety foliage and large, tubular rosy flowers. Sow in a window, early, to bloom in summer...	3		

Moon Flowers. Easily grown from seeds. Bona Nox has clusters of small flowers, and Mexican white bears large flowers. Both are very fragrant, and very free-blooming. Separate or mixed.....

Mina lobata, a quick-growing vine much like *Ipomoea coccinea*, but bearing racemes of scarlet flowers not unlike scarlet *Salvia* at a distance.....

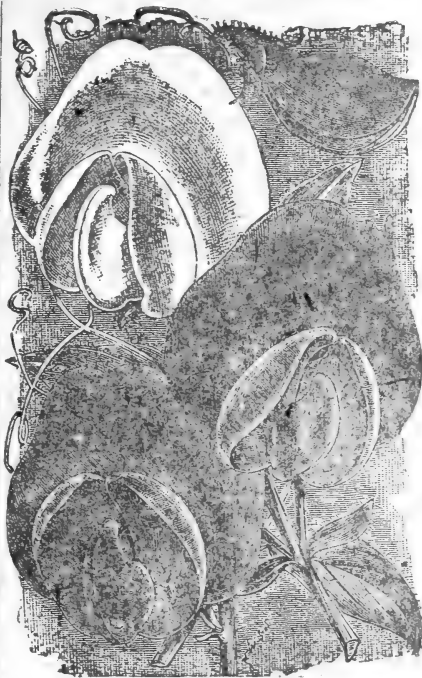

MAURANDYA.

Maurandya, one of our finest, most graceful vines. Plants start readily, grow in a dense mass six or eight feet high, and are covered in autumn with showy, bell-shaped flowers. Everyone ought to have this splendid vine. I can supply the colors, from white to deep purple separately, at 5 cents per packet, or all in splendid mixture at 4 packets 10 cts., 1 packet 3

Mr. Park:—My Maurandya from your seeds were beautiful. They climbed several feet high, and were a mass of pretty, fine foliage, and *Digitalis*-like flowers, white, rose and purple. I wintered some in the house, planting out in the spring, and they bloomed all season. They were lovely even after severe frosts. I advise all of my friends to try Park's Maurandya. —Mary Bates, Providence Co., R. I., Dec. 7, 1901.

Park's Large-flowered Sweet Peas.

Complete mixture, per lb. 50 cts., one-fourth lb. 15 cts., one oz. 5 cts.,
4 packets 10 cents, 1 packet 3 cents.

SWEET PEAS.

They bloom continuously, if cut freely, to prevent seed development. An ounce will sow a row from 25 to 50 feet long. Cover half an inch deep. Furnish support early.

Mr. Park:—Your large-flowered Sweet Peas are beauties. The seeds germinated for me promptly, and the plants began to bloom early, continuing until frost. The large, bright-hued blossoms were a charming sight, and the air was perfumed by their delicious odor.—Mrs. Emma Holmes, Effingham Co., Ill., Dec. 13, 1901.

Mr. Park:—The mixed Sweet Peas purchased from you were indeed more than represented. It seemed as if every plant produced a different color. They were planted in good soil, on the east side of the house. They blossomed finely. We gathered large bouquets nearly every day.—Mrs. S. B. Kilmer, Sullivan Co., Pa., Nov. 4, 1901.

Choice Climbing Tropæolums.

Complete mixture, lb. 80 cts., $\frac{1}{2}$ lb. 35 cts., oz. 8 cts., 4 packets 10 cts., 1 packet 3 cts.

The Climbing Tropæolums or Nasturtiums are lovely vines, growing quickly, and blooming all season. The flowers are large, delicate, delightfully fragrant, borne freely, and appear in many exquisite shades, from pearl white to rich, dark crimson, as well as yellow and silky bronze. Many are attractively blotched or spotted. Placed a vase with some of the foliage they are fine for table or room decoration. The vines have clean, dense, rich foliage, and are fine for covering trellises or unsightly rocks or stumps. My mixture contains all the sorts, and is unsurpassed.

Atropurpureum, crimson.....	3	Luteum, fine yellow.....	3
Chamele, variously colored.....	3	Pearl, whitish, very pretty.....	3
Coccineum, dazzling scarlet.....	3	Prince Henry, sulphur, marbled scarlet	3
Dunett's Orange, bright orange.....	3	Regellianum, purple, crimson.....	3
Edward Otto, rich bronze.....	3	Scheuerianum, straw color, spotted.....	3
Flammulum, scarlet and yellow.....	3	Coccineum, scarlet, spotted.....	3
Hemispericum, orange.....	3	Schillingi, light yellow.....	3
Hannemann, brown, odd.....	3	Vesuvius, salmon.....	3
King Theodore, dark foliage.....	3	Von Moltke, bluish-rose.....	3

Complete mixture, lb. 80 cents, fourth-lb. 25 cents, oz. 8 cts., 4 pkts. 10 cts., 1 pkt. 3 cts.

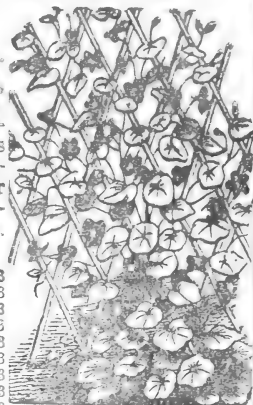

My seeds of Climbing Nasturtiums are all of the large-flowered Giant sorts. There are none better. Mr. Park:—Last spring I received a packet of your Climbing Nasturtiums, which I planted in rather poor soil. They bloomed constantly for nearly four months, and such beautiful, large, fragrant blossoms, and such a variety of colors! They are among the "must haves".—Grace Owens, Will Co., Ill., Nov. 12, 1901.

Mr. Park:—If I could only have six annuals, the Nasturtium would be one of them. It's not only a good bedding plant, but makes quite a pretty one for a winter box.—Mrs. I. L. Pierson, Wood Co., Tex., Nov. 15, 1901.

Tropæolum Peregrinum, the lovely Canary-bird Flower. A splendid vine, 4 pkts. 10 cts., 1 pkt. 3 cts.

Scarlet Runner, a showy, scarlet-flowered Bear, blooming freely when not allowed to form seeds. A fine trellis or arbor vine. Beans are edible. 4 pkts. 10c., 1 pkt. 3c.; white, and white with pink, each, 5c.; mixed, 4 pkts. 10c., 1 pkt. 3

Thunbergia, a lovely vine, 6 feet high, with white, yellow and salmon colored flowers. Very pretty for a hedge or screen. Blooms all summer. Six varieties, separate, each, 5 cts. per pkt., all varieties mixed, 4 pkts. 10c., 1 pkt. 3

NASTURTIUM.

BIENNIALS AND PERENNIALS. 37

Many varieties mixed, large packets, 3 pkts. 25 cts., 1 pkt. 10 cts.

These mostly bloom the second season. All are hardy. The Biennials die after blooming, but the Perennials live and bloom for many years. They are very desirable garden flowers, as they require but little care after the plants are established, and are showy and beautiful. No person who starts a bed of these flowers will ever regret it.

Aquilegia=Columbine.

Complete Special mixture, 4 packets 10 cents, 1 packet 3 cents.

Very beautiful, hardy perennials. Flowers both single and double in form, and of all shades of red, white, blue and yellow. The sorts offered are mostly large-flowered. All bloom in the spring, and some continue to bloom all summer. My complete mixture will show a great variety, and will please all who sow of it.

Complete special mixture 4 pkts. 10 cents, 1 pkt. 3

Aquilegia (Columbine) is a genus of free-blooming subjects of easy culture in ordinary garden soil. They are suitable for beds, borders and shrubberies, and thrive in a shady situation. They are also very beautiful when naturalized in grass; and the flowers are also prized for cutting.—Book of Gardening.

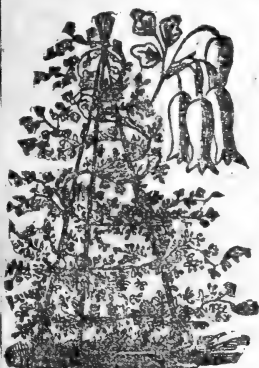

Mr. Park:—I would advise everyone to sow at least a packet of seeds of Aquilegia. They are among the most satisfactory of perennials; flowers single and double, produced in early spring. Seeds may be sown in July for blooming the following spring. Hardy.—O. Mollett, Martin Co., Ky., Nov. 25, 1901,

AQUILEGIA CERULEA.

Adlumia Cirrhosa.

Mixed colors, 4 packets 10 cents, 1 packet 3 cents.

ADLUMIA CIRRHOSA.

where a graceful, Biennial vine is wanted.

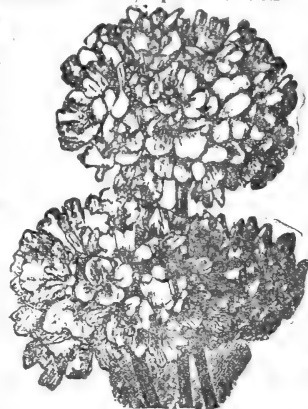

Mixed, 4 packets 10 cents, 2 packet 3 cents.

This is a lovely vine, hardy, and thrives in a dense shade, where few other vines will grow. It climbs 20 feet high, bearing foliage as delicate as a Maidenhair Fern, and exquisite, waxy, rose or purple flowers in clusters in great profusion. It is one of our handsomest vines, and fine for a trellis, or any place

Giant Armeria.

Mixed colors, 4 packets 10 cents, 1 packet 3 cents.

This is a splendid perennial, hardy, two feet high, bearing large heads of rose-colored flowers. Once established the plants will last for years, and make a fine display every season. It is one of the choice perennials of easy culture too rarely seen. Mixed, 4 pkts. 10c., 1 pkt. 3c.

Bell Flowers or Campanulas.

Complete mixture, 4 packets 10 cents, 1 packet 3 cents.

CAMPANULA MEDIUM (CANTERBURY BELL).

Special mixture of Single, Double and Calycanthema varieties, carefully proportioned, 4 pkts. 10 cents, 1 pkt. 3. Mr. Park:—My Canterbury Bells (C. Medium) from your seeds were the admiration of everybody. I had several varieties, all beautiful.—Mrs. S. J. Grines, Pauncersville, Texas, Dec. 9, 1901.

Carpatica, 1 ft. high, beautiful cup-shaped flowers during July and August, mixed..... 5
Grandis, 2 feet high, flowers 2 inches across, showy; in bloom June and July..... 5
Macrantha, 5 ft. high; broad leaves and large, open flowers, a splendid sort..... 5
Mirabilis, new; not unlike the old Canterbury Bell; very fine..... 5

The Bell Flowers are a very interesting and beautiful class of plants. They are gathered from all parts of the world, and vary in habit and in the form and size of flowers, as well as in color. Campanula Medium in its numerous varieties is one of the best known and most showy and handsome. The plants mostly grow eighteen inches high, and are covered with large bells, as shown in the engraving. Some varieties bear double flowers, and C. calycanthema is semi-double, having the form of a cup and saucer. C. Pyramidalis is a splendid sort, useful for either garden beds or pots in the house. I found this a popular market plant in Paris. C. Persicifolia is lovely, also C. turbinata. Nearly all are hardy, and deserve a bed in every garden. They like a sunny place and a well drained soil. The plants bloom the second year, and most of the species live and bloom for several years. Plants of C. Medium should be started every year to keep up a supply.

VARIETIES OF CAMPANULA MEDIUM.

Pyramidalis, handsome per. species, blue and white, each 5 ets., mixed, 4 pkts. 10 cents, 1 pkt. 3
Persicifolia, large-flow'd, blue and white, each 5c., double 5c., mixed 4 pkts. 10 cents, 1 pkt. 3
Rotundifolia, the Scotch Hairbell; very fine and graceful..... 5
Turbinata, blue and white; of Dwarf habit; very pretty; mixed..... 5

Mr. Park:—What lovely flowers my Campanula from your seeds produced, and, oh, what bright colors! The plants were raised by frost during winter, but in the spring I pressed them down and mulched with well-rotted manure, and they grew and bloomed.—Mrs. L. A. Davenport, Hamilton Co., O.

Garden Carnations.

Finest special mixture, 4 pkts. 10 cents, 1 pkt. 3 cents.

The Hardy Carnations are among the most beautiful and useful of our garden flowers. They bloom for many weeks during the early part of the season, making a fine show, and filling the air with delicious perfume. Plants from the choice seeds I offer will bear very large flowers of all shades from white to dark crimson, also yellow shades and striped, a large percentage double. Started early the plants will often bloom the first season. The seeds are not surpassed by offerings of any other seedsman, regardless of price.

Choice Garden Carnations in splendid mixture, 4 packets 10 cents, 1 packet..... 3

Mr. Park:—Let me speak a word for your Garden Carnations. I purchased a package of seeds in the spring, sowing them early indoors, and transplanting to the open ground in May. Notwithstanding the drought, they have bloomed the entire fall and latter part of summer, and are just as fine in form and fragrance as any hot house Carnation. I counted six distinct colors. I was doubly repaid for my care of them, besides having a number of fine plants for next year.—Mrs. Delbert Bennett, Moultrie Co., Ill.

Mr. Park:—I have always had success with your Carnations. They are a source of much pleasure. Try a bed of them.—Mrs. M. S. Lowell, Macomb Co., Mich.

CHOICE GARDEN CARNATIONS.

Perennial Cosmos, Pyrethrum.

Splendid mixture, 4 packets 10 cents, 1 packet 3 cents.

A first-class perennial, lasting for years. Plants grow two feet high, with beautiful, fine-cut foliage and long-stemmed Cosmos-like flowers of colors ranging from white to deep crimson. They bloom freely during June and July, and are very showy in groups or beds. Special mixture, single and double, choicest hybrids, 4 packets 10 cents, 1 packet 3 cents.

Dear Mr. Park.—Choice among my perennial plants are several clumps of your Perennial Cosmos, Pyrethrum. Those of white, rose, crimson and scarlet are brilliantly and delicately colored, and borne upon long stems. The foliage is scarcely less lovely than the flowers. The seeds readily germinate, and to insure blossoms the first year, should be started in the house, and when the ground is warm transplanted to a rich, sunny border, where they will bloom in mid-summer, and continue to bloom from year to year, requiring no petting to insure their well-doing.—Helen Watts McVey, Wright Co., Mo.

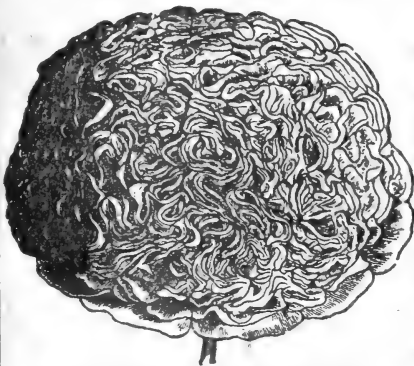

PYRETHRUM—PERENNIAL COSMOS.

Gypsophila Paniculata.

Price, 4 packets 10 cents, 1 packet 3 cents.

This is not a showy plant in the garden, as its flowers are small, and borne upon delicate, wiry stems, but when the airy stems are cut and intermingled with other flowers the effect is charming. The plant is hardy, and of easy culture. If you give this perennial a trial you will never care to be without it afterward. It is two feet high, bushy, and blooms all summer. 4 packets 10 cents, 1 packet 3 cents.

Mr. Park.—If any of your patrons do not have Gypsophila paniculata, I would advise them to get seeds in the spring. Once started it is there to stay, standing all kinds of exposure and drought. No garden is complete without it. Nothing can take its place for decoration in cut flowers, and if cut when the flowers first open they can be kept all winter, and make up beautifully with your Everlastings, or can be used alone. Try a bouquet of Sweet Peas and Gypsophila. It thrives in any good garden soil kept free from weeds.—M. J. Acly, Fergus Co., Mont.

HOLLYHOCK—NEW ALLEGHANY.

Alleghany Hollyhocks.

Splendid mixture, all shades, 4 packets 10 cents, 1 packet 3 cents.

These are superb garden flowers, surpassing all other Hollyhocks in size and attractiveness. The plants grow five feet high, have handsome foliage, and bloom freely for several months. The flowers are very large and double, and of the richest shades, the petals fringed and frilled in the most attractive manner. Started early some of the plants will bloom the first season.

Pure white.....	5	Scarlet.....	5	Sulphur yellow...	5
Bright rose.....	5	Salmon rose.....	5	Golden yellow....	5
Pale yellow.....	5	Crimson.....	5	Dark crimson.....	5
Light apricot.....	5	Cherry red.....	5	Yellowish white	5
Peach.....	5	Purplish lilac.....	5	on purple gro'd	5

Special mixture, all sorts, 4 packets 10 cents, 1 packet 3 cents.
Mr. Park.—My Hollyhocks from the seeds purchased of you grew ten feet high. The flowers were beautifully fringed, many as large as saucers. At a distance they appeared like Roses. I can recommend them.—J. Smallridge, Boyd Co., Ky.

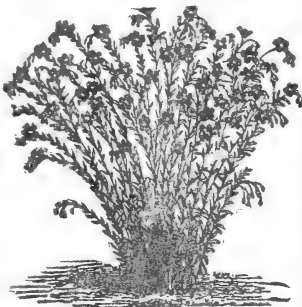

Linum Perenne.

Special mixture, 4 packets 10 cents, 1 packet 3 cents.

The Perennial Linum or Flax is one of the most beautiful of hardy plants. Massed together the plants are showy, bearing myriads of bright blue, white and rose-colored flowers every day during nearly the entire season. They self-sow, and once started the bed will take care of itself. It is a perennial I can confidently recommend.

Blue.....	5	Rose.....	5
White.....	5	Special mixture, 4 pkts. 10c., 1 pkt 3	

Mr. Park.—I received from you a packet of Linum perenne, and was delighted with both plants and flowers. The former grew a foot high, were of graceful habit, and densely clothed with delicate, narrow leaves, very beautiful. At first the flowers were not numerous, but as fast as one faded two buds opened, until the whole bed was like a big bouquet.—Mrs. J. J. Kinus, Jefferson Co., Kas.

Choice Perennial Poppies.

Special Mixture of all varieties, 4 pkts. 10 cents, 1 pkt. 3 cents.

ORIENTAL POPPIES.

White, yellow and scarlet, single, mixed..... 5 | Iceland Poppies in splendid mixture, 4 packets 10 cents, 1 packet..... 3

Dear Mr. Park:—The bed of Oriental Poppies, grown from a packet of seeds obtained from you, was the glory of my garden, and excited liveliest admiration from all who saw it. The flowers were very large, of fine texture, borne upon long stems, and of the loveliest shades. Everyone should have these Poppies; as they are so easily raised from the seeds you send out.—Helen Watts McVey, Wright Co., Mo., Nov. 14, 1901.

Perennial Phlox.

Finest Mixture, 4 packets 10 cents, 1 packet 3 cents.

No perennial collection should be without a few clumps of the beautiful Perennial Phlox. The plants are entirely hardy, bloom freely for a long time, and the panicles of bloom show many rich colors. The seeds require several weeks to start, but germinate well if given sufficient time. Finest mixture, 4 pkts. 10 cts., 1 pkt. 3 cts.

Mr. Park—Why don't every flower cultivator have a bed of Perennial Phlox. No more useful or showy perennial grows. There are so many beautiful colors, shades of pink and crimson, crimson with white eye, white with crimson eye, and pure white. The clusters are sometimes as large as saucers, and the flowers have a delightful fragrance.—M. J. Acly, Fergus Co., Mont., Dec. 2, 1901.

Perennial Peas.

Hardy, lasting and very showy perennial vines. Bloom all season, if freely cut. Scarlet, white and rose, mixed, 4 packets 10 cents, 1 packet 3 cts.

The Perennial Poppies are exceedingly showy and beautiful flowers, and are easily grown from seeds. Plants of the Oriental section grow two or three feet high, have massive cut foliage, and flowers six to twelve inches in diameter, of the most gorgeous colors—shades of scarlet, pink and white. The Iceland Poppies (*P. nudicaule*), are fine yellow, as well as other shades. They are handsome, but of modest size and growth. All are hardy, and will endure severe winters. The Oriental sorts increase in beauty for many years.

FOR THE WINDOW.

Special mixture of many kinds, 3 pkts. 25 cents, 1 pkt. 10 cents.

Many of our choice decorative and flowering pot plants are easily grown from seeds, and this means of supply is not only economical, but a source of much pleasure. Asparagus, Grevillea, Smilax, Cinerarias and Primroses are all propagated chiefly from seeds, and often the choicest new shades and variegations in Carnations, Coleus, Geraniums and Gloxinias are obtained from seedlings. I offer the choicest seeds of window plants at prices that cannot but popularize this method of supply. Cultural directions always accompany the seeds. Always include a few varieties of window garden seeds in your order.

Asparagus, Decorative.

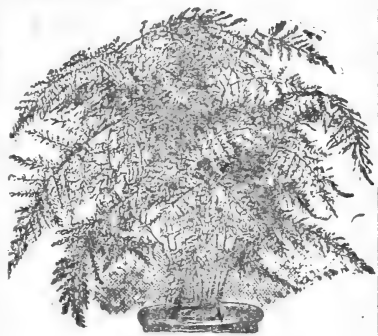

Special mixture, 4 packets 10 cents, 1 packet 3 cents.

The new species of Asparagus are justly placed at the head of the list of window plants. They are of easy culture, and their graceful habit and plummy foliage never fail to please. My seeds are of the best quality, and my special mixture contains seeds of all the sorts offered.

Plumosus nanus, see engraving 5; Sprengeri, exquisite for vases 5
Acutifolius, handsome foliage 5; Verticillatus, a hardy vine.... 5
Special mixture, all sorts, 4 packets 10 cents, 1 packet..... 3

Mr. Park:—The choicest specimen among my house plants is a fine plant of Asparagus plumosus, little more than a year and a half old. It throws up long, graceful whips, three and four at a time, which soon put out the deep green, filmy foliage. Each branch extends fully a yard and a quarter, and some have measured nearly five feet. Festooned around a trellis with lace curtains behind it it is indeed a thing of beauty.—Jennie M. Mason, Hancock Co., Maine.

Mr. Park:—Asparagus Sprengeri is certainly one of the handsomest evergreen basket plants for the house that I have had any experience with. Fine for bouquets, wreathes and all kinds of floral decorations.—Ida McMorris, Hickman Co., Ky., Nov. 21, 1901.

ASPARAGUS PLUMOSUS.

Choice Begonias.

Finest mixture, all sorts, 4 pkts. 10 cents, 1 pkt. 3 cents.

Begonias have dust-like seeds—so fine the eye cannot discern their form, but they start readily, and the plants are of easy culture in the hands of the careful amateur. The plants from a good mixture are in great variety, and are very interesting to grow, being always chaste and beautiful in both foliage and flowers. My seeds are of the finest quality, and will yield first-class plants and flowers.

Calceolaria Hybrida.

Large-flowered, special mixture, 4 packets 10 cents, 1 packet 3 cents.

CALCEOLARIA HYBRIDA.

time when they will begin to bloom.—Mrs. A. H. Pierson, Tompkins Co., N. Y., Nov. 11, 1901.

These are among the most beautiful and attractive of window plants. They start readily from seeds, and begin to bloom in about ten months from the time the seeds are sown. The flowers are borne in large clusters, are of many shades, mostly blotched, striped or spotted, and the blooming period extends throughout the late winter and early spring months, when the seeds are started in the spring. The plants like a cool, moist atmosphere in summer, and moderate heat in winter while blooming. The seeds I offer are very superior.

Largeflowered Tigred	Painted and margined	5
and Spotted.....	Fancy striped.....	5
Self-colored, mixed.....	New Dwarf, mixed.....	5
Special mixture of all varieties, 4 pkts. 10 cts., 1 pkt 3		

Mr. Park:—I raised a dozen Calceolarias from the seeds I purchased of you. They are all growing finely, and I am looking forward with pleasure to the

Winter-blooming Carnations.

Finest mixed, 4 pkts. 10 cts., 1 pkt. 3 cts.

I offer seeds of a new class of Carnations which are specially well adapted for winter blooming in the window. The plants are started from seeds in the spring, bedded in a sunny bed, and kept pinched back during summer, and potted, watered and shaded about September 1st, then placed in the window. They will soon begin to bloom, the flowers being large, double, richly scented, and of lovely colors, as rose, crimson, white, striped, yellow, etc. The plants are hardy, may be left out if desired, and will bloom freely in the garden the next season.

Mr. Park:—Your Carnations are fine for winter blooming. I keep the plants well pinched back all summer, and they grow bushy, and bloom fine in winter. They like a rich, rather heavy garden soil. Water moderately, and give plenty of sun and air in the window garden. If this is neglected they are apt to grow spindling.—Mrs. G. Haepner, Culman Co., Ala., Dec. 2, 1901.

WINTER-BLOOMING CARNATION.

Large-flowered Cinerarias.

Special mixture, 4 pkts. 10 cts., 1 pkt. 3 cts.

Cinerarias are gorgeous and beautiful pot plants. No window flower is more attractive. The plants are easily raised from seeds, and bloom in nine or ten months from time of sowing. The plants like a cool, partial shade in summer, and chopped tobacco stems should be kept upon the soil beneath the plants to prevent Aphid. Shift into larger pots as the plants grow, otherwise they are liable to become stunted. If possible syringe occasionally with water slightly warmer than the hand will bear. My seeds are of the finest large-flowered European strains.

Large-flowered white.....	5	Azure blue.....	5
Rich crimson.....	5	Deep blood red.....	5
Ringed and variegated.....	5	Dwarf mixed.....	5
Stellata, a free-blooming sort with star-like flowers of various colors; mixed.....	5		
All varieties, special mixture, 4 packets 10 cents, 1 packet.....	3		

Mr. Park:—I raised fine plants from your seeds of Cineraria. They bloomed in the winter, and were beautiful. They were the first Cinerarias I had seen, and I was much pleased with them. The plants last a long time in bloom.—Mrs. F. B. Colton, Hartford Co., Conn., Nov. 22, 1901.

Mr. Park:—The Cinerarias I raised from your seeds were fine. I sowed them in May, and the following spring they blossomed, and were beautiful.—Mrs. Emma Peck, Shia. Co., Mich.

Chrysanthemum Japonicum

Large-flowered, double, the splendid varieties that elicit so much praise and admiration at the autumn shows. Superb mixture of all colors, first-class, saved from collection flowers, 4 packets 10 cents, 1 packet..... 3

CINERARIAS—LARGE-FLOWERED.

Coleus, Fancy Leaved.

Finest Mixture, all varieties, 4 packets 10 cents, 1 packet 3 cents.

Few persons know how easily Coleus plants can be raised from seeds. They are as readily started as Petunias, and quite as satisfactory. As bedding plants they are gorgeous, when tastefully grouped, and as pot specimens for the window garden few plants, even when in bloom are more attractive or more admired. My seeds are from the finest collections in Europe, and will give the best results.

Carmine, golden edge.....	5	Spotted and striped.....	5
Fringed-leaved.....	5	White-ground foliage.....	5
Shades of red.....	5	Yellow-colored foliage.....	5
All varieties in splendid mixture, 4 pkts. 10 cents, 1 pkt. 3			

Mr. Park:—I got a 3-cent packet of your Fancy Coleus seeds last spring, and such beautiful plants as I have! I gave lots of little plants away, and I have eighteen different ones now. Some are the broad, crinkled leaf, and some are smaller, but no two alike in shape or color. My plants are the envy of all who see them.—Essie M. Canon, Clayton Co., Iowa, Nov. 11, 1901.

Mr. Park:—I raised many beautiful varieties of Coleus seeds bought of you. I had lovely shades, from most delicate green to deep maroon. Anyone who desires a bed of showy plants cannot do better than buy Coleus seeds from you, and plant early.—J. W. Meng, Laf. Co., Mo., Aug. 1, 1901.

FANCY-LEAVED COLEUS.

Cyperus--Umbrella Plant.

Finest mixed, 4 packets 10 cents, 1 packet 3 cents.

This is one of the easiest grown of window plants, and very attractive. Seeds start readily, and the plants grow rapidly. Shift into larger pots occasionally, to prevent root-crowding and encourage vigor. Water liberally while growing. After blooming water sparingly and set the pot in a cool, retired place for a few weeks, then cut the tops off and repot. A good specimen is as graceful and handsome as a Palm, and more easily managed. The plants are aquatic, and will grow in boggy soil in water.

Alternifolius, the old sort, see engraving.....	5
Variegatis, dwarf, green and white foliage.....	5
Papyrus, very handsome sort.....	5
Special mixture, all varieties, 4 pkts. 10 cts., 1 pkt. 3	

Mr. Park:—I like the Cyperus or Umbrella Plant. Its graceful leaves are borne on long, slender, bright green stems, and are very attractive and decorative. It is of easy culture, and may be grown either in water or in soil.—Mrs. Caroline Winn, Clay Co., Ind., Nov. 8, 1901.

CYPERUS ALTERNIFOLIUS.

Giant-flowered Cyclamen.

Special mixture, all colors, 4 pkts. 10 cts., 1 pkt. 3 cts.

Cyclamen are always propagated from seeds, and the plants are of blooming size in from fifteen to eighteen months. Give them a resting period of a few weeks, but do not dry them off entirely at that time, as it destroys the fleshy roots. I offer seeds of an improved strain, the flowers being of mammoth size and richest colors. The plants bloom profusely in winter. Of easy culture.

Giganteum universum, white with red eye.....	8
Atro-rubrum, dark red.....	8
Roseum superbum, fine rose.....	8
Splendens, shining dark carmine.....	8
James Prize, sweet-scented.....	8
Mont Blanc, pure white.....	10
Brilliant, dark blood red.....	8
All varieties, special mixture, 4 pkts. 10 cts., 1 pkt. 3	
Papilio, new, seeds direct from raiser, pkt. of 3 seeds, 10	

Mr. Park:—The Cyclamen seeds purchased of you had excellent germinating qualities. The leaves are handsome, and I am expecting equally fine blossoms later. I have had Cyclamen seedlings bloom before a year old. Mrs. C. L. Whipple, Dutch Co., N. Y., Nov. 14, 1901.

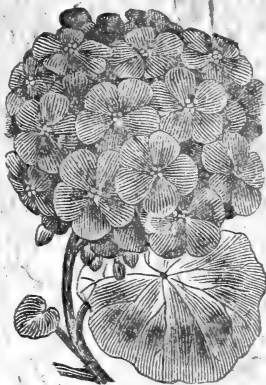

Mr. Park:—From one 3-cent paper of your Cyclamen I raised eight fine plants.—Grace Owens, Will Co., Ill.

GIANT-FLOWERED CYCLAMEN.

Choice Zonale Geraniums.

Splendid mixture, 4 packets 10 cents. 1 packet 3 cents.

ZONALE GERANIUM

The Zonale Geraniums are easily started from seeds, and the seeds are of a fine strain the plants raised will offer produce extraordinary varieties beautiful in both foliage and bloom. The plants come up in from two to six weeks and bloom in from ten to fifteen months. Seedlings are always vigorous and healthy. Geraniums like a rich and sunny bed, and plenty of water during the growing season. The seeds I offer were grown by German specialists, and are unsurpassed. Splendid mixture, 4 packets 10 cents. 1 packet 3 cents.

MISCELLANEOUS GERANIUMS OR PELARGONIUMS.

Fancy Pelargoniums, mixed.....	5	Apple-scented Geranium.....	5
Rose-scented.....	10	Ivy-leaved, mixed.....	10
Golden Tricolor.....	10	Bronze-leaved.....	10

Mr. Park.—Geraniums are the most popular plants we have for bedding, and also for the window. We could not get along without them. Some of my plants were raised from your seeds, and the longer I have them the more I prize them. They bloom the whole year. In summer I have them outside, and in the winter in the house.—Mrs. A. Rieck, Renville Co., Minn., Dec. 4, 1901.

Mr. Park.—Tell your patrons if they want something really interesting to get a package of your Geranium seeds. I have never had anything to give such satisfaction for so little time and trouble. From two packages I have twenty-five or more plants.—Mrs. W. E. Sayle, Hunt Co., Tex., Nov. 8, 1901.

Gloxinia, New Giant Hybrids.

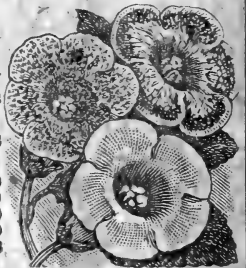

Special mixture, 4 packets 10 cents, 1 packet 3 cents.

Many persons prefer to raise their Gloxinias from seeds. They germinate well, and the plants bloom in eight to twelve months from time of sowing. Nearly all of the finer Gloxinias are propagated from seeds. I supply choice seeds, producing plants vigorous and free-blooming, and flowers of immense size and fine colors.

Defiance, scarlet.....	10	Tigrina, rose, tigré.....	10
Emperor Frederick, scarlet, white border.....	10	Emperor William, blue, white margin. 10	
Pure white.....	10	Tigré and Spotted.....	10
Giant-flowered, special mixture, 4 packets 10 cents, 1 packet 3 cents.		Celestina crassifolia, blue.....	10

Mr. Park.—I got a paper of Gloxinia seeds of you last spring, and sowed them April 1st. I raised 15 plants. Some have bloomed. They are fine. One is velvety red, and one is ringed red and white. They are very large. I have plenty of chances to sell them, but I tell my friends that they can get seeds of Mr. Park.—Mary B. Real, Richland Co., O., Oct. 21, 1901.

Mr. Park.—My seedling Gloxinias gave me flowers the second year. I consider them the best of all summer-flowering porch plants. They repay one a thousand times for the little care that they require.—Mr. F. A. Dennis, Stauben Co., N. Y., Nov. 18, 1901.

GLOXINIA—HYBRIDA.

Grevillea Robusta.

Price, 4 packets 10 cents, 1 packet 3 cents.

Known as Silk Oak. A handsome decorative plant, of easy culture, with light green, deep-cut foliage. Readily started from seeds, and prized by many as a window or room plant. 4 pkts. 10 cts., 1 pkt. 3 cts.

Mr. Park.—My Grevillea robusta from your seed is a fine, graceful plant. I keep it in a jardiniere in the parlor for several weeks at a time. Dust and the dry air of a heated room do not trouble it.—F. C. Bryant, Queens Co., N. Y.

Mr. Park.—The Grevillea robusta is a plant I greatly admire. I find it very easy to manage. Good earth, plenty of rootroom, a warm room, and lots of water suits it. Never let it become dry. The foliage is finely cut, something like fern. It is a beautiful plant.—W. Lamb, Menice, Ontario, Can., Nov. 26, 1901.

GREVILLEA.

Heliotrope, New Bruant.

Special mixture, 4 packets 10 cents, 1 packet 3 cents.

The new large-flowered Heliotropes are fine for either beds or pots. The plants are vigorous, and bear freely numerous large clusters of fine flowers, the colors ranging from white to dark blue. They are readily grown from seeds.

Large-flowered, white in splendid variety.....	5
Large-flowered, violet in splendid variety.....	5
Large-flowered, light blue in splendid variety.....	5
Large-flowered, dark blue in splendid variety.....	5

Mr. Park.—Your new large-flowered Heliotropes are something extra fine. I succeeded in raising several beautiful specimens from half a packet of seeds. I am delighted with them.—Mrs. W. S. Lowell, Macomb Co., Mich.

HELIOTROPES—These are universal favorites for flower gardens. They may be raised from seeds, and bloom the same year. Sow early.—Flower Garden.

NEW BRUANT HELIOTROPE.

Helichrysum lanatum.....	10	Hibiscus Immutab.....	10	Lapageria rosea.....	10	Montbretia , sweet.....	5
Humea elegans.....	10	Mutabilis fl. pl.....	10	Linaria , mixed.....	5	Musa ensata, 1 seed.....	5

Californicus.....	10	Zanzibar Balsam.....	10	Silky, blotched foliage; a beautiful ornamental plant.		Verum (Oleander).....	10
Coccineus, scarlet.....	10	Everblooming plants.		Mandevilla , sweet.....	5	Vertera depressa.....	10
						Nymphaea cœrulea.....	5

Lantana, New Dwarf.

Splendid mixture, 4 packets 10 cents, 1 packet 3 cents.

The New Dwarf Lantanas are very desirable. The plants are low, compact and floriferous, and the flowers bright and showy, and produced in fine, large clusters. The plants are not difficult to raise from seeds, and seedlings are more robust in habit than plants grown from cuttings. The seeds are rather slow in starting, as the germs are enclosed in nutlets that are hard, and impervious to air and water at first. They should be given from three to eight weeks to germinate. My seeds are first-class, and will yield the finest plants and flowers.

New Dwarf Lantana, splendid mixture, 4 packets 10 cents, 1 packet..... 3
Old-fashioned Tall Lantana, red, 5 cts.; white, 5 cts.; mixed, 4 pkts. 10c., 1 pkt. 3

Dear Mr. Park:—No flower I ever cultivated has given me more satisfaction than Dwarf or Weeping Lantana. It blooms the year round, abundantly.—Mrs. Carrie Smith, Wapello Co., Iowa, Nov. 11, 1901.

Lantanas.—These are dwarf, shrubby plants that produce their flattened clusters of flowers in great profusion. The colors are white, yellow, pink, scarlet and crimson. In a greenhouse they will flower throughout the summer, and are also useful for bedding out. They need only ordinary soil.—Century Book of Gardening.

NEW DWARF LANTANA.

Fringed Chinese Primroses.

Complete Mixture, 4 packets 10 cents, 1 packet 3 cents.

The best of all winter-blooming plants for the ordinary room window is, without exception, the Fringed Chinese Primrose, in its various rich shades and colors. Any person can grow it. The plants start readily from seeds, germinating in about three weeks, and coming into bloom in from five to seven months. Plants started from seeds in the spring will bloom freely throughout the following winter. They will grow in either sun or shade, and thrive in any soil. In repotting avoid covering the crown with soil, and water regularly, never allowing the soil to become dry. As a rule they do better in the sitting room when grown in tin or iron receptacles. They like a rather cool, moist atmosphere. My seeds were raised by German and Italian specialists, and will produce the finest flowers, while I give my special care to the mixtures, that all the fine colors may be represented. Complete mixture, 4 pkts. 10 cts., 1 pkt. 3 cts.

CHINESE PRIMROSE

Alba luteo, yellowish....	8	Erecta superba rubra....	8	Pulcherrima, pretty....	8	Rubra, red.....	8
Alba magnifica, white....	8	Golden Feather.....	8	*Punctata elegantissima	8	Rubra violacea.....	8

Solanum Seaforthianum.

4 packets 10 cents, 1 packet 3 cents.

SOLANUM SEAFORTHIANUM.

This is a beautiful flowering vine, easily grown from seeds. The flowers are blue, and borne freely in autumn the first season: May be grown either as a pot plant, or in the open ground. Include a packet of seeds of this handsome vine in your order. 4 pkts. 10 cts., 1 pkt. 3 cts.

Boston Smilax.

Price, 4 packets 10 cents, 1 packet 3 cents.

This is a lovely trellis vine for the window or conservatory. It will also climb a cord, making a graceful appearance. The foliage is delicate, shining green, and fine for cutting for designs or for personal adornment. Plants are very easily cultivated from seeds. The small clusters of flowers are deliciously fragrant, and are followed by bright scarlet berries. 4 packets 10 cents, 1 packet 3 cents.

Torenia Fournieri Speciosa.

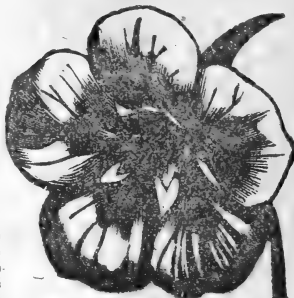

First mixture, 4 pkts. 10 cts., 1 pkt. 3 cts.

The Torenia Fournieri has, for several years, been a popular pot and bedding plant. It branches, forming a globular little bush, which is covered during the season with exquisite blue and lavender flowers. There are also other colors in the new, large-flowered varieties.

Tropaeolum Lobbianum.

Finest mixture, oz. 20 cents, 4 packets 10 cents, 1 packet 3 cents.

Lobbs Climbing Nasturtiums are considered much handsomer and much more floriferous than the old-fashioned tall varieties. They are as easily grown from seeds, and certainly make a fine display either as pot plants or in a bed or border. I have very choice seeds, in all the fine varieties, and the mixture I supply includes all, being specially prepared. I heartily recommend these grand Nasturtiums.

POPULAR MIXTURES OF FLOWER SEEDS.

Mixture of Annuals.—Contains chiefly seeds of flowers blooming the first season. The mixture embraces over 100 genera, and the average would perhaps be five species and varieties to each genus, thus representing fully 500 kinds. Price 10 cents per packet.

Mixture of Biennials and Perennials.—Contains seeds of more than 25 genera, and represents perhaps 50 species and varieties. Price 10 cents.

Mixture of Seeds for the Window Garden.—Contains seeds of more than 25 genera, and represents perhaps 125 species and varieties. 10 cents.

Mixture of Climbers.—Contains seeds of a dozen different genera, about 50 varieties. 10 cts.

Mixture of Everlastings and Grasses.—Contains seeds of the leading flowers and grasses used for drying for winter bouquets. Price 10 cents.

Mixture of Fragrant Flowers.—Contains seeds of more than a dozen genera, representing about 50 kinds of our most fragrant flowers. Price 10 cents.

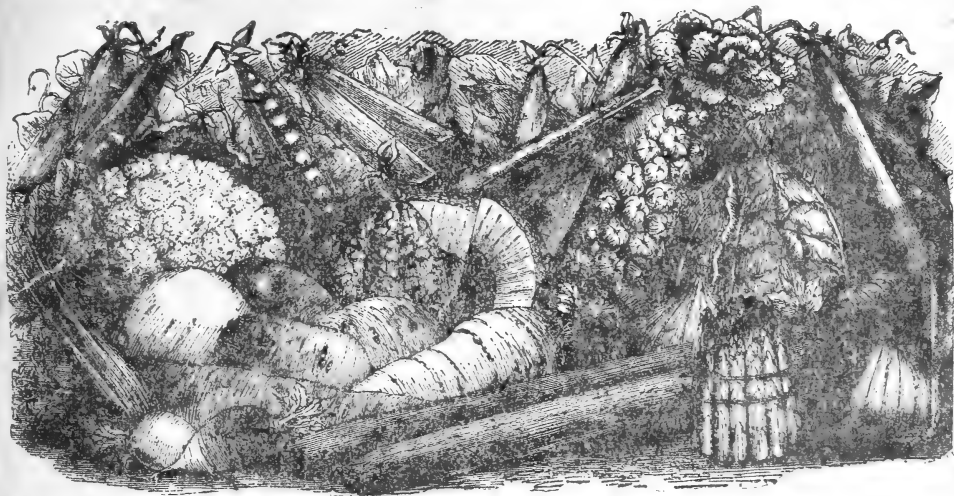

Mixture of Edging Plants.—Contains seeds of about a dozen genera of low-growing flowers, suitable for edging beds. There are 50 or more species and varieties represented in this mixture. Price 10 cts.

Mixture of White Flowers.—These are excellent where a moonlight display of flowers is desired. They are also suitable for graves. A good mixture of species and varieties. Price 10 cents.

Mixture of Nearly all Varieties.—This is what we advertise—a mixture of 1000 varieties and colors. Price 10 cents per packet. Those who secure this packet will be surprised at the wonderful variety of flowers to be obtained therefrom.

Seeds of The Best Vegetables.

47

SPECIAL OFFER.

 For only **60 cents** I will send by mail, carefully packed, **31 Packets of Splendid Vegetable Seeds**, the chief varieties illustrated and described in the following pages, embracing all the very best new and choice sorts. Such a lot of seeds could not be purchased of most retail seedsmen for less than \$2.50 or \$3.00. I offer the lot for 60 cents, or two lots for \$1.00. Get your neighbor to club with you, and order to-day. I guarantee the seeds to be first-class in every respect. Here is a list of the collection:

Asparagus, New Columbian White.
Bean, New Stringless Bush Green-pod.
Bean, Running or Pole, "Best of All".
Beet, New Crimson Globe.
Borecole, Curled Half-Dwarf Scotch.
Cabbage, Early Spring (the best early).
Cabbage, Danish Ball (the best late).
Cauliflower, Veitch's Giant.
Carrot, Chantenay or Model.
Celery, Rose-ribbed Self-blanching.
Corn, The New Early Giant.
Cucumber, Improved White Spine.
Egg Plant, New Early Purple.
Kohl Rabi, Early White Vienna.
Lettuce, New York (Very Superior).
Muskmelon, Rocky Ford.

Onion, Australian Brown.
Okra, Early Dwarf.
Parsnip, Parson's Guernsey.
Parsley, Champion Moss-curbed.
Pepper, Large Bell or Bull Nose.
Pumpkin, Yellow Cushaw Squash.
Peas, Champion of England.
Radish, New Cardinal, White-tip.
Spinach, Improved Prickly-seeded.
Tomato, Livingston's Beauty.
Tomato, Improved Stone.
Turnip, Purple-top Globe.
Turnip Rutabaga, Long Island Improved, Purple-top.
Watermelon, Early Sweet.
Herb, Lavender, True.

 **FOR ONLY 60 CENTS** I will mail to you full-sized packets of all of the above Vegetables. The Beans, Peas and Corn will all be of 2-ounce packets, such as most seedsmen retail at 10 cents per packet. If you will order two collections I will mail them both to you, or to two different addresses for only \$1.00. Kind reader, will you not give these seeds a trial? Order for yourself and a friend or neighbor. No better or more acceptable present could be given to a friend than a collection of these seeds. Full cultural directions will accompany the seeds. Send at once. Address

GEO. W. PARK, La Park, Lancaster Co., Pa.

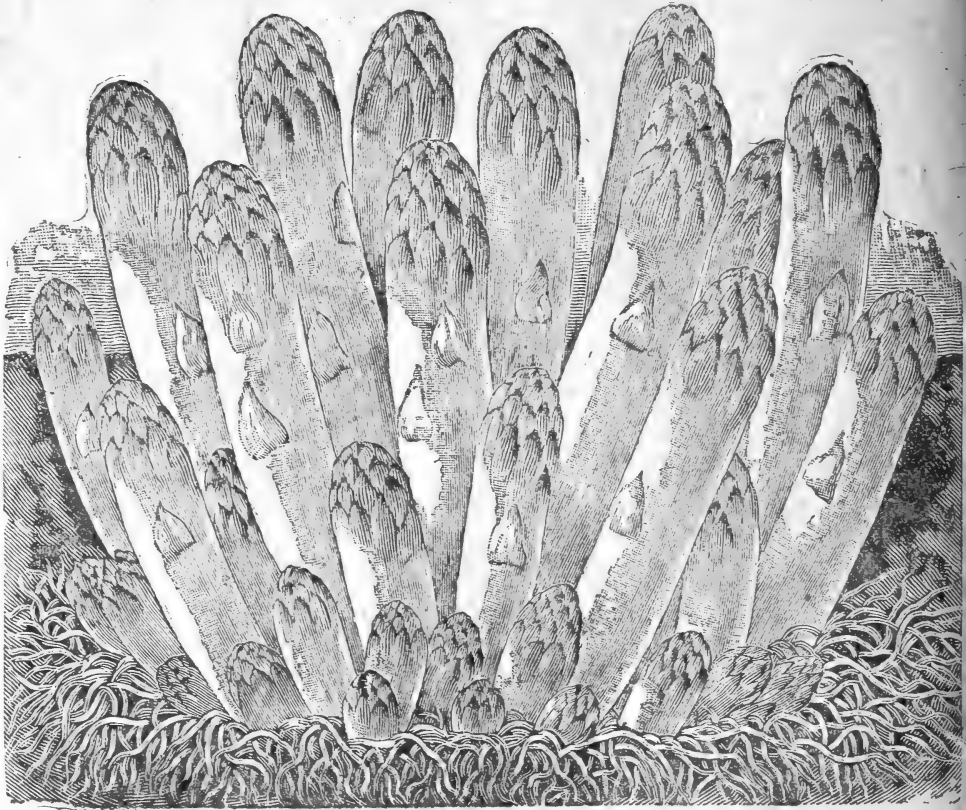

Special Offer of Magazine.

To those who order the above splendid collection of "The Best Vegetables" I will include a subscription to **Park's Floral Magazine** for a year, provided the order is received previous to July 1st, 1903. If already a subscriber give the name of some friend who would appreciate the Magazine, and it will be entered to your credit upon our list. By this offer the price of the collection is further reduced. I cannot conceive of a more liberal offer than this. Please bear this in mind when ordering. Address

GEO. W. PARK, La Park, Lancaster Co., Pa.

Asparagus, Columbian Mammoth.

1 packet 3 cents, 4 packets 10 cents, 1 oz. 5 cents, $\frac{1}{4}$ lb. 15 cents, 1 lb. 55 cents.

ASPARAGUS COLUMBIAN MAMMOTH WHITE.

The Asparagus is a delicious early spring vegetable, of easy culture. The strong shoots are cut and boiled for table use, and have the flavor of Sugar Peas. Sow in rows and cultivate well the first year. The next spring set the plants a foot apart each way, in a bed six feet wide. Soil should be deep and rich. Mulch annually with manure after the first cutting. In the fall remove the fading tops, and apply a good covering of stable litter as winter approaches, removing it in the spring. Once established a bed will last for fifteen or twenty years. The Mammoth Columbian White is a first-class variety, white and tender, early, very prolific, robust and of fine flavor. It is a distinct and beautiful variety, needs no earthing up as other sorts, and is not subject to disease. It is considered by many the best Asparagus in cultivation. 1 packet 3 cents, 4 packets 10 cents, 1 ounce 5 cents, $\frac{1}{4}$ lb. 15 cents, 1 lb. 55 cents.

Other Asparagus.—I can also supply seeds of Palmetto and Conover's Colossal Asparagus at same prices as above.

Artichoke, Large Globe.

1 packet 3 cents, 4 packets 10 cents, 1 ounce 25 cents.

This is a vegetable highly prized in France. The immature flower heads are used, being boiled. The tender pulp at the base of the scales is then eaten with condiments. The plants are very ornamental in foliage, and the composite flower heads large. Easily grown from seeds sown when the early fruit trees are in bloom. Bloom the second season. If grown at the North the plants must be protected over winter by a covering of pine brush and leaves or stable litter put on late, after removing the old stalks. Sow early and transplant, or else plant in the garden when the Peach is in bloom, in rows a foot apart, and thin the plants out. When established the plants will bear for several years. 1 packet 3 cents, 4 packets 10 cents, 1 oz. 25 cents, $\frac{1}{4}$ lb. 90 cents, 1 lb. \$3.50.

Jerusalem Artichoke.—I supply tubers of this sort—4 ozs. 10 cents, lb. 30 cents, 3 lbs. 75 cents. This Artichoke is used for pickles, and also as food for hogs. The plants will take care of themselves, and come up abundantly every season, even when apparently all the tubers have been lifted.

Bean, New Stringless Green-pod.

49

Ounce packet 3 cents, 3 packets (6 oz.) 10 cents.

This is the **Earliest, Hardest, Most Productive and Most Luscious** of Bush Beans. It is absolute stringless, and is tender, of fine shape and very meaty. These qualities it retains until matured. This greatly improved Bush Bean is without a rival. It is the best for early planting, and can be planted at intervals throughout the summer to have successive crops. The plants are practically free from rust or mildew, are of robust growth and bear freely for several weeks. It is **The Bush Bean** for those who want the best all-round variety. One oz. packet by mail 3 cents, 3 packets (6 oz.) 10 cents, $\frac{1}{2}$ pint 10 cents, 1 pint 18 cents, 1 quart 25 cents, by express 4 quarts 75 cents, 1 peck \$1.25, 1 bushel \$4.50.

Other Varieties of Bush Beans: Extra Early Refuge, Improved Golden Wax, Valentine Wax, etc., supplied at same prices as above.

BEAN, NEW STRINGLESS GREEN-POD.

Pole or Corn Bean.

By mail 1 oz. pkt. 3 cts., 4 pkts. ($\frac{1}{4}$ lb.) 10 cts.

I offer a very superior Pole or Corn Bean, and heartily recommend it. There is nothing better, and it has been named "Best of All." It is very early, of robust character, and exceedingly prolific. The large, round, heavy, fleshy green pods are about six inches long, are produced in big clusters—handfuls, and are entirely stringless. The Beans are large, white and of delicious flavor. When the pods are kept well picked the plants bear continuously, and any beans that are allowed to ripen are excellent to use in the dry state during winter. You never make a mistake in getting of this variety. It is a first-class bean for cooking, either green or dry. The engraving shows the vigorous growth and very productive habit of this superb climbing Bean. By mail, 1 oz. packet 3 cents, 4 packets ($\frac{1}{4}$ lb.) 10 cents, $\frac{1}{2}$ pint 15 cents, 1 pint 25 cents, 1 quart 50 cents, by express, 1 peck \$1.75, 1 bushel \$5.50.

Other Pole Beans.—Old Homestead, Early Golden Cluster, Scarlet Runner and Lazy Wife Beans, same price as "Best of All."

Lima Beans.

$\frac{1}{4}$ lb. mailed, 10 cent.

Early Jersey, Dreer's Improved, Extra Large White, Siebert's Early Lima and Small White, $\frac{1}{4}$ lb. mailed 10 cents, 1 peck expressed \$1.75, 1 bushel \$6.00. Dreer's, Henderson's and Burpee's Dwarf Lima Beans, same price.

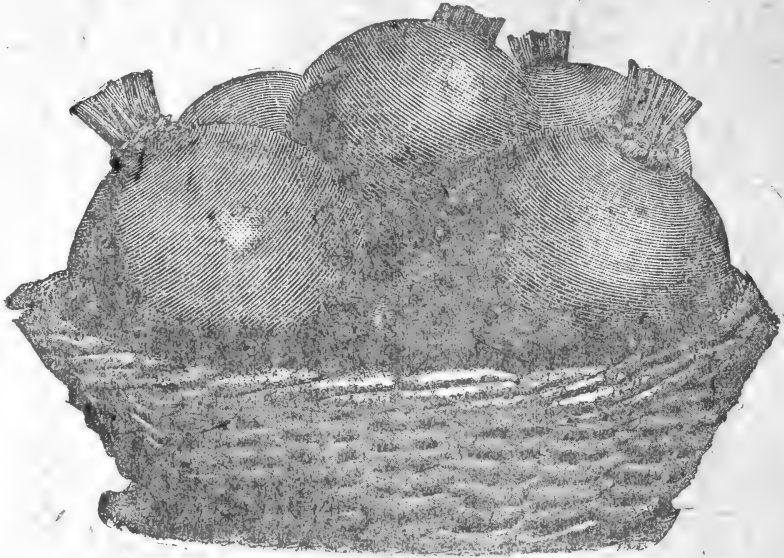

Bean Culture.—Plant Bush Beans when the Apple is in bloom, in rows, one quart to 100 feet of drill. The Pole or running sorts plant a week later, 5 or 6 beans in a hill, with space in the center for the support. When well started thin to three plants in a hill. Beans like a rich, sandy loam, an open, sunny place, and good cultivation. Give support early.

POLE OR CORN BEAN, BEST OF ALL.

New Crimson Globe Beet.

Price 3 cents per packet, 4 packets 10 cents, 1 oz. 8 cts, $\frac{1}{4}$ lb. 25 cents, 1 lb. 75 cents.

NEW CRIMSON GLOBE BEET.

I am pleased to offer this new Beet, that has been found in England and wherever tried in the United States to be thoroughly satisfactory. It is of medium size, globe-shaped, with dark leaves on slender stems. It comes to maturity early, and the flesh is exceedingly tender, absolutely free from stringyness or woodyness, and is of a very beautiful dark crimson color with handsome rings or zones. It is very rich and sweet, and of a delicious flavor. The roots are fine for summer and fall use, and keep well in barrels of soil in the cellar or buried in the garden. It is really a first-class variety, and you cannot mistake in planting largely of it. Price, 3 cents per packet, 4 packets 10 cents, 1 oz. 8 cents, $\frac{1}{4}$ lb. 25 cents, 1 lb. 75 cents.

Other Varieties: I can supply Edmand's Turnip, Detroit Dark Red Turnip, Bassano, Long Blood Red, Extra Early Eclipse, Crosby's Egyptain, Giant Yellow Mangel Wurzel, Golden Tankard, Mammoth Long Red and Vilmorin's Improved Sugar Beet, at 3 cents per packet, 4 packets 10 cents, 1 oz. 5 cents, $\frac{1}{4}$ lb. 15 cents, 1 lb. 50 cents. In quantity I can supply the Stock Beets at special rates.

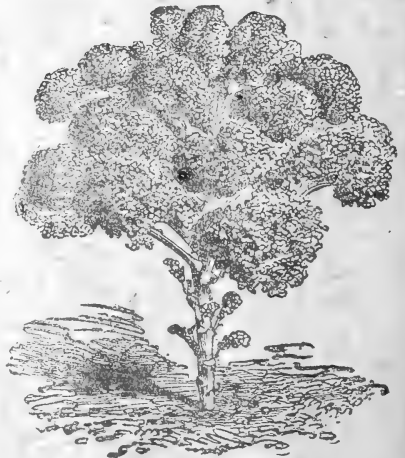

Culture.—A rich, well fertilized mellow loam suits the Beet. For very early use plants may be started in a box in the house or in a hot-bed. They come quickly, however, sown in the garden as early as the ground can be worked. Drill thinly in rows a foot apart, and thin the plants to five or six inches apart, cultivate well. For keeping pull and top before freezing weather comes, and pack with buckwheat hulls or chaff in barrels in the cellar. Or, they may be heaped on the ground, covered with straw, then clay, and further protected by a layer of corn fodder, put on so as to turn the rain.

Borecole or Kale.

1 pkt. 3 cts., 4 pkts. 10 cts., 1 oz. 8 cts., $\frac{1}{4}$ lb. 25 cts., 1 lb. 90 cts.

This is a beautiful Vegetable of the Cabbage family. Sow the seeds in the spring, and transplant, just as you do Cabbage. The plants have elegant curled leaves which retain their color and beauty far into the winter, and are ready for use at anytime. The leaves are cut and boiled and used as greens. They are very palatable and nutritious, and as the plants are of easy culture those who become accustomed to their use will not do without a bed of the plants. The variety offered, Half-dwarf Scotch, is the best for general use, as it possesses merits of both tall and dwarf sorts, is compact, bushy, has exquisitely crimped green leaves, with yellowish center, and can be used for garnishing. It is very hardy, and will endure the most severe weather uninjured.

Other Varieties.—I can also supply Dwarf German, Palmetto and Variegated at same price. Properly grouped these plants make an elegant bed for decoration during late fall and early winter.

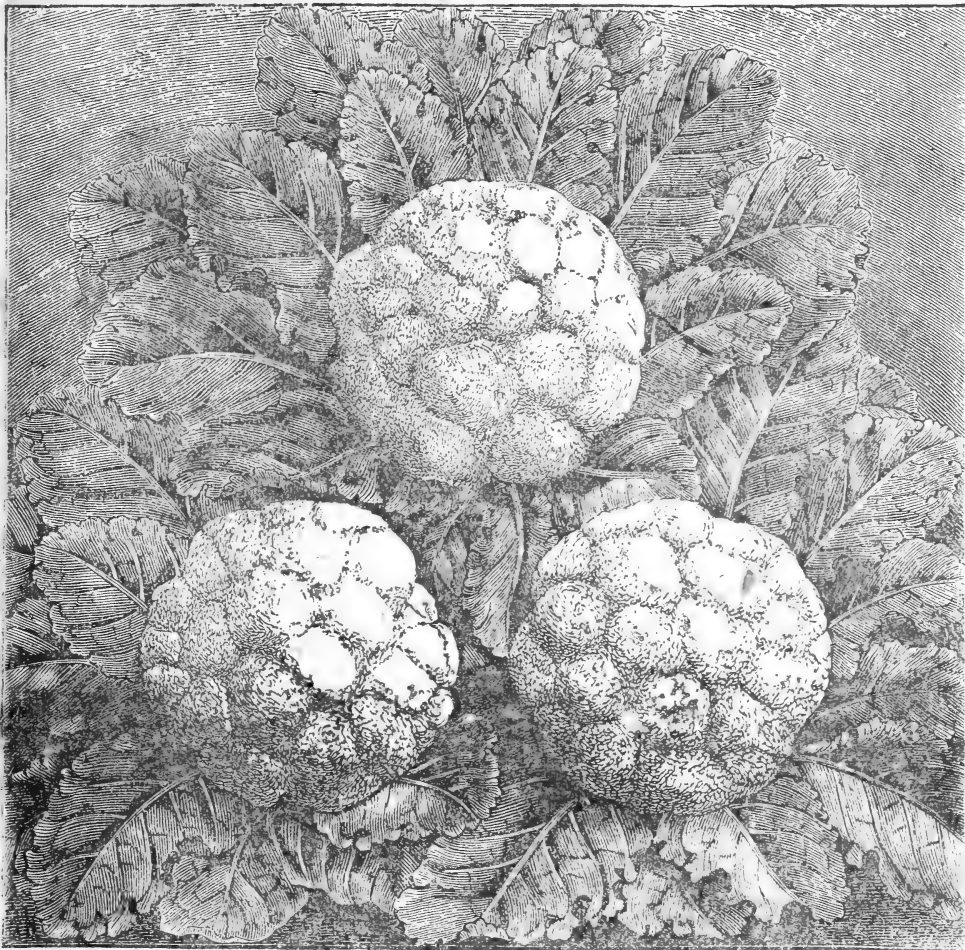

BORECOLE.

Cauliflower, Veitch's Autumn Giant.

51

1 pkt. 3 cents, 4 packets 10 cents, $\frac{1}{4}$ oz. 15 cents, 1 oz. 40 cents, $\frac{1}{4}$ lb. \$1.25, 1 lb. \$4.85.

CAULIFLOWER, VEITCH'S AUTUMN GIANT.

The Cauliflower is the most delicious of the Cabbage family. The fleshy, blooming head is used, prepared as Cabbage, which it resembles in flavor and taste, but is much more delicate and tender. The plants like a rich, moist soil, and cool situation, as the north slope of the garden. Most cultivators buy the Early Snowball variety and start the seeds in a hot-bed in February or March, the plants heading for use in June or July. I offer a Giant Autumn sort, however, which is said to excel all others for amateur cultivation. The plants are started and treated as late Cabbage. This sort yields splendid compact heads of the largest size, white and exceedingly tender. It is the most desirable sort known, sure to head, has abundant leaves to protect it, and may be used longer than other varieties. See prices above.

Other Sorts.—Improved Snowball, very early, 1 packet 3 cents, 4 packets 10 cents, $\frac{1}{4}$ oz. 75 cents, 1 oz. \$2.50, $\frac{1}{4}$ lb. \$8.00.

Cucumber, Improved Early White Spine.

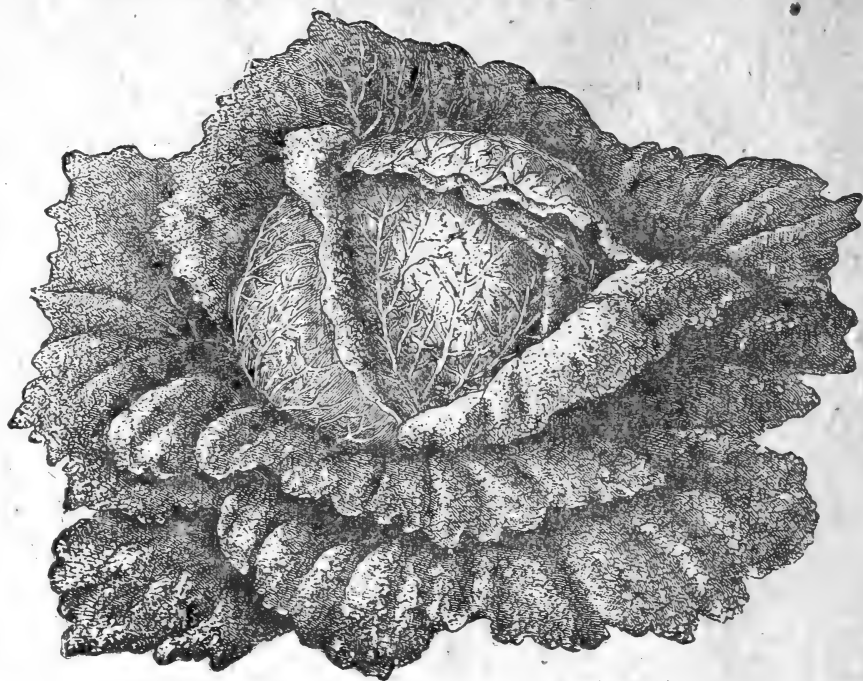

1 packet 3 cents, 4 packets 10 cents, 1 oz. 15 cents, $\frac{1}{4}$ lb. 50 cents, 1 lb. \$1.50.

The Improved Early White Spine is one of the best varieties for either slicing or pickling. The fruit is tender and crisp, comes early, and is produced in great abundance. The crop of Cucumber seeds this year is very short, but I have a good stock of this splendid variety, and hope to be able to supply all my patrons. I can also supply Improved Long Green. One packet 3 cents, 4 packets 10 cents, 1 ounce 15 cents, $\frac{1}{4}$ lb. 50 cents, 1 lb. \$1.50.

New Early Spring Cabbage.

1 packet 3 cents, 4 packets 10 cents, $\frac{1}{2}$ oz. 12 cents, oz. 20 cents, $\frac{1}{4}$ lb. 75 cents, 1 lb. \$2.50.

NEW EARLY SPRING CABBAGE.

The Earliest Cabbage in Cultivation. Round heads, small veins, highest quality. Every plant produces a fine head.

The New Early Spring is now considered the most desirable and profitable Extra Early Cabbage in cultivation. It is as early as the earliest Jersey Wakefield, has very solid, crisp, sweet heads, and will produce a third more cabbage to the acre than any other early variety. For market gardeners' use it is without a rival, as it is sure to develop fine heads early, for which there is always a demand. There are but few outer leaves, and the plants can stand 21 inches apart, thus 13,000 plants may be set to the acre, almost every one of which will produce a good, marketable head. Every gardener should have a patch of this superb Early Cabbage. The seeds I offer are pure, and of the finest strain. Be careful to avoid the spurious seeds offered of this variety. 1 packet 3 cents, 4 packets 10 cents, $\frac{1}{2}$ ounce 12 cents, ounce 20 cents, $\frac{1}{4}$ pound 75 cents, 1 pound \$2.50.

Other Early Varieties.—Besides the Early Spring Cabbage, described above, I can also supply Extra Early Wakefield, Charleston Wakefield, Winningstadt, Early Flat Dutch, Early Drumhead, same price as Early Spring.

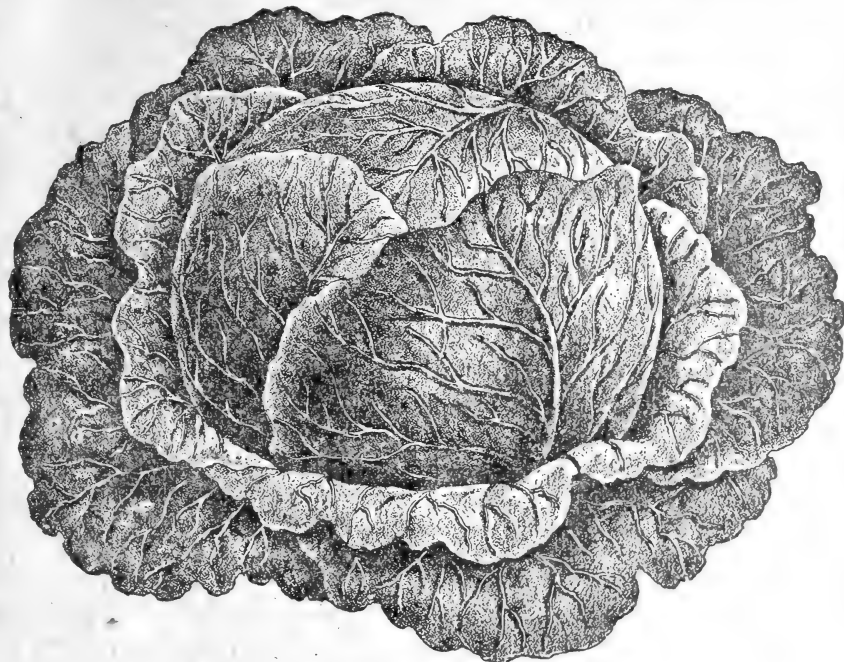

Pickling Cabbage.—I offer a fine strain of seeds of the Red Dutch Cabbage for pickling. It is a beautiful variety for chow-chow, for stuffing the big Columbus Peppers, and for slicing and pickling. The heads of this fine variety are of good size, and of fine quality. 1 pkt. 3 cts., 4 pkts. 10 cts., $\frac{1}{2}$ oz. 10 cts., 1 oz. 15 cts., $\frac{1}{4}$ lb. 50 cts., 1 lb. \$1.75.

Cabbage Culture.—The soil should be deep, mellow and rich to produce the finest heads. Sow seeds for early use in a hot-bed or boxes in February, and transplant to shallow boxes or trays. As soon as danger from severe frosts is past bed them in the garden in rows 21 inches apart, placing the plants 18 inches apart in the rows. Always set the plants as deep as the stems will allow. They will root at every joint, and will grow better and withstand drought better than if set shallow. For this reason long-stemmed young plants are preferable. Avoid covering the crown, however, as that would destroy the plant. For late Cabbages start the plants later, and set two feet apart in rows three feet apart. Cultivate freely and mulch the ground with manure as hot weather approaches. To keep beetles from young plants dust with wood soot while the dew is on. To avoid butterfly larvæ dust with plaster, wood ashes or road dust. One ounce of seed yields 2500 plants. Four ounces will yield plants for an acre.

Storing Cabbage.—To keep Cabbages over winter remove the stems and arrange the heads closely, crowns upward, making a long pyramidal row. This should be upon ground well drained. Then dig a trench at each side, about eight inches from the pile, and throw the soil up, covering several inches. Over the soil place boards to prevent the access of water. As severe weather approaches cover still further with corn fodder or rye straw. If this method of burying Cabbage is properly carried out the heads keep well till spring.

True Danish Ballhead Cabbage.

1 packet 3 cents, 4 packets 10 cents, $\frac{1}{2}$ oz. 12 cents, 1 oz. 20 cents, $\frac{1}{4}$ lb. 75 cents, 1 lb. \$2.50.

TRUE DANISH BALLHEAD CABBAGE.

The Most Solid, Best-keeping, Surest-heading, Most Profitable Cabbage in the World.

For the family and market garden the True Danish Ballhead Cabbage has become deservedly popular. The plants from our choice imported seeds are sure to head, the heads being as round as a ball, exceedingly close and hard, with few outer leaves, making it possible to set the plants closer together than other varieties, thus producing more heads to the acre. Cut lengthwise the heads show a white, almost smooth surface, with little core, and when eaten with salt, as you eat Celery, it is crisp, tender, close-grained, sweet and rich-flavored, without bitterness or stringiness. For cooking it is unsurpassed. The heads are of medium size, and much more convenient to handle than the Hundred-weight Cabbages, and they keep better than those of any other variety, coming out in the spring hard and uninjured. There is no more productive or desirable Cabbage for the market or family garden than the True Danish Ballhead. My seeds came direct from the celebrated Danish grower of this famous Cabbage, and were saved from carefully selected heads of his highly improved strain. They will be found far superior to those offered by many dealers as Danish Ballhead, for much of the seed offered is imported from Dutch and French growers. To be sure of the True Danish Ballhead Cabbage, get seeds of the finest strain, produced by a careful grower in Denmark. You are then sure to get of the short-stemmed, sure-heading, long-keeping variety.

To Large Growers.—Let me tell you that you can get no more profitable Cabbage than the True Danish Ballhead for field Cabbage. A market gardener in New York State had ten acres of this Cabbage, and raised nine tons to the acre, disposing of the product by the carload at \$9.00 per ton. Another set out 45,100 plants and raised 45,000 heads, which he sold at an average of 4 cents a head, or \$1800.00. You cannot err in planting largely of this wonderful variety. I offer but one grade of seed, and that is the best to be obtained. No better strain is offered, no matter what the price.

Other Varieties.—Besides the True Danish Ballhead Late Cabbage, above described, I can also supply Excelsior Late Flat Dutch, Excelsior Late Drumhead, Sure-head, Autumn King or World Beater, Drumhead Savoy, Green Curled Savoy and Red Dutch Pickling. Same prices as Ballhead.

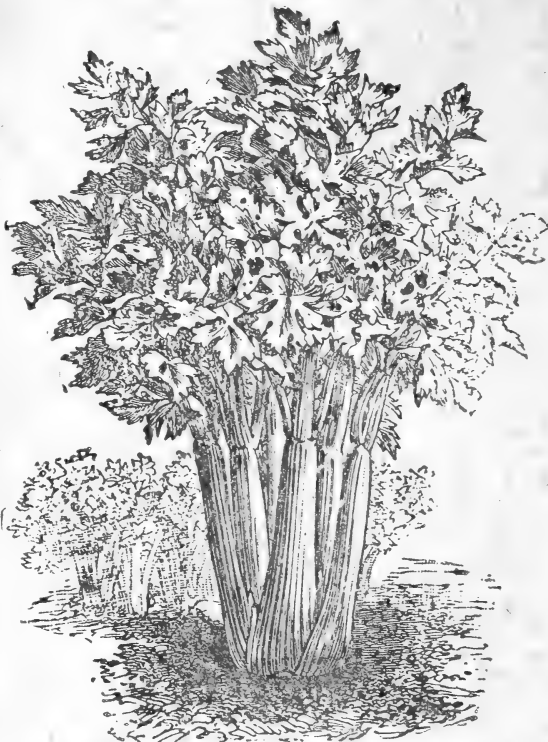

Note.—A very important point in successful Cabbage culture is to avoid the bursting and loss of the heads as they are maturing in the late autumn. By growing the True Danish Ballhead you are not likely to be troubled in this way, as it is almost proof against bursting.

Bursting in heads of varieties subject to this fault may be checked by bending or pulling till the roots are broken or injured, thus preventing further growth. The fault appears especially during or after a protracted Fall rain. Apply the remedy promptly.

Celery, New Golden Rose-ribbed.

1 packet 3 cents, 4 packets 10 cents, $\frac{1}{2}$ oz. 15 cents, 1 oz. 25 cents, $\frac{1}{4}$ lb. 90 cents, 1 lb. \$2.75.

CELERY, NEW GOLDEN ROSE-RIBBED.

Celery has become a justly popular vegetable, and there are few gardens where a trench of it is not seen. It is of easy culture. Sow in rows in the garden and shade the young plants for a week. Keep free from weeds, and cut the tops back when a few inches high, to make the plants stocky. Set the plants in shallow trenches four feet apart, pressing the soil firmly about the roots, and watering. When the stems show gather the leaves in a bunch and draw the soil around them, pressing it well. Do this every fortnight. Avoid covering the leaves with soil, as that will cause decay. Fertilize the soil before planting with manure from the horse stable, adding a quantity of salt, all well incorporated. The New Rose-ribbed is a golden, self-bleaching sort, very beautiful, quick-growing, tender and crisp, and of very superior, nutty flavor. It is a good keeper, and the most desirable sort on the market today. Price 1 packet 3 cents, 4 packets 10 cents, $\frac{1}{2}$ oz. 15 cents, oz. 25 cents, $\frac{1}{4}$ lb. 90 cents, 1 lb. \$2.75. Other sorts, Giant Pascal, White Plume and Pink Plume, 1 packet 3 cents, 4 packets 10 cents, $\frac{1}{2}$ oz. 15 cents, 1 oz. 25 cents, $\frac{1}{4}$ lb. 50 cents, 1 lb. \$1.50. The Giant Pascal is unsurpassed for winter use.

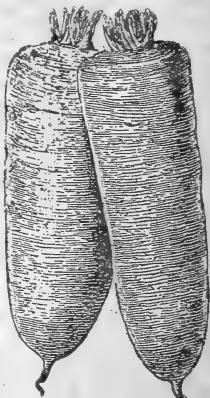

Carrot, Chantenay or Model.

Price, 1 packet 3 cents, 4 packets 10 cents, $\frac{1}{2}$ oz. 8 cents, $\frac{1}{4}$ lb. 25 cents, 1 lb. 75 cents.

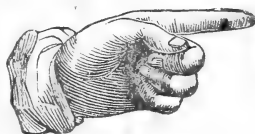

The Carrot is an excellent vegetable, easily grown, and should be more popular. The Chantenay or Model is the finest sort for garden use. The flesh is deep red, of fine texture and sweet and sugary. The roots mature very early, are stump-rooted, always smooth and very tender. This sort yields abundantly either in garden or field. Sow in drills fifteen inches apart, and thin to four inches apart. Seeds start slowly, and the young plants must be thinned promptly to prevent smothering. Price, 1 packet 3 cents, 4 packets 10 cents, 1 oz. 8 cents, $\frac{1}{4}$ lb. 25 cents, 1 lb. 75 cents.

Other Sorts: Early Scarlet Horn, Oxheart, Improved Long Orange, same prices.

All of the Carrots are very valuable for feeding stock. They are sown in rows eighteen inches apart, using a seed drill, and are cultivated with a wheel hoe. Four pounds of seeds will sow an acre, and the yield is certain and large. The roots contain much sugar, and are very nutritious and are relished by stock. They should be more largely grown.

MODEL CARROT.

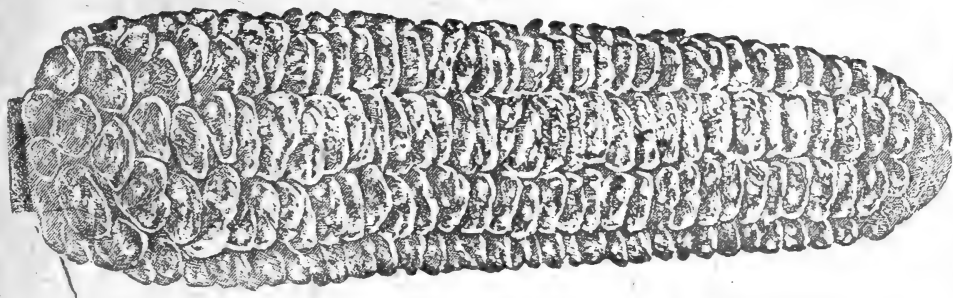

Park's Choice Seeds OF VEGETABLES

Are unsurpassed in Quality and unapproached in Price. They not only grow but produce the finest crops. Fully half of the varieties offered by most seedsmen are unworthy of attention, and the other half ought to be rogued. The sorts here offered are all of exceptional value, and the seeds are fresh and of the finest strains. You will not err in securing all of your Vegetable Seeds of Park. Market gardeners and large users as well as private gardeners will save money by buying Park's Seeds. Write for special quotations on large quantities. Address

GEO. W. PARK, Lapark, Lancaster Co., Pa.

Sweet Corn, New Early Giant.

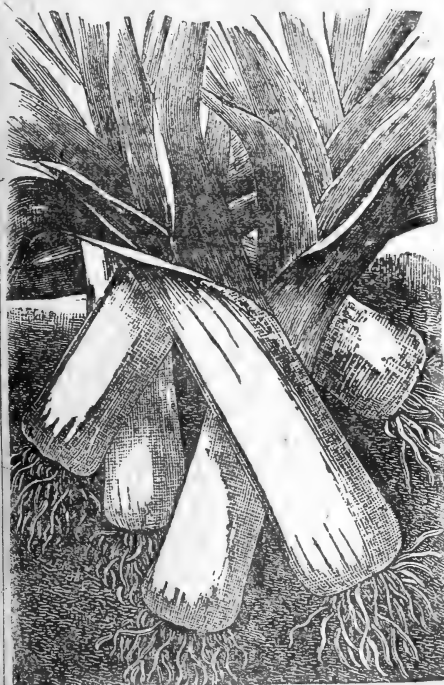

1 packet (2 ozs.) 5 cents, 3 packets 12 cents, $\frac{1}{2}$ pint 13 cents, 1 pint 25 cents, 1 quart 45 cents, mailed.

SWEET CORN, NEW EARLY GIANT.

The New Early Giant Sweet Corn has the qualities of a first-class variety. It is very early, coming in from eight to ten weeks, bears large ears, grows well and produces abundantly in either sandy or clay soil. Market gardeners find it the most profitable Sweet Corn for their trade, and are planting largely of it. Several plantings can be made to have a supply throughout the season. This Corn is of surpassing quality. It is white, very sweet and tender, and keeps in a usable state for a long time. You make no mistake in getting this new, valuable Sweet Corn. Prices as above.

Other Varieties.—Early Corry, Country Gentleman, Improved Sugar and Egyptian Sweet, same price as New Early Giant.

LEEK, LARGE AMERICAN FLAG.

Leek, Large American Flag.

1 pkt. 3 cts, 4 pkts. 10 cts, 1 oz. 8 cts, $\frac{1}{4}$ lb. 25 cts, 1 lb. 85 cts

The Leek is a vegetable similar to the Onion in flavor, and requires similar treatment. It is largely used for the table in early spring, before other vegetables come. Sow early in spring in rows two feet apart, and thin the plants till they stand five inches apart. The culled plants can be set out, placing them deep—to the leaves. These will produce earlier and larger specimens. Earth up after the manner of growing Celery, to blanch the thick stems. They may then remain in the bed till wanted for use in the spring. The large, broad-leaved variety I offer is the true hardy kind, and produces tender stems of a mild, sweet, pleasant flavor. I offer only the best quality. Prices given above.

The Book of Gardening, an English work, says, "The Leek is so hardy and useful as a Winter Vegetable that we are surprised it is not more frequently grown. Well grown and nicely blanched Leeks are always a telling dish in a collection of Vegetables. For ordinary crops sow in drills early in March, and when the plants are six inches long plant out in deeply worked rich soil, using a digger to make a good deep hole, covering the roots with a little soil. As the plant grows the hole should be gradually filled up with soil, thus giving a much greater length of blanched stem than when put on the level or surface."

Kohl Rabi, Early White Vienna.

1 packet 3 cents, 4 packets 10 cents, 1 oz. 15 cents, $\frac{1}{4}$ lb. 50 cents, 1 lb. \$1.75.

This is an excellent Vegetable of easy culture, having the combined flavor of Turnip and Cabbage. The bulb is formed above ground, grows quickly and is tender and palatable. The Early White Vienna is the best sort for general cultivation. Sow and transplant just as you would the Rutabaga. Begin using as soon as large enough. Sown late they are fine for fall and winter use. Store as you would Turnips. Sometimes called Turnip-rooted Cabbage. Good for stock, for which sow in rows eighteen inches apart and thin to eight inches apart in the rows. Grows freely wherever Cabbage can be raised. Use a wheel hoe in cultivating them.

KOHL RABI.

Lettuce, New York.

1 packet 3 cents, 4 packets 10 cents, 1 oz. 8 cents, $\frac{1}{4}$ lb. 20 cents, 1 lb. 75 cents.

LETTUCE, NEW YORK.

The New York Lettuce is regarded by many persons as the best all-round Lettuce for general use. The plants are of robust, quick growth, form heads of immense size, measuring fifteen inches or more across, compact and heavy. The outside leaves are yellowish green, and those inside are blanched creamy white, thus giving them a fine appearance when served. They are very crisp and tender, absolutely free from bitterness, and are delicious. The plants have long, deep roots that enable them to resist hot weather and drouth, and they do not quickly run to seed. If you cultivate but one variety of Lettuce it should be the New York. It stands without a rival.

Other Sorts: Improved Hanson, Big Boston, Salamander, Trianon, same prices as New York Lettuce.

Culture: Sow in rows eighteen inches apart, and thin to twelve inches apart in the rows. Big Boston is a good forcing variety for early planting in the house, transplanting to the garden later, or protecting by a frame. The plants well repay good culture and good fertilizing.

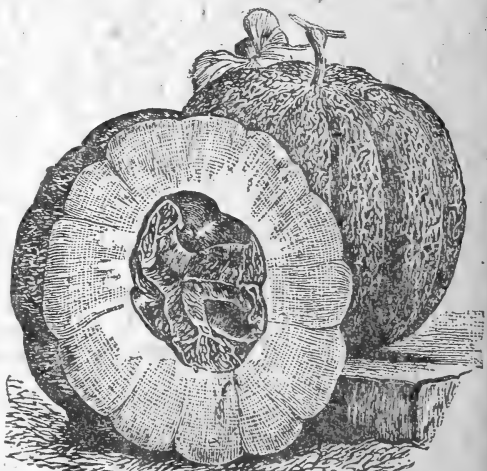

Muskmelon, Rocky Ford.

1 packet 3 cents, 4 packets 10 cents, oz. 8 cents, $\frac{1}{4}$ lb. 25 cents, 1 lb. 75 cents.

This is regarded as a first-class Melon. The plants are thrifty and bear abundantly. The fruit is of medium size, begins to ripen early and continues in bearing for a long time. The rind is thin, yellowish green, closely netted, and gives the fruit a very attractive appearance. The seed cavity is small, the flesh thick, fine-grained, very sweet, of exquisite flavor, and ripens evenly throughout. Every melon is of good quality. A fine sort for either private or market gardens.

Other Sorts: Emerald Gem, Tip-Top, Hackensack, Acme, Jenny Lind. Same price as Rocky Ford.

Culture.—Select a warm, sunny exposure, mark off hills six feet apart, mixing manure well with the soil, and adding sand, if there is a lack of it. Plant a dozen seeds in a hill, and thin to four or five plants. If the growth is rank pinch the points of branches to induce blooming. 1 oz. will plant about 50 hills. To avoid bugs plant late in season. To avoid blight, change the location of the patch often. Mulching the ground just as the plants begin to run is beneficial. Everyone should give them a trial.

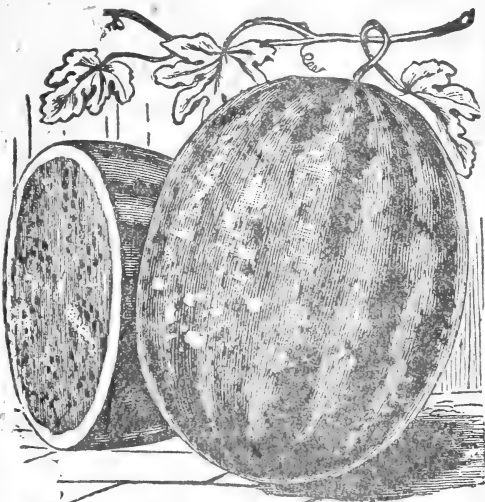

MUSKMELON, ROCKY FORD.

Watermelon, Early Sweet.

1 packet 3 cents, 4 packets 10 cents, 1 ox. 8 cents, $\frac{1}{4}$ lb. 20 cents, 1 lb. 60 cents.

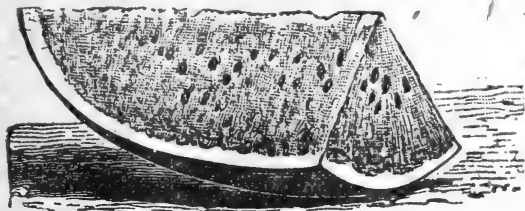

Here is a melon unexcelled in earliness, bears abundantly, is of first-class quality, and just suited to the private gardener. The plants are hardy and thrifty, and not only show ripe fruit early, but keep up the supply until frost. The melons are of medium size, uniform, rather oblong, and handsomely marked. The flesh extends to the thin rind, is solid, crisp and sparkling, of a rich pink, very sweet, melting and delicious. There are but few seeds, and the texture is fine-grained, very delicate, and devoid of the pith or core which is found in some varieties. The plants like a sandy soil and southern slope, but do well in almost any situation, ripening melons in northern sections where the culture of this garden product is a novelty. The use of this superb melon adds another charm to the northern garden. Try it.

Other Sorts.—Dixie, Phinney's Early, Fordhook, Kolb's Gem and Mountain Sweet. Prices as above.

WATERMELON.

Culture.—Dig holes 18 inches deep, when the Apple is in bloom, and in the bottom place eight inches of well-rotted manure; then fill up with rich, sandy soil. On this plant the seeds and cover with equal parts sand and loam. Cultivate well and water with weak liquid manure once a week. This will prove especially beneficial during dry weather.

Okra, Early Dwarf Prolific.

1 packet 3 cents, 4 packets 10 cents, 1 oz. 5 cents, $\frac{1}{4}$ lb. 15 cents, 1 lb. 50 cents.

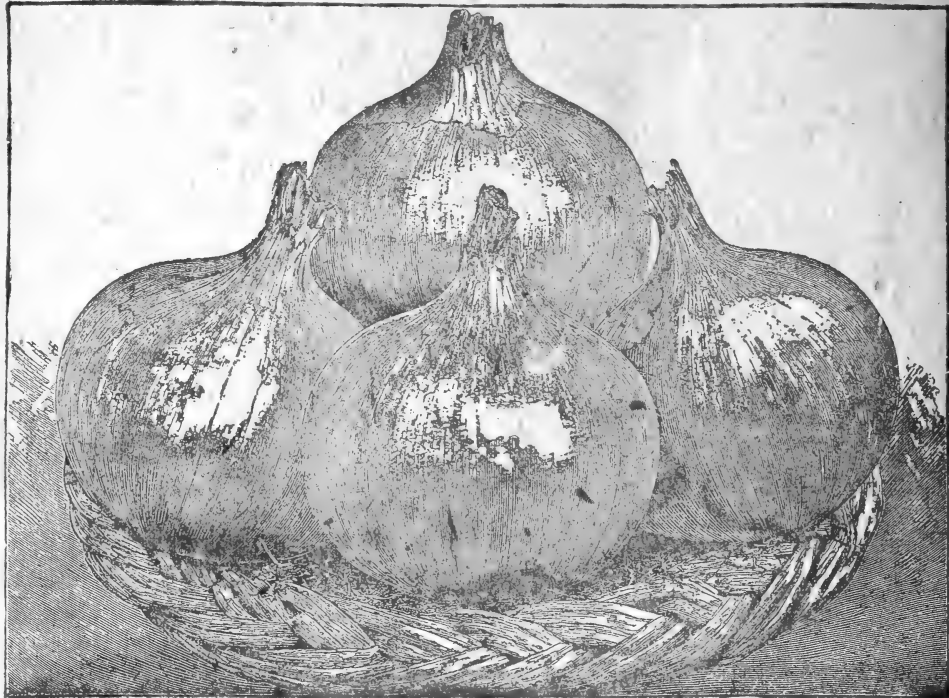

OKRA, EARLY DWARF PROLIFIC.

Okra is a delicious and wholesome vegetable for soups and stews, and is also prized when pickled and used as a salad. Gather the pods when young and tender, slice them, cook separately, or with other ingredients. They may be used either green or dry. They are much appreciated in the South. At the North it is important to grow an early variety, and this we have in the Early Dwarf Prolific. The plants are of compact habit, begin to bear early, and produce an abundance of handsome pods, tender and of fine flavor. They grow in any rich, warm soil. Sow in drills three feet apart, and thin to one foot apart. Price, 1 packet 3 cents, 4 packets 10 cents, 1 oz. 5 cents, $\frac{1}{4}$ lb. 15 cents, 1 lb. 50c.

We often do not appreciate the more rare vegetables, because of the lack of knowledge of their merits, and because a taste for them has not been cultivated. In some countries Corn is considered only as food for stock, and Tomatoes are cultivated only as a curiosity or for ornament. Here we appreciate both. But we might enlarge our variety by adding the less-known vegetables to our list, and cultivating a taste for them. Asparagus, Okra, Borecole, Broccoli, Brussels Sprouts, Cauliflower, Egg Plant, Kohl Rabi, Salsify, Spinach and Rutabaga Turnips are all comparatively but little known in country gardens. If introduced and cultivated and used for

Onion, Australian Brown.

1 packet 3 cents, 4 packets 10 cents, 1 oz. 8 cents, $\frac{1}{4}$ lb. 20 cents, 1 lb. 75 cents.

ONION, AUSTRALIAN BROWN.

Decidedly the most popular Onion to-day where its merits are known. It can be grown everywhere from seeds in one season, the bulbs maturing several weeks earlier than the red Wethersfield, and equals that famous sort in solidity, tenderness and sweetness. The bulbs will not go to seed the first season, and for keeping they are not surpassed by those of any other Onion. Bulbs will keep for a year after maturing. Very profitable to grow for sets on account of its keeping qualities. The plants never fail to form bulbs, and succeed where other varieties are unsuccessful. The color is a golden brown, shape rather globular, and in size will compare favorably with the Wethersfield. The seeds I offer are fresh and of the finest quality. Avoid inferior seeds.

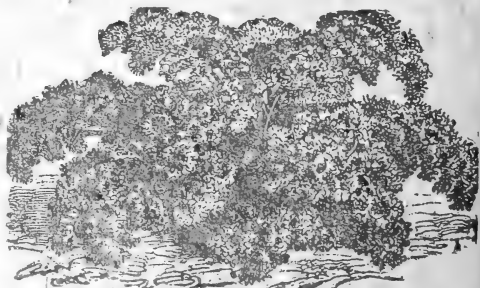

Other Varieties.—Early Red Wethersfield, Extra Early Red, Yellow Danvers, Red Globe, White Globe, Yellow Globe, Silver Skin. 1 packet 3 cents, 4 packets 10 cents, 1 ounce 15 cents, $\frac{1}{4}$ pound 50 cts. 1 lb. \$1.50. For these sorts in quantity write for prices.

Culture.—Sow in the spring, as early as the ground can be worked, in drills a foot apart. Thin the plants till they stand three or four inches apart in the rows. Cultivate freely, and keep free from weeds. If wanted for sets sow thickly, and pull when large enough, allowing them to ripen in the sun. The early sorts will develop fine bulbs the first season, with good culture.

Parsley, Champion.

1 packet 3 cents, 4 packets 10 cents, 1 ounce 6 cents, $\frac{1}{4}$ pound 25 cents, 1 pound 50 cents.

This is a popular garden plant for seasoning soups and meats, and for garnishing and table decoration. The foliage of the Moss-curl is finely cut and crimped, of a rich green, and very beautiful. Being of dense, dwarf habit the plants are often used as an ornamental edging. The seeds require three or four weeks to germinate. Sow early in spring in rows a foot apart, and thin the plants to 6 inches apart. One ounce will drill 150 feet.

PARSLEY, CHAMPION MOSS-CURLED.

PARK'S VEGETABLE SEEDS are always reliable. When you plant them you are sure of a crop, for they are fresh, sparkle with vitality, and never fail to grow. Still more, they produce the best vegetables that can be obtained, and an abundance of them. Only the choicest varieties are offered. It is poor economy to buy and plant inferior seeds. If you buy Park's Seeds you run no risks. They never disappoint.

Parsnip, Improved Guernsey.

1 packet 3 cents, 4 packets 10 cents, 1 ounce 5 cents, $\frac{1}{4}$ pound 10 cents, 1 pound 35 cents.

I offer a greatly improved strain of Sugar Parsnip. The roots are large, thick, or handsome, tapering shape, grow quickly and mature early, of fine texture, exquisitely tender and sugary. This Parsnip is a heavy cropper, producing uniformly large, smooth roots, easily dug. It is the most desirable variety for either garden or field culture. Being perfectly hardy the roots may be left in the ground where they grew throughout the winter, and are improved by frost. They cook easily, are devoid of stringiness or core, are of exquisite flavor, and as a table dish are deliciously rich and sweet. A bed of this highly improved Parsnip should be found in every family garden, and for the market gardener no other Parsnip can surpass or equal it. The seeds I offer are fresh and can be depended upon for a fine crop.

Culture.—Sow the seeds as early in the spring as the ground can be worked. Sow in drills $1\frac{1}{2}$ feet apart, and thin to six inches apart. The ground should be deep, rich, and free from stones. Cultivate freely till the plants get well started. The seeds must be fresh to start well. Good seeds, however, will sometimes fail from unknown causes, and replanting is then necessary. If sown late in the fall the growth is often greatly advanced, and good roots may thus be obtained for early fall use. Their sweetness and flavor, however, are wonderfully improved by frost.

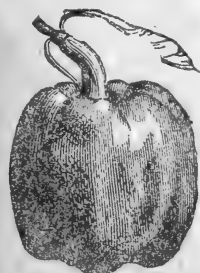

PARSNIP, IMPROVED GUERNSEY.

One ounce will plant 200 feet of drill, and five or six pounds are required for an acre.

Pepper, New Columbus.

1 packet 3 cents, 4 packets 10 cents, $\frac{1}{2}$ ounce 15 cents, 1 ounce 25 cents, $\frac{1}{4}$ pound 75 cents, 1 pound \$2.50.

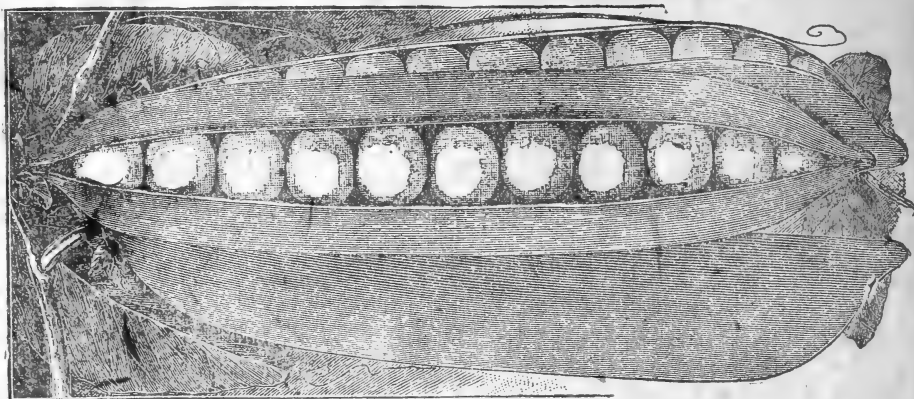

The New Columbus Pepper is a Bull-nose of the largest size. The plants grow vigorously, branch freely, and become shapely little bushes, every branch weighted with immense, smooth, shapely fruits, some red and some golden yellow when ripe. They are mild and sweet in flavor, pleasant to the taste, and being from four to six inches long and three or four inches in breadth they are unsurpassed for stuffing. They can even be sliced and eaten with vinegar.

Other Sorts.—I have 20 other varieties, various in size and shape, including Long Red, Cayenne, Cherry, etc. Same prices as above.

Culture.—Sow in a frame or in a window box early, and transplant two feet apart in a rich, warm bed, when danger from frost is past. Later seeds may be sown in the garden. Mulch with stable litter as hot weather approaches. Do not plant the hot and mild varieties in the same bed as they will mix. An ounce of seeds will make 1000 plants.

Pea, Champion of England.

2 oz. packet 5 cents, 4 packets 15 cents, 1 pint 18 cents, 1 quart 35 cents, 1 peck \$1.20, 1 bushel \$4.25.

PEA, CHAMPION OF ENGLAND.

There is no Pea in cultivation that surpasses the selected strain of Champion of England here offered. The plants grow four or five feet high, branch freely, and produce great pods of deliciously sweet and fine flavored Peas, green, wrinkled and in wonderful abundance. Everybody likes this superb Pea, and there is no more productive or profitable or satisfactory variety to be obtained. You never regret planting our Champion of England Peas. They never disappoint you.

Other Varieties: Philadelphia Extra Early, First and Best, Everbearing, Heroine, Large White Marrowfat, same price as Champion of England.

Culture.—Sow in double rows three feet apart, with six inches between the rows for bushing. The smooth-seeded sorts may be sown as early as the ground can be worked, and the wrinkled varieties later. They can be sown at intervals of two weeks till June for a constant succession, then sow the early sorts for fall use.

Radish, New Cardinal White-tip.

1 packet 3 cents, 4 packets 10 cents, 1 oz. 5 cents, $\frac{1}{4}$ lb. 15 cents, 1 lb. 55 cents.

Here is the earliest Radish known, and one of the most beautiful. It is long, of a bright Cardinal scarlet, tipped white, as shown in the engraving. It is very hardy, comes quickly, and does not run to seed as early as most early Radishes. It is deliciously crisp, sweet and nutty, as well as beautiful. Sown early the roots are ready for use in 24 to 30 days. A fine market sort, as its beauty and quality makes it always attractive and in demand.

Other Sorts. French Breakfast, White Turnip, Long Scarlet, Cincinnati Market, Early Deep Scarlet, White-tip Scarlet Ball, Chinese Rose Winter, Chartier, Golden Globe, White Vienna, Scarlet China Winter, Strasburg, etc., same price as above.

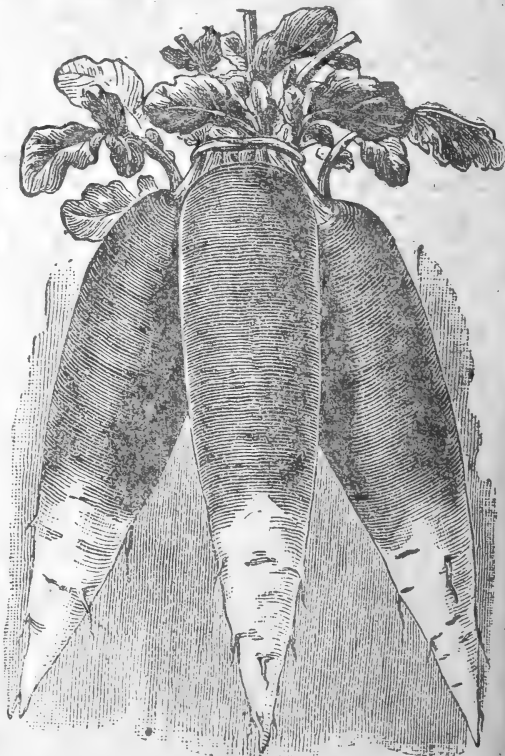

Culture.—A sandy loam is best. Sow in drills a foot apart as early as the soil can be worked, and thin out as they grow. Quick growth insures mild, crisp, tender roots. 1 oz. drills 100 feet.

Squashes.

1 packet 3 cents, 4 packets 10 cents, 1 oz. 10 cents.

Varieties: Early White Bush Scallop, Giant Summer Crookneck, Delicata, Mammoth Chili and Hubbard.

The Scallop and Crookneck are early, and used in summer while in an immature state. Delicata, Chili and Hubbard are for winter use. To overcome the Squash bug a simple remedy is described in a slip accompanying the seeds.

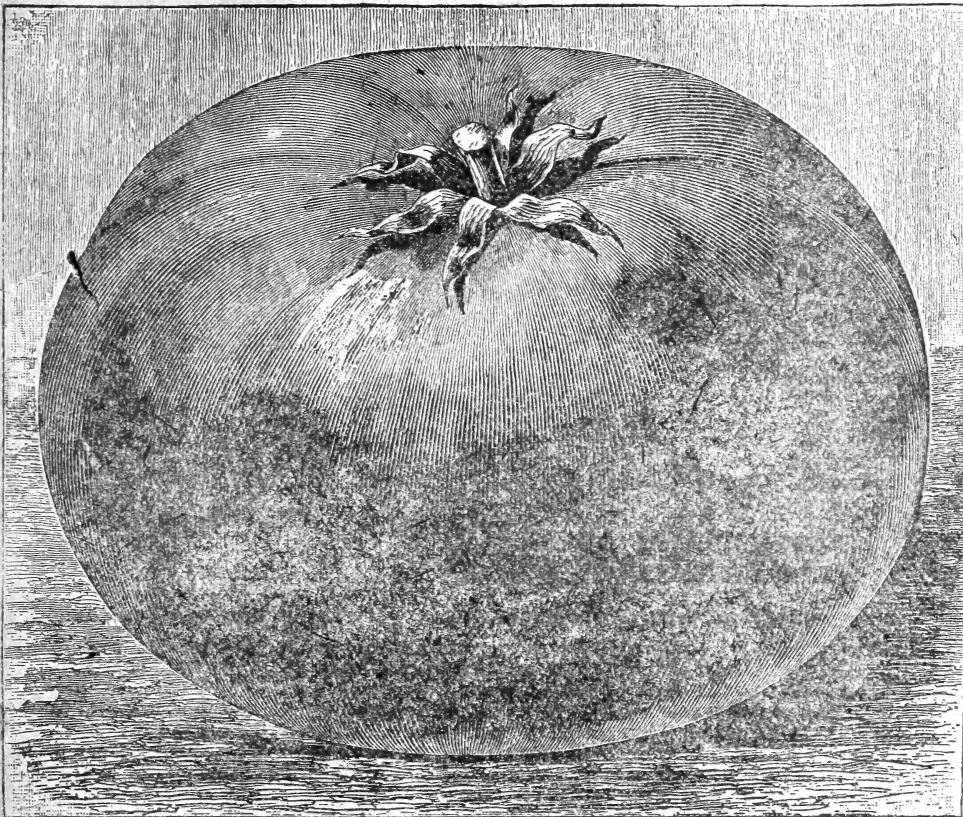

RADISH, NEW CARDINAL WHITE-TIP.

The Faultless Stone Tomato.

61

1 packet 3 cents, 4 packets 10 cents, $\frac{1}{2}$ ounce 15 cents, 1 ounce 25 cents, $\frac{1}{4}$ pound 65 cents, one pound \$2.40.

THE FAULTLESS STONE TOMATO.

I offer the finest garden or field Tomato in the world—the Faultless Stone Tomato. It is an improvement on the Stone, which has for several years been the leading Tomato among large growers. The plants are vigorous, come into bearing early, and are unsurpassed for productiveness. They are free from blight, and keep in bearing a long time. The tomatoes are very large, of a beautiful red color, always smooth, ripen evenly, do not crack or rot, and are, to use an exaggerated expression, “as solid as a rock or stone,” hence the name. The quality is rich and luscious. The flesh is of fine texture, tender, sweet and of delicious flavor. For slicing they are unsurpassed, as they are free from green or unripened streaks through the central parts, so common in large tomatoes, and some of the fruits being of a golden yellow color the contrast of crimson and gold in the dish is very pleasing. For canning no other Tomato equals it. Market gardeners find the Faultless Stone the most profitable sort to grow, being the most productive and salable. I can supply seeds for market gardeners and others without the golden variety when wanted. Buy the Faultless Stone only from Park, to be sure of true, reliable seeds.

Other Varieties.—Livingston's Beauty, an early variety, large, in immense clusters, smooth and handsome. A very superior variety. Also Ignotum, Golden Queen, Trophy, Ponderosa, Livingston's Favorite, Ten Ton, Atlantic Prize and small Pear-shaped, red and yellow. Price, 1 packet 3 cents, 4 pkts. 10 cents., $\frac{1}{2}$ oz. 15 cts., 1 oz. 25 cts.

Culture.—Sow early in a hot-bed or boxes, and transplant to the garden when warm weather comes. Cultivate well till the plants get well started and begin to cover the ground, then use the hoe carefully, as the plants are injured by being disturbed. It is well to train garden plants to a stake, removing side branches. The sun has free access when thus trained, and the fruit ripens better. For superior fruit tie a paper bag over the clusters after the tomatoes form, after the manner of bagging grapes. Exhibition specimens are successfully produced by this means.

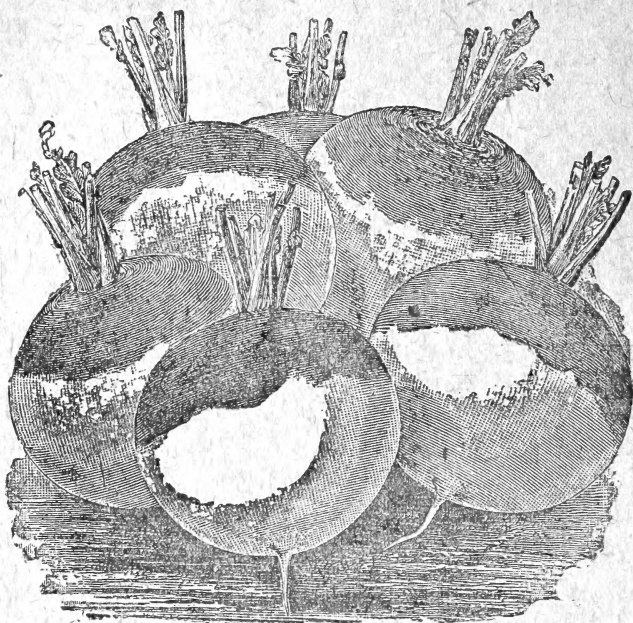

Spinach, Long-Standing Prickly-Seeded.

1 packet 3 cents, 4 packets 10 cents, 1 ounce 5 cents, $\frac{1}{4}$ pound 12 cents, 1 pound 35 cents.

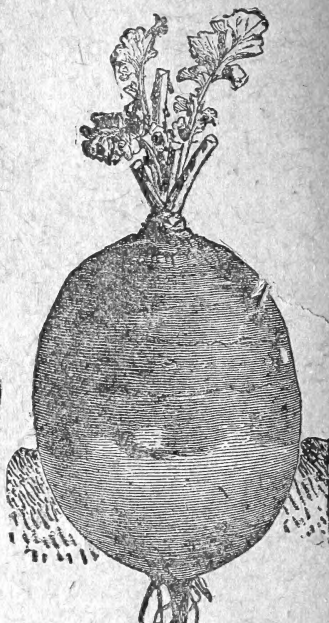

This is a hardy, large, thick-leaved Spinach, slow to go to seed, and the best garden sort. It grows freely, and is reliable. Sow in rows early in spring.

Turnip, Purple-top White Globe.

1 packet 3 cents, 4 packets 10 cents, 1 ounce 5 cents, $\frac{1}{4}$ pound 15 cents, 1 pound 50 cents.

PURPLE-TOP WHITE GLOBE TURNIP.

L. I. PURPLE-TOP RUTABAGA.

This new Turnip surpasses all other varieties in quality, productiveness and long-keeping, and is the most desirable and useful sort for either garden or field culture. Its growth is quick, and the flesh is crisp, tender, sweet and rich. For table use it excels, and for feeding stock it is the most profitable, its enormous yield and long keeping making it especially valuable. One pound of seeds will be sufficient for an acre.

Other Varieties.—Purple-top Strap-leaf, Amber Globe, White Stone, Early Flat Dutch, Early Flat Purple Top, Extra White Milan, Robertson's Golden Ball, Early Six Weeks, Scarlet Kashmyr. Same prices as above.

Culture.—Sow broad-cast early in spring for an early crop, and in June or July for an autumn crop. As an enricher of soil a crop of Turnips is considered as useful, turned down, as a spread of manure. For this purpose sow broad-cast and harrow in during the month of June or July. Purple-top Strap-leaf is a good sort to sow as a fertilizer.

Improved Long Island Purple-top Rutabaga or Swede.

1 packet 3 cents, 4 packets 10 cents, 1 ounce 5 cents, $\frac{1}{4}$ pound 15 cents, 1 pound 45 cents.

This is without doubt the finest Rutabaga or Swedish Turnip in cultivation. It matures early, is smooth, rich yellow with showy purple top, globular in form, and the leaves issue from a neckless crown, as shown in the engraving. The flesh is tender, crisp, sweet and of fine flavor. For the table it is greatly prized when par-boiled and

fried in sugar, or when boiled and seasoned as are the common Turnips. The roots grow to a large size, twice as large as ordinary Rutabagas, are very productive, keep well, and are valuable for stock feeding. Sow in drills, 18 inches apart, early in June, and thin out till the plants are 6 or 8 inches apart.

LAVENDER.

Herb, Lavender, True.

1 pkt. 3 cts., 4 pkts. 10 cts., 1 oz. 20 cts., $\frac{1}{4}$ lb. 50 cts.

The true Lavender is a delightful Mint. It is very pretty in a bed, and the delicious fragrance of its foliage and bloom call forth expressions of delight from everybody. It is also valuable as a medical herb, and still more it is a sure preventive of the ravages of moth when sprigs of the blooming plants are cut, dried, and enclosed with clothing or fur robes when packed away in the spring, or when placed under carpet troubled with the insect. The plant is hardy, and will take care of itself when once established. Everybody should cultivate a bed of Lavender.

CHOICE SUMMER-BLOOMING BULBS.

GIANT GLOXINIA.

GLADIOLUS.

LILY OF THE VALLEY.

Amaryllis, Aigberth Strain, the finest of Amaryllis; flowers like A. Johnsoni, but larger, and showing many rich colors and variegations, fine white to deep crimson. Each, large bulbs, 40 cents, per dozen \$4.00.

Johnsoni, the well-known sort, 35 cents each, \$3.50 per dozen, large bulbs.

Begonias, Giant Tuberous, white, scarlet, crimson, yellow and rose, each, 6 cents, or the collection, 5 sorts for 25 cents. Double, same colors, 20c. each.

I offer only the fine, large Belgian Bulbs, imported from a celebrated specialist at Ghent. They will produce the finest colored flowers of the largest size. There are none better. Give fibrous, sandy soil, protection from wind, and partial shade.

Caladium, Fancy, finest varieties, 20 cents each, \$2.00 per dozen.

These are very handsome as pot plants for the window or conservatory in the summer. Do not start them too early. Avoid chills.

Caladium esculentum, large bulbs, 15 cents each, \$1.50 per dozen. Small bulbs, 5 cents each, 50 cts. per dozen. A fine ornamental-leaved plant for summer. Likes shade and plenty of water.

Calla, Spotted, each 10 cents, per dozen \$1.00.

A handsome pot plant, or for a shady, moist bed. Foliage nicely spotted with white. Flowers shape of Calla, but smaller; white with purple center.

Canna, New Gladiolus-flowered, fine sorts, named, 10 cents each, \$1.00 per dozen.

Makes a showy bed when grouped in a sunny place. Water freely while growing. This is the secret of successful Canna culture.

Dicentra spectabilis, 15 cents each, \$1.50 per dozen.

A hardy herbaceous plant, bearing long racemes of charming pink, heart-shaped flowers.

Double Dahlia, fine named varieties, white, rose, scarlet, crimson, purple, variegated, etc., 15 cents each, \$1.50 per dozen.

Among the most showy and beautiful of summer flowers; of exquisite form and texture, and very double.

Galfonia (Hyacinthus) Candicans, often called Giant Cape Hyacinth, 5 cents each, 50 cts. per dozen.

A hardy bulb, throwing up a huge flower scape, 3 feet high, in summer, bearing large, white, drooping flowers. Plant in a raised bed of sandy soil.

Gladiolus, French Hybrids, large bulbs, per hundred \$3.00, per dozen 50 cents, each 5 cents. Smaller, but blooming-sized bulbs, \$1.50 per hundred, 25 cents per dozen, 3 cents each.

I offer a very choice mixture of the best colors and varieties. Set six inches deep and as many inches apart they make a grand bed in summer. Fine also for cutting. The bulbs are as easily kept over winter as Potatoes. I can also furnish Child's choice hybrids, price \$1.00 per dozen, 10 cents each.

Gloxinias, Giant Belgian Hybrids, white, blue, red and spotted, 10 cents each, \$1.00 per dozen.

These are imported from a celebrated Belgian grower, and are fine large tubers of the finest European strains. They are magnificent summer flowers of easy culture. Grow in pots, in partial shade, and in a place sheltered from wind.

Lilium auratum, the gold-band Lily of Japan.

Large bulbs, selected, 20 cents each, \$2.00 per dozen. Smaller bulbs 12 cents each, \$1.25 per dozen.

The finest of Lilies, easily grown, and sure to bloom. Hardy, and will live and bloom for years.

Lilium Lancifolium, Rubrum, red, and Album, white. Large bulbs, 15 cents each, \$1.50 per dozen.

Lily of the Valley, 4 cents each, 6 for 20 cents, 35 cents per dozen.

Beautiful foliage and charming racemes of bells, white, deliciously fragrant. Fine for the cemetery. Hardy, will thrive in a dense shade. See engraving.

Madeira Vine, 5 cents each, 50 cents per dozen.

A beautiful, rapid-growing vine. Foliage massive, and in autumn smothered with deliciously scented flowers in graceful racemes.

Montbretia crocosmiflora, a Gladiolus-like plant, bearing spikes of bloom in summer and autumn.

Requires the same care as Gladiolus. Five cents each, 50 cents per dozen.

Paeonies, Chinese, pink, red, white and yellow, 15 cents each, \$1.50 per dozen.

Splendid large flowers. The plants are hardy, and increase in beauty from year to year. Very showy and beautiful.

Tigridias, 5 cents each, 50 cents per dozen. Colors, red, yellow and white. Large, showy, shell-like flowers, the center tigred or spotted. Grow a foot high, and a clump of them always shows flowers.

Tuberoses, Double, Excelsior Pearl, large bulbs, 4 cents each, 40 cents per dozen; smaller, but blooming-sized bulbs, 3 cents each, 25 cents per dozen.

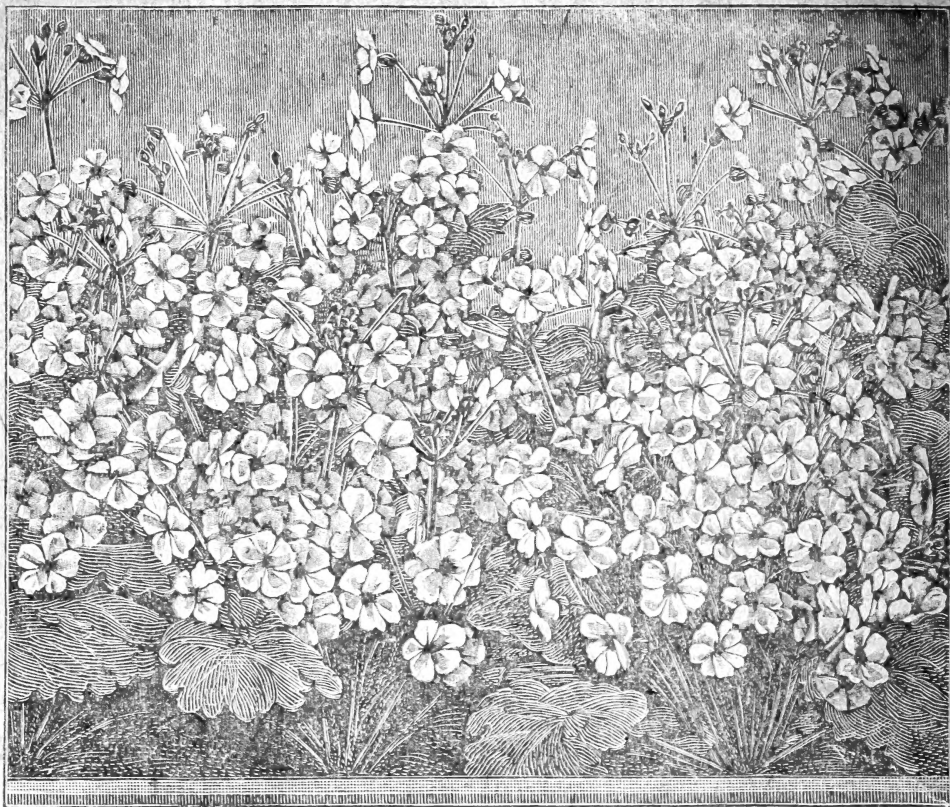

Spikes of double, exceedingly fragrant flowers in autumn. A favorite flower on account of its beauty and perfume. My bulbs are very fine, and sure to bloom. Potted in July they are winter-blooming.

Water Lily, white, fragrant; large roots, 20 cents each, \$2.00 per dozen. Flowers waxy, semi-double, sweet-scented. Grow in water. Hardy. A fine pond or tub plant.

All of the above can be depended upon for fine flowers. Any person can grow them, and the cultural instructions sent with them insure success. For other bulbs and plants see Park's Surprise List, issued in May, and Park's Bulb List, issued in August. Address

GEO. W. PARK,

LA PARK, Lancaster Co., Pa.

A Grand Race of Giant Primroses.

[PRIMULA HYBRIDA PYRAMIDALIS STELLATA.]

FREE-BLOOMING, EVER-BLOOMING, WINTER-BLOOMING.

Entirely new. Seeds very scarce. Price, per packet of 10 seeds 10 cents, 3 packets 25 cents.

Here is a splendid novelty—something entirely new—offered in this country for the first time last year. It is a race of Giant Primroses, gorgeous in bloom, and exceedingly beautiful. The plants are easily grown from seeds, begin to bloom in a few months, and continue to grow and bloom, assuming a pyramidal form, growing upwards of two feet high and as much in diameter, with exquisite fringed flowers in great profusion and of various colors from white to pink, some with eyes, a pyramidal mass of bloom, that elicits the enthusiastic admiration and praise of all observers.

Imagine a pyramidal plant two feet or more high and two feet across at the base, freely covered with starry, fringed primroses about the size of a common Chinese Primrose, and keeping in bloom for many months, and you have some idea of this grand novelty. The Chinese Primrose is the great window favorite today, but here is a Primrose that bids fair to out-rival it. It is as easily grown, has handsome foliage, is a giant in growth and more floriferous and more showy than the Chinese Primrose. For the window in winter it is magnificent. Better order soon, before my limited stock of seeds is exhausted. The fine wood engraving, prepared from a photographic sketch, will give you some idea of the beauty of this superb novelty. The seeds have been sold in England at \$1.25 per packet, but while my supply lasts I will sell at 10 cents per packet of 10 seeds, 3 packets 25 cents.

Park's Book of Novelties and Specialties.

KIND READER:—If you do not find what you want in this Guide, it may be offered in PARK'S BOOK OF NOVELTIES AND SPECIALTIES, a superbly illustrated work issued in March. It tells all about the new and good things in flowers, and gives much useful information. Send for it. Address
